## Part I Fundamentals

|          |                                                      |           |
|----------|------------------------------------------------------|-----------|
| <b>1</b> | <b>Introduction . . . . .</b>                        | <b>3</b>  |
| 1.1      | The Essence of Nuclear Physics – Energy . . . . .    | 3         |
| 1.2      | The Possible Unification of Nuclear Models . . . . . | 5         |
| <b>2</b> | <b>Atomic and Nuclear Physics . . . . .</b>          | <b>11</b> |
| 2.1      | The Atom . . . . .                                   | 13        |
| 2.2      | The Nucleus . . . . .                                | 16        |
| 2.3      | Electron Shells in Atomic Physics . . . . .          | 20        |
| 2.3.1    | Covalent Radius . . . . .                            | 24        |
| 2.3.2    | Ionic Radius . . . . .                               | 24        |
| 2.3.3    | First Ionization Energy . . . . .                    | 25        |
| 2.3.4    | Pauling's Electronegativity Scale . . . . .          | 25        |
| 2.3.5    | Phase Transitions . . . . .                          | 26        |
| 2.4      | Nucleon Shells in Nuclear Physics . . . . .          | 28        |
| 2.4.1    | Isotopes and Isotones . . . . .                      | 30        |
| 2.4.2    | Natural Abundance . . . . .                          | 31        |
| 2.4.3    | Binding Energies . . . . .                           | 32        |
| 2.4.4    | Quadrupole Moments . . . . .                         | 32        |
| 2.4.5    | Proton and Neutron Separation Energies . . . . .     | 36        |
| 2.4.6    | RMS Charge Radii . . . . .                           | 36        |
| 2.5      | Summary . . . . .                                    | 39        |
| <b>3</b> | <b>A Brief History of Nuclear Theory . . . . .</b>   | <b>43</b> |
| <b>4</b> | <b>Nuclear Models . . . . .</b>                      | <b>57</b> |
| 4.1      | The Collective Models . . . . .                      | 58        |
| 4.1.1    | The Weizsäcker Mass Formula . . . . .                | 59        |
| 4.1.2    | The Nuclear Radius . . . . .                         | 65        |
| 4.1.3    | Collective Motion . . . . .                          | 66        |
| 4.2      | The Cluster Models . . . . .                         | 67        |
| 4.2.1    | Other Cluster Models . . . . .                       | 69        |
| 4.2.2    | Pauling's Spheron Model . . . . .                    | 71        |

|       |                                              |    |
|-------|----------------------------------------------|----|
| 4.3   | The Independent-Particle Models . . . . .    | 73 |
| 4.3.1 | Manipulation of the Potential-Well . . . . . | 76 |
| 4.4   | Other Models . . . . .                       | 80 |
| 4.4.1 | Lattice Models . . . . .                     | 81 |
| 4.5   | Summary . . . . .                            | 85 |

## Part II Long-Standing Problems

|          |                                                                     |            |
|----------|---------------------------------------------------------------------|------------|
| <b>5</b> | <b>The Mean Free Path of Nucleons in Nuclei . . . . .</b>           | <b>89</b>  |
| 5.1      | Avoiding the Issue . . . . .                                        | 96         |
| 5.2      | The Persisting Problem of the MFP . . . . .                         | 98         |
| 5.3      | The Weisskopf Solution . . . . .                                    | 108        |
| 5.4      | Exclusion Principle "Correlations" . . . . .                        | 113        |
| 5.5      | Further Doubts . . . . .                                            | 117        |
| 5.6      | What Is the Pauli Exclusion Principle? . . . . .                    | 119        |
| 5.7      | Summary . . . . .                                                   | 121        |
| <b>6</b> | <b>The Nuclear Size and Shape . . . . .</b>                         | <b>123</b> |
| 6.1      | The Nuclear Density . . . . .                                       | 123        |
| 6.2      | The Nuclear Skin . . . . .                                          | 135        |
| 6.3      | The Nuclear Radius . . . . .                                        | 137        |
| 6.4      | Summary . . . . .                                                   | 138        |
| <b>7</b> | <b>The Nuclear Force and Super-Heavy Nuclei . . . . .</b>           | <b>141</b> |
| 7.1      | The Nuclear Force . . . . .                                         | 142        |
| 7.2      | Superheavy Nuclei? . . . . .                                        | 145        |
| 7.3      | Summary . . . . .                                                   | 149        |
| <b>8</b> | <b>Nuclear Fission . . . . .</b>                                    | <b>151</b> |
| 8.1      | Basic Facts of Fission . . . . .                                    | 152        |
| 8.2      | The History of Nuclear Fission . . . . .                            | 157        |
| 8.3      | Textbook Treatment of Asymmetric Fission . . . . .                  | 159        |
| 8.4      | The Empirical Data on Fission Fragments . . . . .                   | 164        |
| 8.5      | Adjusting the Nuclear Potential-Well to Produce Asymmetry . . . . . | 168        |
| 8.6      | What Needs To Be Explained? . . . . .                               | 173        |
| 8.7      | Summary . . . . .                                                   | 173        |
| <b>9</b> | <b>Low-Energy Nuclear Reactions . . . . .</b>                       | <b>175</b> |
| 9.1      | Excess Heat . . . . .                                               | 176        |
| 9.2      | Nuclear Transmutation . . . . .                                     | 176        |
| 9.3      | Changes in Isotopic Abundances of Palladium . . . . .               | 178        |
| 9.4      | The Fission of Palladium . . . . .                                  | 183        |

## Part III The Lattice Model

|           |                                                        |            |
|-----------|--------------------------------------------------------|------------|
| <b>10</b> | <b>The Lattice Model: Theoretical Issues . . . . .</b> | <b>191</b> |
| 10.1      | The Independent-Particle Model Again . . . . .         | 191        |
| 10.2      | Reproduction of the IPM in an fcc Lattice . . . . .    | 196        |

|            |                                                             |     |
