

Contents

Preface XIII

Volume I

- 1 **Eukaryotic Gene Expression by RNA Polymerase II** 1
Geetha Durairaj, Shivani Malik, and Sukesh R. Bhaumik

- 2 **Epigenetic Code: Histone Modification, Gene Regulation, and Chromatin Dynamics** 29
Arunoday Bhan, Paromita Deb, and Subhrangsu S. Mandal

- 3 **Histone Lysine Methylation, Demethylation, and Hormonal Gene Regulation** 59
Yaling Huang, Briana Dennehey, and Xiaobing Shi

- 4 **The Role of HATs and HDACs in Cell Physiology and Disease** 101
Irene Santos-Barriopedro, Helena Raurell-Vila, and Alejandro Vaquero

- 5 **The Short and Medium Stories of Noncoding RNAs: microRNA and siRNA** 137
Arunoday Bhan, Paromita Deb, Milad Soleimani, and Subhrangsu S. Mandal

- 6 **Long Noncoding RNA (lncRNA): Functions in Health and Disease** 169
Arunoday Bhan, Milad Soleimani, and Subhrangsu S. Mandal

- 7 **Histone Variants: Structure, Function, and Implication in Diseases** 209
Francisca Alvarez and Alejandra Loyola

- 8 **Genomic Imprinting in Mammals: Origin and Complexity of an Epigenetically Regulated Phenomenon** 227
Elena de la Casa-Esperón

9 Centromere and Kinetochore: Essential Components for Chromosome Segregation 259

Shreyas Sridhar, Arti Dumbrepatil, Lakshmi Sreekumar, Sundar Ram Sankaranarayanan, Krishnendu Guin, and Kaustuv Sanyal

10 Nuclear Receptors and NR-coregulators: Mechanism of Action and Cell Signaling 289

Arunoday Bhan and Subhrangsu S. Mandal

Volume II

11 Estrogen and Progesterone Receptor Signaling and Action 329

Linda I. Perrotti

11.1 Introduction 329

11.2 Nuclear Hormone Receptor Superfamily 330

11.3 Estrogen and Progesterone Receptor Isoforms 332

11.4 Mechanisms of Estrogen and Progesterone Signaling 334

11.4.1 Direct Genomic Signaling (Ligand Dependent) 335

11.4.2 Indirect Genomic Signaling – Ligand Independent 336

11.4.3 Nongenomic Signaling – Membrane Steroid Receptors 336

11.4.3.1 Nongenomic Estrogen Signaling 337

11.4.3.2 Nongenomic Progesterone Signaling 338

11.5 Integration of Membrane and Nuclear Signaling 338

11.6 Coregulators of Estrogen and Progesterone Signaling 338

11.6.1 The p160 Steroid Receptor Coactivator Family 339

11.6.2 Corepressors of Steroid Hormone Receptors 342

11.7 Convergence of ER and PR Signaling Mechanisms: Focus on the Brain 342

11.7.1 Expression and Distribution of Corepressors in the Brain 345

11.8 Conclusion 345

References 345

12 Gonadal Steroid Hormones and Brain Protection 355

Meharvan Singh, Courtney Brock, Rebecca Cunningham, and Chang Su

12.1 Introduction 355

12.2 The Protective Effects of Estrogens on the Brain 355

12.3 The Protective Effects of Progesterone on the Brain 356

12.4 The Protective Effects of Androgens in the Brain 359

12.5 Clinical Studies of Estrogens in Alzheimer's Disease 361

12.6 Clinical Studies Addressing the Protective Effects of Progesterone and Related Progestins 362

12.7 Clinical Studies Addressing the Potential Beneficial Effects of Androgens 364

12.8 Conclusions 365

References 366

13	Glucocorticoid Receptor-Mediated Signaling and Stress Metabolism	377
	<i>Rosalie M. Uht and Shreyas Bhawe</i>	
13.1	Introduction	377
13.2	Gene Regulation	378
13.2.1	History of the GR	378
13.2.2	Overall Structure	378
13.2.3	Glucocorticoid Response Elements (GREs)	379
13.2.3.1	Activating GREs, Palindromes	379
13.2.3.2	Negative GREs (nGREs)	380
13.2.3.3	Bioinformatic Contributions	381
13.2.4	Coregulators	381
13.2.4.1	Coactivators	381
13.2.4.2	Corepressors	382
13.2.4.3	Coregulators with Activating and Repressing Activities	383
13.2.5	Chromatin Remodeling	383
13.2.6	Structural Analysis of GR	384
13.2.6.1	Crystal Structures	384
13.2.7	Summary	385
13.3	Metabolism	385
13.3.1	<i>PEPCK</i> Promoter Mapping	386
13.3.1.1	GR Binding Sites	387
13.3.1.2	Other TF Binding Sites	387
13.3.2	Role of Coactivators	387
13.3.2.1	Mechanisms of <i>PEPCK</i> Repression	388
13.3.2.2	<i>PEPCK</i> Chromatin	388
13.3.2.3	Metabolic Network	388
13.3.3	Summary	388
13.4	The HPA Axis	389
13.4.1	The CRH Promoter	389
13.4.2	Methylated CpG Binding Protein 2 (MeCP2)	391
13.4.3	Specificity	392
13.4.4	Summary	393
13.5	Conclusion	393
	References	394
14	Targeting Androgen Signaling in Prostate Cancer	399
	<i>Paul H. Chung, Preethi Ravindranathan, Bishoy A. Gayed, and Ganesh V. Raj</i>	
14.1	Introduction	399
14.2	Disease States of Metastatic Prostate Cancer	400
14.3	Androgens and Androgen Receptor	401
14.4	Castrate-Sensitive Prostate Cancer	404
14.5	Prostate Cancer Progression	405
14.6	Prostate Cancer Drugs	407

- 14.6.1 Blocking Androgen Production 407
- 14.6.2 Blocking the Androgen Receptor 409
- 14.6.3 Destabilizing the Androgen Receptor 410
- 14.6.4 Modifying Androgen Receptor DNA 410
- 14.7 Future of Prostate Cancer Therapy 411
- 14.8 Conclusion 412
- References 412

15 Role of Peroxisome Proliferator-Activated Receptors in Inflammation and Angiogenesis 417

Suchismita Acharya

- 15.1 Introduction 417
- 15.2 PPAR α (NR1C1) 432
 - 15.2.1 Inflammation 432
 - 15.2.1.1 Hepatic Inflammation 433
 - 15.2.1.2 Inflammation in Vascular Wall 433
 - 15.2.1.3 Inflammation in Spinal Cord 434
 - 15.2.2 Angiogenesis 434
 - 15.2.2.1 Anticancer/Antiangiogenic Activity 434
 - 15.2.2.2 Proangiogenic Activity 436
- 15.3 PPAR β/δ (NR1C2) 436
 - 15.3.1 Inflammation 437
 - 15.3.2 Wound Healing 437
 - 15.3.3 Angiogenesis 438
 - 15.3.3.1 Proangiogenic Activity 438
 - 15.3.4 Antiangiogenic Activity 438
- 15.4 PPAR γ (NR1C3) 439
 - 15.4.1 Inflammation 440
 - 15.4.1.1 Allergic Inflammation 440
 - 15.4.1.2 Viral Inflammation 440
 - 15.4.1.3 Neuroprotection/Inflammation-AZ/PD 441
 - 15.4.1.4 Atherosclerosis 441
 - 15.4.2 Angiogenesis 441
 - 15.4.2.1 Cornea and Retina 441
 - 15.4.2.2 Lung/Bone/Fat Tissue/Placenta 443
- 15.5 Concluding Remarks 443
- References 444

16 RAR/RXR-Mediated Signaling 457

Jörg Mey

- 16.1 Introduction 457
- 16.2 Vitamin A Receptors and Their Response Elements 457
 - 16.2.1 RAR and RXR Ligands 459
 - 16.2.2 The Structure of Retinoid Receptors 461
 - 16.2.3 Retinoic Acid Response Elements 463

16.3	Transcriptional RAR/RXR Signaling: The Standard Model and Recent Discoveries	463
16.3.1	Ligand Binding and Exchange of Cofactors	465
16.3.2	Histone Modification and Recruitment of the Transcription Machinery	465
16.3.3	Termination of RAR-Dependent Signaling	467
16.3.4	New RAR Binding Sites	467
16.3.5	Variations of the Classical Model of Activation	467
16.4	Regulation of RAR Signaling: Ligand Synthesis and Metabolism	468
16.4.1	Cleavage of Provitamin A and Retinyl Esters	468
16.4.2	Uptake of Dietary Retinol	470
16.4.3	Synthesis of Retinal	470
16.4.4	Synthesis of Retinoic Acid	471
16.4.5	Retinoic Acid Degradation	471
16.5	Regulation of RAR Signaling: The Role of Binding Proteins	474
16.5.1	Intestinal Uptake and Hepatic Storage	475
16.5.2	Transport in the Circulation	476
16.5.3	Cellular Uptake in Target Tissues	477
16.5.4	Retinoic Acid Synthesis and Degradation	477
16.5.5	Nuclear Receptor Activation	478
16.6	Regulation of RAR Signaling: Receptor Expression, Modification, and Degradation	479
16.6.1	Specific Expression of RARs in the Body	479
16.6.2	Nuclear Translocation	479
16.6.3	Posttranslational Modification of RAR/RXR	481
16.7	Transrepression and Crosstalk with Other Transcription Factors	482
16.7.1	Transrepression of Other Regulatory Sequences	483
16.7.2	Interactions between RAR and Other Transcription Factors	483
16.7.3	Transcriptional Control by Other Retinoids	484
16.8	Nongenomic Mechanisms of RA/RAR Signaling	485
16.8.1	Rapid Physiological Effects of RA	486
16.8.2	Cytosolic Localization of RAR	486
16.8.3	Direct Interactions with Protein Kinases	487
16.8.4	Suppression of Protein Translation	487
16.9	The Role of Retinoid Binding Proteins in Phototransduction	488
16.9.1	The Retinoid Cycle of Phototransduction	488
16.9.2	Phototransduction and the Evolution of RA Nuclear Signaling	490
16.10	Retinoic acid-Regulated Genes	490
16.10.1	Direct Gene Targets of RA	490
16.10.2	Indirect Targets of RA	492
16.10.3	Discrepancies between DNA Binding and Active Signaling	492
16.10.4	"Systems Biology" of RA Signaling	493
16.11	Conclusion	493
	List of Abbreviations and Symbols	495
	References	496

17	On the Trail of Thyroid Hormone Receptor Epigenetics	511
	<i>Pradip K. Sarkar</i>	
17.1	Introduction	511
17.1.1	Brief Historical Background	511
17.1.2	Functional Background	512
17.1.2.1	Biosynthesis of Thyroid Hormones and Their Metabolites	512
17.1.2.2	Thyroid Hormone Transportation	514
17.1.2.3	Physiologic Pathway of Thyroid Hormone Secretion	515
17.2	Overview of Thyroid Hormone Action	517
17.2.1	Molecular Mechanism of Thyroid Hormone Action	518
17.2.1.1	Concepts of Cellular Thyroid Hormone Receptors	518
17.2.1.2	Classification of the Nuclear Receptors for Thyroid Hormones and Their Isoforms	518
17.2.1.3	Thyroid Hormone Receptor Functional Domains	522
17.2.1.4	Thyroid Response Elements (TREs)	524
17.3	Molecular Mechanisms of Regulation of Gene Expression by Thyroid Hormone-Specific Nuclear Receptors	526
17.4	Nongenomic Mechanism of Action of Thyroid Hormones	530
17.5	Conclusion	533
	References	534
18	Insulin Signaling, Epigenetics, and Human Diseases	541
	<i>Ragitha Chruvattil, Muskaan Belani, Tushar P. Patel, and Sarita Gupta</i>	
18.1	Introduction to Epigenetics	541
18.2	Types of Epigenetic Modifications	542
18.2.1	Histone Acetylation/Deacetylation	542
18.2.2	DNA–Histone Methylation/Demethylation	543
18.2.3	Histone Phosphorylation and O-Linked N-Acetylglucosamination	545
18.3	Epigenetic Links to Endocrine System	545
18.4	Insulin	546
18.4.1	Epigenetic Pattern of <i>Ins</i> Gene	547
18.4.2	Glucose-Induced Chromatin Modification in <i>Ins</i> Gene Promoter	549
18.4.3	Epigenetics Related to Insulin Biosynthesis	549
18.5	Insulin Signaling	552
18.6	Insulin Receptor	553
18.6.1	Regulation of Insulin Receptor	553
18.6.1.1	Genetic Regulation	554
18.6.1.2	Epigenetic Regulation	554
18.6.1.3	Hormonal Regulation	555
18.7	Insulin Receptor Substrate (IRS)	555
18.7.1	Epigenetics Involved with IRS	555
18.8	The PI(3)K Pathway	556
18.8.1	Epigenetics Involved with PI(3)K/AKT	557
18.8.2	Epigenetics Involved with GSK3 (Glycogen Synthase Kinase 3)	557
18.8.3	Epigenetics Involved with Glucose Transporters	558

18.9	The Ras Pathway	559
18.9.1	Epigenetics Involved in Ras Pathway	560
18.10	Insulin Resistance and Metabolic Derangements	560
18.10.1	Insulin Resistance and Epigenetics	561
18.10.2	Insulin Resistance, Metabolic Derangements, and Chromatin Remodeling	563
18.11	Conclusion	564
	Acknowledgment	565
