Series Editor Preface	<i>VII</i>
About the Series Editor	<i>IX</i>
Foreword by Gerhard Ertl	<i>XXXI</i>
Foreword by Pierre Jacobs	<i>XXXIII</i>

Volume 1

Part One Preparation of Nanocatalysts and Their Potential in Catalysis 1

1	Liquid-Phase Synthesis of Nanocatalysts 3
	<i>Jean-Francois Hochepped</i>
1.1	Introduction 3
1.2	Metallic Oxides 6
1.2.1	(Co)Precipitation by Mixing (Aqueous Solutions) and Ripening 6
1.2.2	Hydrolytic Sol–Gel 9
1.2.3	Homogeneous (Co)Precipitation by Thermohydrolysis (Aqueous Solutions) 10
1.2.4	Homogeneous (Co)Precipitation and/or Ripening in Nonaqueous Solvents 11
1.2.5	Anodization 11
1.3	Metallic Nanoparticles 12
1.3.1	Aqueous Syntheses 13
1.3.2	Polyol-Mediated Syntheses 14
1.3.3	Hollow Particles by Galvanic Replacement 15
1.4	Oxide–Metal Interfaces 15
1.5	Conclusion 17
	References 18
2	Supported Gold Nanoparticles Leading to Green Chemistry 21
	<i>Tamao Ishida and Masatake Haruta</i>
2.1	Introduction 21
2.2	Oxidation 22
2.2.1	Oxidation of Alcohols 22

2.2.1.1	Size Dependence	22
2.2.1.2	Electronic State of Au and Ligand Effect	23
2.2.1.3	Catalytic Activity and Selectivity Tunable by Support Materials	24
2.2.2	Oxidation of Alkenes	26
2.2.3	Oxidation of Alkanes	27
2.3	Hydrogenation	28
2.3.1	Selective Hydrogenation of α,β -Unsaturated Aldehydes	28
2.3.1.1	Size Dependence	28
2.3.1.2	Role of Support	29
2.3.1.3	Electronic Effect of Au	30
2.3.2	Selective Hydrogenation of Nitroaromatics	31
2.3.2.1	Role of Support for Nitrostyrene Hydrogenation	31
2.3.2.2	Selective Hydrogenation of Nitrobenzaldehyde	31
2.3.3	Size Specificity for the Hydrogenation of Formyl and Nitro Groups	33
2.4	Conclusion	34
	References	34
3	Application of Nanocarbon Materials to Catalysis	37
	<i>José Luís Figueiredo</i>	
3.1	Introduction	37
3.1.1	Nanosized Carbons	38
3.1.2	Nanostructured Porous Carbons	38
3.2	Surface Chemistry of Carbon Materials	39
3.2.1	Surface Functional Groups	39
3.2.2	Characterization Methods	40
3.2.3	Tuning the Surface Chemistry	41
3.3	Catalytic Applications of Nanocarbons	43
3.3.1	Nanocarbons as Catalyst Supports	43
3.3.1.1	Supported Metal Catalysts	43
3.3.1.2	Anchored Metal Complexes	45
3.3.2	Nanocarbons in Photocatalysis	45
3.3.3	Nanocarbons as Catalysts on Their Own	47
3.3.3.1	Oxidative Dehydrogenation of Isobutane	47
3.3.3.2	Acid Catalysis	49
3.3.3.3	Advanced Oxidation Processes	50
3.3.3.4	Oxygen Reduction Reaction	51
3.4	Summary and Perspectives	51
	Acknowledgments	52
	References	52
4	Nano-Oxide Mesoporous Catalysts in Heterogeneous Catalysis	57
	<i>Ioana Fechete and Jacques C. Vedrine</i>	
4.1	Introduction	57
4.2	Strategies for the Preparation	59

4.2.1	Preparation of Mesoporous Metal Oxides by Direct Synthesis Approach	60
4.2.2	Preparation of Mesoporous Metal Oxides by the Postsynthesis Approach	60
4.3	Nano-Oxide Mesoporous Catalysts and Catalytic Applications	61
4.3.1	Selective Catalytic Reduction (SCR) Reaction	64
4.3.2	Hydroxylation of Benzene	67
4.3.3	CO Oxidation	69
4.3.4	Fischer–Tropsch Synthesis (FTS)	72
4.3.5	Biofuel Production and Upgrading with Mesoporous Catalysts	75
4.3.6	Catalytic Conversion of CO ₂ to CH ₄	78
4.3.7	Catalysts for the Oxidative Dehydrogenation of Ethane	80
4.3.8	Photocatalysis	81
4.4	Conclusions	84
	References	84
5	Solution Combustion Synthesis, Characterization, and Catalytic Properties of Oxide Materials	91
	<i>Parthasarathi Bera and Singanahally T. Aruna</i>	
5.1	Introduction	91
5.2	Solution Combustion Synthesis of Oxide Catalysts	95
5.2.1	Metal Ions-Substituted CeO ₂ Catalysts	95
5.2.2	Metal Ions-Substituted TiO ₂ Catalysts	97
5.2.3	Single-Step Coating of Ce _{1-x} M _x O _{2-δ} (M = Pd ²⁺ , Pt ²⁺ , and Cu ²⁺ ; x = 0.02) on Cordierite Monolith	97
5.3	Characterization	98
5.3.1	XRD Studies	99
5.3.2	TEM Studies	99
5.3.3	XPS Studies	100
5.3.4	XAFS Studies	101
5.3.5	DRIFTS Studies	101
5.3.6	Raman Spectroscopy Studies	102
5.4	Catalytic Properties	102
5.4.1	Polluted Water Remediation	103
5.4.1.1	Experimental Set-Up and Procedure Used for Photocatalysis	103
5.4.1.2	Photocatalytic Activity	104
5.4.1.3	Recent Advances and Challenges	105
5.4.2	Exhaust Catalysis	106
5.4.2.1	CO Oxidation By O ₂	107
5.4.2.2	NO Reduction by CO	108
5.4.2.3	NO Reduction by H ₂	109
5.4.2.4	Selective Catalytic Reduction (SCR) of NO by NH ₃ and CO	109
5.4.2.5	NO Reduction Over Ce _{1-x} M _x O _{2-δ} (M = Pd ²⁺ , Pt ²⁺ , and Cu ²⁺) Coated on Cordierite Monolith	109
5.4.2.6	Hydrocarbon Oxidation	110

5.4.3	Hydrogen Production	110
5.4.3.1	Steam Reforming	110
5.4.3.2	Water-Gas Shift Reaction	111
5.4.3.3	CO–PROX Reaction	112
5.4.4	Hydrogenation	113
5.5	Conclusions	113
	Acknowledgments	113
	References	114
6	Nanostructured Porous Materials: Synthesis and Catalytic Applications	119
	<i>Ana Franco, Alina M. Balu, Antonio A. Romero, and Rafael Luque</i>	
6.1	Introduction	119
6.2	Materials as Supports	120
6.2.1	Porous Materials	120
6.2.2	Mesoporous Materials	120
6.2.3	Carbonaceous Materials	121
6.2.4	(Bio)Polymers	122
6.2.5	Metal Oxides	123
6.3	Supported Metal Nanoparticles on Porous Materials	124
6.3.1	Properties of Supported Metal Nanoparticles	125
6.3.2	Characterization	125
6.4	SMNPs Synthesis Routes	126
6.4.1	Physical Routes	126
6.4.1.1	Sonochemistry	126
6.4.1.2	Microwave Irradiation	127
6.4.1.3	Pulsed Laser Ablation (PLA)	128
6.4.1.4	Plasma	128
6.4.2	Chemical Routes	128
6.4.2.1	Impregnation	129
6.4.2.2	Coprecipitation	129
6.4.2.3	Deposition–Precipitation	130
6.4.2.4	Microemulsions	131
6.4.3	Physicochemical Routes	131
6.4.3.1	Sonoelectrochemistry	131
6.4.3.2	Flame Spray Pyrolysis	131
6.5	Catalytic Applications of Nanomaterials	132
6.5.1	Acid-Catalyzed Reactions	133
6.5.1.1	Alkylations	133
6.5.1.2	Acylation	134
6.5.1.3	Esterifications	135
6.5.2	Transesterification of Triglycerides to Biodiesel	136
6.5.3	Oxidation Reactions	137
6.5.4	Hydrogenations	138
6.6	Conclusions	140

	Acknowledgments	140
	References	140
7	Core Magnetic Composites for Catalytic Applications	145
	<i>Simona M. Coman and Vasile I. Parvulescu</i>	
7.1	Introduction	145
7.2	Magnetic Properties of Nanoparticles	146
7.3	Synthesis of Core–Shell Magnetic Nanoparticles	151
7.3.1	Synthesis of MNPs: Magnetite	152
7.3.2	Coating of the MNPs	156
7.3.2.1	MNPs Core Coated With Inorganic Shell	157
7.3.2.2	MNPs Core Coated With Surfactants/Polymers	162
7.4	Characterization of Core–Shell MNPs	163
7.5	Catalytic Applications in Miscellaneous Reactions	164
7.6	Conclusions	170
	References	172
8	Metal Nanoparticles Supported on Magnetically Separable Materials	179
	<i>Charlie Batarseh, Ester Weiss, and Raed Abu-Reziq</i>	
8.1	Introduction	179
8.2	Immobilization of Metal Nanoparticles on Magnetic Nanoparticles (MNPs)	180
8.2.1	Immobilization of Metal Nanoparticles on Nonfunctionalized MNPs	180
8.2.1.1	Immobilization Via Seeding Process	180
8.2.1.2	Immobilization of Metal Nanoparticles on MNPs by Coprecipitation	181
8.2.1.3	Immobilization of Metal Nanoparticles on MNPs by Incipient Wet Impregnation	181
8.2.1.4	Miscellaneous	182
8.2.2	Supporting Metal Nanoparticles on Functionalized MNPs	183
8.2.2.1	Magnetic Nanoparticles Functionalized With Organic Groups	183
8.2.2.2	Magnetic Nanoparticles Functionalized With Silane Agents	184
8.3	Immobilization of Metal Nanoparticles on Silica-Based Magnetic Supports	186
8.3.1	Silica-Coated Magnetic Nanoparticles as Supports	187
8.3.2	Magnetic Supports Based on Functionalized Silica-Coated MNPs	188
8.3.3	Magnetic Hollow Spheres as Supports	193
8.3.4	Immobilization of Metal Nanoparticles Within Yolk–Shell Nanostructures	193
8.4	Magnetic Responsive Polymer Materials as Supports	195
8.4.1	Magnetic Core–Polymeric Shell as Supports	195
8.4.2	Magnetic Composite Nano- or Microspheres as Supports	197

8.4.3	Other Magnetic Polymer Materials as Supports	197
8.5	Magnetic Carbon-Based Materials as Supports for the Immobilization of Metal Nanoparticles	199
8.5.1	Core–Shell Magnetic Carbon Supports	199
8.5.2	MOFs-Derived Magnetic Carbon Supports	200
8.5.3	Magnetic Carbon-Based Yolk–Shell Materials	201
8.5.4	Miscellaneous	201
8.6	Summary	202
