	Page
1 Scope	5
2 Terms and Definitions	7
3 Selection Criteria	11
4 Specification of the Target Gas	14
5 Alarm Set Points	15
6 Monitoring Oxygen Deficiency and Excess Oxygen	16
7 Design of Fixed Gas Detection Equipment	17
7.1 Power Supply	17
7.2 Increased Availability	18
7.3 Gas Sampling	18
7.4 Installation and Maintenance Documents	19
8 Operation of Fixed Gas Detection Equipment	20
8.1 Commissioning of the Gas Detection Equipment	20
8.2 Operating Instructions	20
8.3 Alarms and Status Indications	21
8.4 Measures in the Event of Non-Availability	21
9 Maintenance of Fixed Gas Detection Equipment	22
9.1 Checks of the Gas Detection Equipment	22
9.1.1 Visual Check	22
9.1.2 Functional Check	23
9.1.3 System Check	24
9.1.4 Inspection of the Records	24
9.2 Calibration and Adjustment	25
9.3 Specification of Check Intervals	27
9.4 Repair	28
9.5 Gas Detection Equipment with Automatic Self-Test Routines	29
10 Transportable Gas Detection Equipment	30

11	Portable Gas Detection Equipment.....	31
11.1	Checks of the Gas Detection Equipment	31
11.1.1	Visual Check and Function Test	31
11.1.2	Functional Check.....	32
11.1.3	System Check.....	33
11.1.4	Inspection of the Records	34
11.2	Calibration and Adjustment.....	34
11.3	Specification of Check Intervals.....	34
11.4	Repair	35

12	Integration into Tests in Accordance with the Ordinance on Industrial Safety and Health	36
-----------	--	-----------

13	Requirements for Persons Being Charged with the Checks	37
13.1	Trained Persons	37
13.2	Qualified Personnel.....	37
13.3	Competent Persons	38
13.4	Specialists	39

Annex 1:	Example of Records for Fixed Gas Detection Equipment	40
