

Table of Contents

Acknowledgement.....	VII
Abstract	IX
Zusammenfassung.....	XI
List of Figures	XVI
List of Tables.....	XXIII
List of Abbreviations and Acronyms	XXV
Chapter 1 Introduction	1
1.1 Background.....	1
1.2 Problem statement	4
1.3 Hypothesis of the thesis.....	6
1.4 Objectives of the study	6
1.5 Thesis approach and the conceptual framework.....	7
1.6 Structure of the thesis	11
Chapter 2 Integrated Water Resources Management (IWRM) as a Concept	12
2.1 The concept and its guiding principles	12
2.2 The domestic water cycle and IWRM	16
2.3 The evolutionary stages of IWRM in the international agenda	17
2.4 Comparing IWRM with other integrated approaches.....	21
2.5 IWRM Implementation.....	23
2.6 Changes as indicators for a successful IWRM implementation	27
2.7 Challenges of IWRM as a concept	28
Chapter 3 : The State of Integrated Water Resources Management in Cameroon.....	31
3.1 Setting the context	31
3.2 Geographic settings	32
3.3 Socio-economic setting.....	34
3.4 Climate, hydrology and water resources	35
3.4.1 Climate types	35
3.4.2 Hydrology and water resources.....	38
3.5 National policy and legislation regarding the water sector	40
3.6 Institutional framework of the water sector.....	43
3.7 Participation in trans-boundary river basin organization	48
3.8 IWRM in Cameroon	49

Chapter 4 Study Area	52
4.1 Physical Characteristics	52
4.1.1 Site location and the population size	52
4.1.2 Hydrology and climate.....	54
4.1.3 Vegetation	61
4.1.4 Soil	62
4.2 Socioeconomic activities	62
4.3 The Far-North region as part of the Lake Chad basin	63
4.4 Local adaptation strategies	66
Chapter 5 Material and Methods	70
5.1 Background.....	70
5.2 Literature review.....	71
5.3 Field work activities	71
5.4 The DPSIR Framework as the platform for IWRM implementation	71
5.5 Survey sampling	75
5.6 Research procedure as per specific objective	76
5.6.1 Specific Objective 1: To establish a status report for IWRM in the study area.....	76
5.6.2 Specific Objective 2: To understand the domestic water consumption pattern	78
5.6.3 Specific Objective 3: To estimate water balance for the study area as defined by the European Union – Water Framework Directive (EU-WFD) 2000	80
Chapter 6 Analysis of survey questionnaires	97
6.1 Status report for IWRM in the Far-North region of Cameroon.....	97
6.1.1 Creating an enabling environment of appropriate Policies, Laws and Plans.....	97
6.1.2 Establishing governance and institutional frameworks	101
6.1.3 Progress made in applying management instruments	109
6.1.4 Progress made in developing infrastructure.....	116
6.1.5 Financing water resources management and development.....	119
6.1.6 Experts perception on key issues	126
6.1.7 Multiple uses of water resources in the Far-North region	139
6.1.8 Developmental impacts of improved water resources management.....	153
6.2 Domestic water consumption pattern and the status quo of rainwater harvesting	155
6.2.1 Domestic water consumption pattern.....	155
6.2.2 Status quo of rainwater harvesting (RWH).....	158

Chapter 7 The “großräumige Wasserhaushaltsmodell GROWA”	162
7.1 Data preparation and regionalization.....	162
7.1.1 Climate data bases.....	163
7.1.2 Land covers data	168
7.1.3 Hydrogeological data	171
7.1.4 Soil Data.....	175
7.1.5 Topography data	193
7.2 Results and discussion from the model	198
7.2.1 Real evapotranspiration	198
7.2.2 Total runoff	200
7.2.3 Direct runoff.....	202
7.2.4 Groundwater recharge.....	204
7.2.5 Model validation	205
Chapter 8 Conclusion, Recommendation and the Way Forward	207
8.1 Conclusion and recommendation	207
8.1.1 Summary on the DPSIR framework as the platform for IWRM implementation	208
8.1.2 Summary on status report for IWRM in the Far-North region	208
8.1.3 Summary for domestic water consumption pattern and the status quo of rainwater harvesting	212
8.2 The Way Forward for IWRM in the Far-North Region, Cameroon	216
Annexes	219
