

Table of Contents

Security Investments and Planning

- Design of Network Topology in an Adversarial Environment 1
Assane Gueye, Jean C. Walrand, and Venkat Anantharam
- Optimal Information Security Investment with Penetration Testing 21
Rainer Böhme and Márk Félegyházi

Privacy and Anonymity

- Tracking Games in Mobile Networks 38
*Mathias Humbert, Mohammad Hossein Manshaei,
Julien Freudiger, and Jean-Pierre Hubaux*
- gPath: A Game-Theoretic Path Selection Algorithm to Protect Tor's
Anonymity 58
Nan Zhang, Wei Yu, Xinwen Fu, and Sajal K. Das
- When Do Firms Invest in Privacy-Preserving Technologies? 72
Murat Kantarcioglu, Alain Bensoussan, and SingRu(Celine) Hoe

Adversarial and Robust Control

- Adversarial Control in a Delay Tolerant Network 87
Eitan Altman, Tamer Başar, and Veeraruna Kavitha
- Security Interdependencies for Networked Control Systems with
Identical Agents 107
Saurabh Amin, Galina A. Schwartz, and S. Shankar Sastry
- Robust Control in Sparse Mobile Ad-Hoc Networks 123
*Eitan Altman, Alireza Aram, Tamer Başar, Corinne Touati, and
Saswati Sarkar*

Network Security and Botnets

- A Game-Theoretical Approach for Finding Optimal Strategies in a
Botnet Defense Model 135
Alain Bensoussan, Murat Kantarcioglu, and SingRu(Celine) Hoe
- ISPs and Ad Networks against Botnet Ad Fraud 149
*Nevena Vratonjic, Mohammad Hossein Manshaei,
Maxim Raya, and Jean-Pierre Hubaux*

A Localization Game in Wireless Sensor Networks 168
 Nicola Gatti, Mattia Monga, and Sabrina Sicari

Effective Multimodel Anomaly Detection Using Cooperative
Negotiation 180
 Alberto Volpatto, Federico Maggi, and Stefano Zanero

Authorization and Authentication

The Password Game: Negative Externalities from Weak Password
Practices..... 192
 Sören Preibusch and Joseph Bonneau

Towards a Game Theoretic Authorisation Model 208
 Farzad Salim, Jason Reid, Uwe Dulleck, and Ed Dawson

Theory and Algorithms for Security

Disperse or Unite? A Mathematical Model of Coordinated Attack 220
 *Steve Alpern, Robbert Fokkink, Joram op den Kelder, and
 Tom Lidbetter*

Uncertainty in Interdependent Security Games..... 234
 *Benjamin Johnson, Jens Grossklags, Nicolas Christin, and
 John Chuang*

Attack–Defense Trees and Two-Player Binary Zero-Sum Extensive
Form Games Are Equivalent..... 245
 *Barbara Kordy, Sjouke Mauw, Matthijs Melissen, and
 Patrick Schweitzer*

Methods and Algorithms for Infinite Bayesian Stackelberg
Security Games (Extended Abstract) 257
 Christopher Kiekintveld, Janusz Marecki, and Milind Tambe

Author Index 267
