1	Introduction	9
2	Recombination in Crystalline Silicon	13
2.1	General Aspects	13
2.2	Minority Carrier Lifetime	14
2.2.1	Radiative Recombination	15
2.2.2	Auger Recombination	16
2.2.3	SRH Recombination	18
2.2.4	Surface Recombination	19
2.2.5	Fischer Model for S_{met}	22
2.2.6	pLPA Model for S_{met}	25
2.3	Recombination Factor J_0	33
2.3.1	Emitter Recombination Factor J_{0e}	34
2.3.2	Base Recombination Factor J_{0b}	35
2.3.3	J_0 for PERL cells	38
2.4	Lifetime Measurement by QSSPC	39
2.4.1	Measurement of the Effective Lifetime	39
2.4.2	Implied V_{oc}	40
2.4.3	Implied FF	41
3	Characterization and Simulation of Crystalline Silicon Solar Cells	43
3.1	JV Characteristics of pn Junctions in Semiconductors	43
3.1.1	Fill Factor	44
3.1.2	Efficiency	45
3.2	$Suns-V_{\text{oc}}$ Characterization	45
3.2.1	Pseudo Fill Factor	46
3.2.2	Determination of Series Resistance	47
3.3	Cell Simulation Using Quokka	48
3.3.1	The Simulation Model	48
3.3.2	Free-Energy Loss Analysis	51

4	Plasma-enhanced chemical vapor deposition	55
4.1	Plasma Excitation	55
4.1.1	Radio-frequency Plasma	56
4.1.2	Microwave Plasma	57
4.1.3	Ionization and Dissociation	58
4.2	Roth&Rau AK400M PECVD Reactor	59
4.3	Roth&Rau AK800 PECVD Reactor	60
5	The <i>PassDop</i> Process	63
5.1	Passivation of Silicon Surfaces	63
5.1.1	Amorphous Silicon Nitride	64
5.1.2	Amorphous Silicon Carbide	67
5.2	Laser Doping	69
5.2.1	History of Laser Doping	69
5.2.2	Laser Doping from Amorphous Passivation Layers	70
5.3	<i>PassDop</i>	72
5.3.1	Status Quo	73
5.3.2	Overview over the <i>PassDop</i> Approaches	74
6	Development and Characterization of <i>PassDop</i> layers	77
6.1	Sample Layout and Standard Parameters	77
6.2	Layers for low-temperature Metallization	79
6.2.1	SiC <i>PassDop</i>	79
6.2.2	SiN <i>PassDop</i>	86
6.3	Firing-stable <i>PassDop</i> based on a-SiN _x :P	98
6.3.1	Single Layer	99
6.3.2	Double Layer Systems	102
6.4	Summary	120
7	Properties of the <i>PassDop</i> LBSF	123
7.1	Profile Characterization	123
7.1.1	Sample Design for Macroscopic Methods	124
7.1.2	Doping Concentration in a Single Laser Spot	128
7.1.3	Nitrogen as an Impurity in the <i>PassDop</i> LBSF	139
7.1.4	Carbon as an Impurity in the <i>PassDop</i> LBSF	159
7.1.5	Other Impurities	165
7.2	Recombination	173
7.3	Summary	183

8	<i>PassDop</i> PERL Solar Cells	187
8.1	<i>fPassDop</i> for Screen Printed Contacts	187
8.1.1	Single Layer	188
8.1.2	Double Layer Stacks	192
8.2	<i>PassDop</i> for Low-Temperature Metallization	202
8.2.1	Small-Area Cells with Evaporated Contacts	202
8.2.2	Large-Area <i>nPassDop</i> Cells (PVD)	211
8.2.3	Large-Area <i>nPassDop</i> Cells (NiCu-Plating)	220
8.3	Summary	225
9	Summary	229
10	Deutsche Zusammenfassung	235
11	Outlook	243
	Glossary	245
	Symbols	249
	Constants	255
	List of Publications	257
	Bibliography	261
	Danksagung	285
