

Contents

1 Introduction	1
Ulf Neuling and Martin Kaltschmitt	

Part I Background

2 Past and Future Developments of the Global Air Traffic	13
Johannes Reichmuth and Peter Berster	
2.1 Introduction – Global Development in Air Transport	13
2.2 Regional Distribution of the Air Traffic	14
2.3 Airport Development and Bottlenecks	16
2.4 Airlines	22
2.5 Aircraft Types	25
2.6 Outlook of Air Traffic Development	27
2.7 Final Considerations	29
References	30
3 Key Drivers and Technical Developments in Aviation	33
Kay Plötner	
3.1 Introduction	34
3.2 Environmental Goals for Aviation	34
3.3 Technical Developments in Aviation	36
3.4 Final Considerations	39
References	39
4 Potential of Fossil Kerosene	43
Karsten Wilbrand	
4.1 Introduction	43
4.2 History	44
4.3 Kerosene as Aircraft Fuel	45
4.4 Demand Development	45
4.5 Kerosene Properties and Specifications	47
4.5.1 Chemical Structure and General Properties	47

4.5.2	Fuel Specification for Civil Aviation	48
4.5.3	Fuel Specification for Military Aviation	49
4.6	Production from Crude Oil	49
4.7	Production from Alternative Fossil Sources	52
4.7.1	Kerosene from Natural Gas	52
4.7.2	Kerosene from Coal	54
4.8	Final Considerations	55
	References.	56
5	Regulatory Framework of Global Aviation	59
	Marian Paschke and Carina Lutter	
5.1	Introduction – Establishing a Regulatory Framework.	59
5.2	The Conception of Aviation Law.	60
5.3	Tasks and Responsibilities of Public and Private Institutions	64
5.3.1	International Civil Aviation Organization (ICAO).	65
5.3.2	European Civil Aviation Conference (ECAC).	67
5.3.3	European Aviation Safety Agency (EASA).	68
5.3.4	European Organization for the Safety of Air Navigation (EUROCONTROL)	69
5.3.5	National Actors Exemplarily for Germany	69
5.4	Overview on Contents of Aviation Law.	70
5.5	Fuel as a Subject Matter of Aviation Law	70
5.5.1	Tax Reductions for Kerosene.	70
5.5.1.1	International Taxation Regulations for Fuel	71
5.5.1.2	Taxation of Fuel in the EU.	72
5.5.1.3	Taxation of Fuels in Germany	75
5.5.2	Aviation Emissions	77
5.5.2.1	EU Emissions Trading Scheme (EU ETS)	78
5.5.2.2	Promotion of Using Renewable Energy Sources.	84
5.5.3	Special Aspects Compared to Other Transport Options	86
5.5.4	Expected Changes	87
5.6	Final Considerations	90
	References.	91

Part II Feedstock

6	Potentials of Biomass and Renewable Energy: The Question of Sustainable Availability	95
	Arne Roth, Florian Riegel and Valentin Batteiger	
6.1	Introduction	95
6.2	Limiting Factors of Biomass Availability	97
6.3	Land-Based Biomass	99
6.4	Wastes and Residues	105
6.5	Algae	108

6.6	Going Beyond Biomass: Renewable Energy Potentials	113
6.7	Final Considerations	116
	References.	119
7	World Markets for Cereal Crops.	123
	Verena Wolf, Jakob Dehoust and Martin Banse	
7.1	Introduction	124
7.2	Wheat Market.	125
7.3	Corn Market.	131
7.4	Barley Market	136
7.5	Long-Term Developments	140
7.6	Crop Production and Biofuel	141
7.7	Final Considerations	142
	References.	144
8	World Markets for Vegetable Oils and Animal Fats.	147
	Thomas Mielke	
8.1	Introduction	148
8.2	Palm Oil Market.	148
8.3	Soy Oil Market.	152
8.4	Rapeseed Oil Market	163
8.5	Sunflower Oil Market.	168
8.6	Overall Oil and Fat Market	173
8.7	Final Considerations	184
	References.	188
9	Lignocellulosic Biomass	189
	Anne Rödl	
9.1	Introduction	189
9.2	Resources and Characteristics	191
9.2.1	Origin.	191
9.2.2	Characteristics	192
9.3	Wood	194
9.3.1	Selected Tree Species.	196
9.3.1.1	Coniferous Species	196
9.3.1.2	Broad-Leaved Species	198
9.3.2	Production Schemes.	201
9.3.2.1	Forests	201
9.3.2.2	Plantations	203
9.3.3	Production and Trade.	204
9.4	Herbaceous Biomass	207
9.4.1	Miscanthus	208
9.4.2	Common Reed (<i>Phragmites australis</i>)	209
9.4.3	Giant Reed (<i>Arundo donax</i>).	209
9.4.4	Reed Canary Grass (<i>Phalaris arundinacea</i>)	210
9.4.5	Elephant Grass (<i>Pennisetum purpureum</i> – Napier Grass)	210

9.4.6	Switch Grass (<i>Panicum virgatum</i>)	211
9.5	By-Products and Wastes	211
9.5.1	Wood	211
9.5.2	Herbaceous Biomass	213
9.6	Final Considerations	215
	References	216
10	Waste as Resource	221
	Christina Dornack, Axel Zentner and Antje Zehm	
10.1	Introduction	221
10.2	Classification of Biomass Originating from Waste	222
10.2.1	Forestry Biomass	223
10.2.2	Agricultural Biomass	223
10.2.3	Biomass from Landscape Management	224
10.2.4	Biomass in Municipal Waste	224
10.2.5	Biomass from Industry and Commerce	228
10.3	Potential of Organic Waste in Germany	228
10.3.1	Forestry Biomass	229
10.3.2	Agricultural Biomass	229
10.3.3	Biomass from Industry	230
10.4	Utilization of Waste Derived Biomass	230
10.5	Final Considerations	233
	References	233
11	<i>Jatropha curcas</i> L. – An Alternative Oil Crop	237
	Gregor Heinrich	
11.1	Introduction	238
11.2	Breeding Objectives	241
11.3	Utilization	243
11.3.1	Example: <i>Jatropha</i> Oil to Biokerosene	244
11.3.2	Example: <i>Jatropha</i> Oil to Pure Plant Oil and Biodiesel	247
11.3.3	CO ₂ -Sequestration, GHG Emissions and Sustainability Criteria	248
11.4	Cultivation and Harvest	250
11.4.1	<i>J. Curcas</i> L. – Potential Cropping Area	250
11.4.2	Cultivation	251
11.4.3	Harvest	252
11.5	Final Considerations	252
	References	253
12	<i>Camelina</i> – An Alternative Oil Crop	259
	Margaret Campbell	
12.1	Introduction	259
12.2	The Plant	260
12.3	Cultivation and Harvesting	262

12.3.1 Growing	262
12.3.2 Harvesting	263
12.4 Uses	264
12.4.1 Oil Content and Characteristics	264
12.4.2 Biofuels	268
12.5 Final Considerations	271
References	272
13 “New” Oil Plants and Their Potential as Feedstock for Biokerosene Production	277
Thilo Zelt	
13.1 Introduction	277
13.2 Alternative Oil Plants for Biokerosene	279
13.2.1 <i>Acrocomia Aculeata</i>	279
13.2.2 <i>Allanblackia</i>	280
13.2.3 <i>Orbignya Speciosa</i> (“Babassu”)	281
13.2.4 <i>Moringa Oleifera</i>	282
13.2.5 <i>Azadirachta indica</i> (Neem)	284
13.2.6 <i>Pongamia Pinnata</i>	285
13.2.7 <i>Swida Wilsoniana</i>	286
13.3 Comparative Analysis of Selected Oil Plants	287
13.4 Environmental, Social, and Economic Evaluation – Case Study <i>Acrocomia Aculeata</i>	293
13.4.1 Environmental Sustainability	294
13.4.2 Social Sustainability	294
13.4.3 Economic Sustainability and Potential Business Models	295
13.4.4 Potentials of Cultivating <i>Acrocomia</i>	296
13.4.5 Transferability of the Case Study to Other Oil Plants	297
13.5 Final Considerations	298
References	298
14 Algae as a Potential Source of Biokerosene and Diesel – Opportunities and Challenges	303
Dominik Behrendt, Christina Schreiber, Christian Pfaff, Andreas Müller, Johan Grobbelaar and Ladislav Nedbal	
14.1 Introduction	304
14.2 Algae as an Energy Source	304
14.3 Growing Algae	311
14.4 Harvesting Algae	313
14.5 Extraction and Converting Algal Lipids into Biokerosene or Biodiesel	314
14.6 Final Considerations	315
References	319

15 Sustainability Aspects of Biokerosene 325
Benedikt Buchspies and Martin Kaltschmitt

15.1 Introduction 326

15.2 The Biokerosene Provision Chain 328

15.3 Sustainability Aspects 330

15.3.1 Environmental Dimension 331

15.3.1.1 Soil 332

15.3.1.2 Water 337

15.3.1.4 Biodiversity 343

15.3.1.5 Land Requirements 344

15.3.2 Socio-Economic Dimension 348

15.3.2.1 Minimum Fuel Selling Price 349

15.3.2.2 Competition for food, feed, fibre and fuel 351

15.3.2.3 Land Acquisition and Direct Investment 356

15.3.2.4 Other Impacts on the Socio-Economic System ... 358

15.4 Final Considerations 359

References 361

16 Direct and Indirect Land Use Change 375
Katharina Plassmann

16.1 Introduction: What Is “Land Use Change”? 375

16.2 Global Relevance of Land Use Change 376

16.2.1 Global LUC and Its Drivers 377

16.2.2 Carbon Emissions and Climate Change 378

16.2.3 Biodiversity and Ecosystem Services 379

16.3 “Direct” and “Indirect” Land Use Change in Life Cycle Assessments and Product Carbon Footprints 380

16.3.1 Life Cycle Assessments and Product Carbon Footprints 381

16.3.2 Direct LUC (dLUC) 382

16.3.3 Indirect LUC (iLUC) and Carbon Leakage 384

16.4 Land Use Change and Bioenergy 387

16.4.1 Bioenergy and dLUC 387

16.4.2 Bioenergy and iLUC 389

16.4.3 Example of a Policy Mechanism 390

16.5 Efforts to Reduce LUC 390

16.5.1 Policy Mechanisms and Public Initiatives 392

16.5.2 Private Voluntary Initiatives 393

16.5.3 Opportunities for Reducing LUC 394

16.6 Final Considerations 395

References 395

17 Sustainability Certification in the Aviation Industry 403
Andreas Feige and Lydia Pforte

17.1 Introduction - Framework for Sustainability Certification 404

17.2 Existing Sustainability Certification Schemes 405

17.3 Detailed Criteria on Environmental, Economic and Social Issues ... 412

17.3.1 Environmental Criteria.	413
17.3.2 Social Issues.	415
17.3.3 Economic Issues	417
17.4 The Sustainability Scheme International Sustainability and Carbon Certification (ISCC)	419
17.5 Final Considerations	430
References.	430

Part III Conversion Routes

18 Conversion Routes from Biomass to Biokerosene	435
Ulf Neuling and Martin Kaltschmitt	
18.1 Introduction	435
18.2 Resources for Biokerosene Production	438
18.3 Biokerosene Production Pathways.	444
18.4 HEFA	448
18.5 DSHC.	452
18.6 AtJ	455
18.7 Bio-GtL	457
18.8 BtL	460
18.9 HDCJ	462
18.10 Overall Assessment	464
18.11 Final Considerations	467
References.	469
19 Biokerosene from Vegetable Oils – Technologies and Processes	475
Ulf Neuling and Martin Kaltschmitt	
19.1 Introduction	475
19.2 Oil Provision	477
19.3 Hydroprocessed Esters and Fatty Acids (HEFA).	480
19.4 BIC-Process	486
19.5 Co-Refining	488
19.6 Final Considerations	494
References.	495
20 Biokerosene Production from Bio-Chemical and Thermo-Chemical Biomass Conversion and Subsequent Fischer-Tropsch Synthesis	497
Reinhard Rauch, Hermann Hofbauer, Ulf Neuling and Martin Kaltschmitt	
20.1 Introduction	498
20.2 Gasification/Syngas Production from Solid Biofuels	499
20.2.1 Ressource Basis	499
20.2.2 Gasifier Types	500
20.2.2.1 Heat Supply.	500
20.2.2.2 Reactor Type	501
20.2.2.3 Type of Gasification Agent	503

20.2.3	Product Gas Composition	503
20.2.3.1	Influencing Parameters	504
20.2.3.2	Requirements on the Gasification Reactor	505
20.2.4	Syngas Cleaning and Upgrading	506
20.2.4.1	Removal of Particles	508
20.2.4.2	Tar/Hydrocarbon Removal	509
20.2.4.3	Removal of Inorganic Impurities	510
20.2.4.4	Gas Conditioning	513
20.3	Bio-Methane Reforming/Syngas Production from Wet Organic Material	518
20.3.1	Resource Basis	519
20.3.2	Biogas Production	519
20.3.2.1	Basics	520
20.3.2.2	Technology	521
20.3.3	Methane Reforming	523
20.3.3.1	Steam Methane Reforming (SMR)	523
20.3.3.2	Partial Oxidation (POX)	524
20.3.3.3	Autothermal Reforming (ATR)	524
20.3.3.4	Comparison	525
20.3.4	Syngas Cleaning and Upgrading	525
20.4	Possible Fuel Synthesis Routes	526
20.4.1	Fischer-Tropsch Synthesis	526
20.4.1.1	Fischer-Tropsch Mechanism	527
20.4.1.2	Reactor Types	529
20.4.1.3	Product Distribution	532
20.4.1.4	Product Upgrading and Separation	535
20.4.2	Other Synthesis Routes	537
20.5	Final Considerations	538

Part V Experiences

28 Lufthansa Experiences Using Biokerosene	725
Alexander Zschocke	
28.1 Introduction	725
28.2 Research Conducted During the Biokerosene Use	727
28.2.1 Fuel Behavior in Storage	727
28.2.2 Flight Operations	729
28.3 Research on Aircraft Parts	731
28.3.1 Boroscopic Analyses of the Engines	731
28.3.2 Inspection of the Aircraft Fuel Tanks	732
28.3.3 Detailed Analysis of Fuel Bearing Parts	732
28.4 Research on Fueling Equipment	737
28.5 Final Considerations	739
Reference	739
29 Market Commercialization of Alternative Aviation Fuels	741
Joachim Buse	
29.1 Introduction – The Market for Kerosene	741
29.2 Price Formation in the Market	743
29.3 Price Formation in the Process Chain for Jet A-1	744
29.4 Price Formation in the Process Chain for Alternative Aviation Fuels	745
29.5 Blending Requirements	747

- 29.6 Logistics Requirements for Bio-SPK 751
 - 29.6.1 Storage at the Airport. 751
 - 29.6.2 Insurance Cover for Liability Damages. 752
 - 29.6.3 Reliability Requirements for Suppliers 753
- 29.7 Contract Design 754
- 29.8 Competition with Other Regulatory Schemes 757
- 29.9 Final Considerations 758
