

Contents

Preface — vii

Notation — xi

1 Prerequisites — 1

1.1 Products of subgroups — 1

1.2 Series — 6

1.3 Solvable groups, chief factors, sylow systems, and system normalizers — 8

1.4 Supersolvable groups — 14

1.5 Nilpotent groups — 15

1.6 The Frattini and Fitting subgroups — 17

1.7 Permutable and modular subgroups — 23

1.8 Wreath products — 24

1.9 Formations — 30

2 The Schur-Zassenhaus theorem: A bit of history and motivation — 43

3 Abelian and minimal normal subgroups — 57

4 Reduction theorems — 69

5 Subgroups in the chief series, derived series, and lower nilpotent series — 79

6 Normal subgroups with abelian sylow subgroups — 91

7 The formation generation — 97

8 Groups with specific classes of subgroups complemented — 109

8.1 \mathcal{K} -groups — 109

8.2 xD -groups — 115

8.3 aC -groups — 118

8.4 nC -groups — 121

8.5 Splitting systems — 132

Bibliography — 137

Author index — 141

Subject index — 143
