Preface	<i>xv</i>
Acknowledgments	<i>xvii</i>

Part One Introduction 1

1	Introduction	3
1.1	Milestones in the Development of Polymer Science	3
1.2	Basic Terms and Definitions in Polymer Science	11
1.2.1	Polymer	11
1.2.2	Monomer	12
1.2.3	End Groups	13
1.2.4	Degree of Polymerization	13
1.2.5	Copolymers	13
1.2.6	Average Molecular Weights and Distributions	14
1.2.7	Molecular Weight and Molar Mass	16
1.2.8	Polymer Morphology	17
1.2.9	Thermoplastics	17
1.2.10	Elastomers	18
1.2.11	Plastics	19
1.2.12	Thermosetting Resin	19
1.2.13	Polymer Blends	19
1.2.14	Tacticity	20
1.2.15	Polymerization and Functionality	20
1.2.16	Polymerization Processes	20
1.2.17	Addition or Chain Polymerization	21
1.2.18	Step Polymerization	23
1.2.19	Molecular Architecture	27
1.2.20	Phase	27
1.3	Bonding Opportunities in Chemistry	31
1.3.1	Primary Bonds	31
1.3.2	Typical Primary Bond Distances and Energies	32
1.3.3	Secondary Bond Forces	32
1.3.3.1	Dipole Forces	33
1.3.3.2	Hydrogen Bonds	33

- 1.3.3.3 Interrelation of Intermolecular Forces 34
- General Encyclopedias and Dictionaries 36
- References and Literature Recommendations 36

Part Two Physical Properties of Polymers 41

- 2 Flexibility of Polymer Chains and Its Origin 43**
 - 2.1 Conformational Stereoisomerism of Macromolecules 43
 - 2.2 Conformational Statistics of Chain Models 49
 - 2.3 Types of Flexibility and Their Quantitative Treatment 53
- 3 Amorphous State of Polymers 59**
 - 3.1 Characterization of State of Matter 59
 - 3.2 State of Matter and Phase Transitions of Condensed Substances. Glass Transition 61
 - 3.3 Deformation of Polymers. Three Deformational (Relaxational) States of Polymers 64
 - 3.4 Relaxation Phenomena 71
 - 3.4.1 Relaxation Phenomena in Low Molecular Weight Substances 71
 - 3.4.2 Relaxation Phenomena in High Molecular Weight Substances 72
 - 3.4.3 Time–Temperature Superposition (WLF Equation) 77
 - 3.5 Glassy State of Polymers 79
 - 3.5.1 Dependence of Glass Transition Temperature on Chemical Composition and Structure of the Polymer 79
 - 3.5.2 Peculiarities of Polymer Glasses 83
 - 3.6 High Elastic State of Polymers 85
 - 3.6.1 Molecular Kinetic Interpretation of High Elasticity 86
 - 3.6.2 Thermodynamic Interpretation of High Elasticity 87
 - 3.7 Viscous Liquid State of Polymers 88
 - 3.7.1 Molecular Mechanism of Flow. Rheology of Molten Polymers 88
 - 3.7.2 Mechanical Glassifying of Polymer Melts. Importance of Viscous Liquid State for Polymer Processing 91
 - 3.8 Mechanical Models of Linear Polymers 93
 - 3.9 Structure and Morphology of Amorphous Polymers, Polymer Melts, and Solutions 95
 - 3.10 Liquid Crystalline Polymers 98
 - References 101
- 4 Crystalline Polymers 103**
 - 4.1 Peculiarities of Crystalline Polymers. Degree of Crystallinity 103
 - 4.2 Prerequisites for Polymer Crystallization 106
 - 4.3 Kinetics and Mechanisms of Crystallization 112
 - 4.3.1 Thermodynamics of Nuclei Formation 112
 - 4.3.2 Nuclei Formation in Polymer Systems 113
 - 4.3.3 Dependence of the Rate of Nuclei Formation on Temperature 114
 - 4.4 Growth of Nuclei (Crystals) 116

4.4.1	Crystal Growth Theories	116
4.4.2	Dependence of Crystal Growth Rate on Temperature	118
4.5	Total Crystallization Rate	119
4.5.1	Mathematical Description of Phase Transition Kinetics	119
4.5.2	Basic Factors of the Total Crystallization Rate of Polymers	121
4.6	Melting and Recrystallization	124
4.6.1	Melting and Partial Melting	124
4.6.2	Thermodynamic Description of Melting Process and Melting Interval	125
4.6.3	Recrystallization	126
4.7	Morphology and Molecular Structure of Crystalline Polymers	127
4.7.1	Development of Ideas About the Morphology and Structure of Polymers	128
4.7.1.1	Structure of Crystalline Polymers in an Isotropic State	128
4.7.1.2	Structure of Crystalline Polymers in an Oriented State	131
4.7.2	Polymer Single Crystals	134
4.7.3	Spherulites	136
4.7.4	Crystalline Fibrils	138
5	Mechanics of Polymers	141
5.1	Basic Terms and Definitions	141
5.2	Nature of Neck Formation	147
5.3	Strength of Polymers and Long-term Strength	149
5.4	Polymer Failure – Mechanism and Theories	151
	Reference	155
6	Polymer Solutions	157
6.1	Development of Ideas Regarding the Nature of Polymer Solutions	157
6.2	Thermodynamics of Polymer Solutions	159
6.3	Flory–Huggins Theory	162
6.4	Concentrated Polymer Solutions. Plasticizing	164
	References	165
7	Polymer Molecular Weights	167
7.1	Types of Molecular Weights	167
7.1.1	Number-Average Molecular Weight	167
7.1.2	Weight-Average Molecular Weight	168
7.1.3	z-Average Molecular Weight	169
7.2	Polydispersity and Molecular Weight Distribution	170
7.3	Methods for Determining the Weight and Sizes of Macromolecules	172
7.3.1	Types of Methods for Molecular Weight Determination	172
7.3.2	Osmometric Determination of Molecular Weight	174
7.3.3	Molecular Weight Determination <i>via</i> Light Scattering	174
7.3.4	Diffusion Method for Molecular Weight Determination	177

7.3.5	Sedimentation Methods for the Determination of Molecular Weight and its Distribution	178
7.3.6	Viscosimetric Method for Determination of Molecular Weight	180
7.3.7	Determination of Molecular Weight and its Distribution <i>via</i> the Method of Gel Permeation Chromatography	182
7.3.8	Other Methods for Determining Molecular Weight	185
7.4	Methods for Determining the Shape and Size of Macromolecules	186
8	Methods for the Characterization and Investigation of Polymers	189
8.1	Diffraction Methods	189
8.1.1	Wide- and Small-Angle X-Ray Diffraction	190
8.1.2	Electron Diffraction	195
8.1.3	Light Diffraction	196
8.1.4	Neutron Diffraction	196
8.2	Microscopic Methods	197
8.2.1	Light Microscopy with Common and Polarized Light	198
8.2.2	Electron Microscopy (Transmission and Scanning)	199
8.2.3	Atomic Force Microscopy	203
8.3	Thermal Methods	205
8.3.1	Calorimetric Techniques for the Investigation of Polymer Structure and Transitions	205
8.3.2	Fast Scanning Calorimeter (Chip Calorimeter)	209
8.4	Spectroscopic Techniques for the Investigation of Polymer Structure and Conformational Studies of Macromolecules	210
8.5	Static and Dynamic-Mechanical Techniques	212
8.5.1	Static Techniques	212
8.5.2	Dynamic Techniques	214
8.5.3	Density Measurements	214
	References and Sources used for Part Two	217

Part Three Synthesis of Polymers 219

9	Polycondensation (Condensation Polymerization)	221
9.1	Introduction	221
9.2	Equilibrium Polycondensation	225
9.2.1	Formation of Polymer Chain	225
9.2.2	Molecular Weight Distribution in Equilibrium Polycondensation	225
9.2.3	Destructive Reactions in Equilibrium Polycondensation	227
9.2.4	Termination of Polymer Chain Growth	229
9.2.4.1	Chemical Changes in Functional Groups	230
9.2.4.2	Stoichiometric Imbalance of Monomers	231
9.2.4.3	Equilibrium Establishment Between the Polycondensation and Low Molecular Weight Products	232
9.2.5	Kinetics of Equilibrium Polycondensation	233
9.2.6	Equilibrium Copolycondensation	234
9.3	Non-equilibrium Polycondensation	235

9.3.1	General Characteristics of Non-equilibrium Polycondensation	235
9.3.2	Ways of Performing Non-equilibrium Polycondensation	236
9.3.2.1	Interphase Polycondensation	237
9.4	Polycondensation in Three Dimensions	239
	Reference	240
10	Chain Polymerization	241
10.1	Introduction	241
10.1.1	“Living” Polymerization	243
10.2	Radical Polymerization	244
10.2.1	Initiation of Radical Polymerization	244
10.2.2	Propagation (Chain Growth)	246
10.2.2.1	Bonding Types of Monomer Units	246
10.2.3	Termination of Chain Growth	249
10.2.3.1	Inactivation at a Favorable Meeting of Two Macroradicals	249
10.2.3.2	Chain Transfer	249
10.2.4	Kinetics of Radical Polymerization	251
10.2.4.1	General Kinetic Scheme of Radical Polymerization	252
10.2.4.2	Thermodynamics of Polymerization	254
10.3	Radical Copolymerization	255
10.3.1	Basic Equation of Copolymerization	256
10.3.2	Methods for Performing Radical Polymerization	258
10.3.2.1	Bulk Polymerization	259
10.3.2.2	Polymerization in Solution	259
10.3.2.3	Emulsion Polymerization	259
10.3.2.4	Suspension (Beads) Polymerization	260
10.4	Ionic Polymerization	261
10.4.1	Introduction	261
10.4.2	Cationic Polymerization	262
10.4.2.1	Initiation of Cationic Polymerization	262
10.4.2.2	Propagation (Polymer Chain Growth)	263
10.4.2.3	Termination of Polymer Chain Growth	264
10.4.2.4	Kinetics of Cationic Polymerization	265
10.4.3	Anionic Polymerization	267
10.4.3.1	Initiation of Anionic Polymerization	267
10.4.3.2	Polymer Chain Growth	268
10.4.3.3	Termination of Polymer Chain Growth	270
10.4.3.4	Kinetics of Anionic Polymerization	270
10.4.3.5	Coordination Anionic Polymerization	272
10.4.4	Ionic Copolymerization	274
10.4.4.1	Peculiarities of Ionic Copolymerization	274
10.4.5	Ring-opening Polymerization	275
	References	277
11	Synthesis of Polymers With Special Molecular Arrangements	279
11.1	Block and Graft Copolymers	279
11.1.1	Block Copolymers	279

11.1.1.1	Synthesis of Block Copolymers <i>via</i> Condensation	279
11.1.1.2	Synthesis of Block Copolymers <i>via</i> Radical Polymerization	280
11.1.1.3	Synthesis of Block Copolymers <i>via</i> Anionic Polymerization	281
11.2	Graft Copolymers	282
11.3	Stereoregular Polymers	283
11.3.1	Constitutional and Configurational Isomerism	283
11.3.2	Geometrical Isomerism	283
11.3.3	Stereoisomerism	283
11.3.4	Energy of Regular Polymer Chain Growth	285
11.3.5	Properties of Stereoregular Polymers	286
	References	287

12 Chemical Reactions with Macromolecules. New Non-traditional Methods for Polymer Synthesis 289

12.1	Introduction	289
12.2	Polymer-analogous Reactions	289
12.2.1	Solvent Effect	290
12.2.2	Effect of Neighboring Functional Groups	290
12.2.3	Effect of Molecular and Supramolecular Structure	291
12.2.4	Examples of Important Polymer-analogous Reactions	291
12.3	Polymer Destruction	293
12.3.1	Mechanical Destruction	294
12.3.2	Radio-chemical Destruction	294
12.3.3	Thermal Destruction	295
12.4	New Non-traditional Methods for Polymer Synthesis	296
12.4.1	Introduction	296
12.4.2	Atom Transfer Radical Polymerization	297
12.4.3	Reversible Addition/Fragmentation Chain Transfer	298
12.4.4	Polymer Synthesis by Click Chemistry	301
	References and Sources used for Part Three	304

Part Four Polymer Materials and Their Processing 307

13 Polymer Materials and Their Processing 309

13.1	Introduction	309
13.2	Environmental Impact Assessment	312
13.2.1	Ecological Footprint	312
13.2.2	Life Cycle Assessment	312
13.2.3	Polymer Processing	313
13.3	Fibers	313
13.3.1	Melt Spinning	313
13.3.2	Gel Spinning	314
13.4	Elastomers	315
13.4.1	Vulcanized Rubber	315
13.4.2	Thermoplastic Elastomers	316

13.5	Polymer Blends	321
13.6	Films and Sheets	322
13.6.1	Solution Casting	322
13.6.2	Melt Pressing of Film	323
13.6.3	Sinter Fabrication of Film	324
13.6.4	Melt Extrusion of Films	324
13.6.5	Bubble Blown Films	324
13.6.6	Films by Calendaring	325
13.7	Polymer Composites	325
13.7.1	Types of Composites	327
13.7.2	Long Fiber Composites: Some Theoretical Considerations	328
13.7.3	Matrices	330
13.7.4	Long Fiber Composites: Applications	332
13.8	Nanomaterials and Polymer Nanocomposites	334
13.9	Basic Problems in Polymer Science and Technology: Environmental Impact, Interfacial Adhesion Quality, Aspect Ratio	337
13.10	Polymer–Polymer and Single Polymer Composites: Definitions, Nomenclature, Advantages, and Disadvantages	338
13.11	Processing of Fiber-reinforced Composites	341
13.12	Fabrication of Shaped Objects from Polymers	342
13.12.1	Casting	342
13.12.2	Compression Molding	343
13.12.3	Injection Molding	344
13.12.4	Rotational Molding	344
13.12.5	Bag Molding	344
13.12.6	Tube Fabrication	345
	References	345
14	Polymers for Special Applications	347
14.1	Electrically Conductive Polymers	347
14.1.1	Ionic Conduction in Solid Polymers	348
14.1.2	Proton Conductors	349
14.1.3	Electronically Conducting Polymers	350
14.1.4	Optical and Electro-optical Devices	351
14.1.5	“Linear” Optical Materials	351
14.1.6	Non-linear Optical Polymers	352
14.1.7	Photovoltaic Cells	352
14.2	High-performance Thermoplastics	353
14.3	Polymers for Hydrogen Storage	355
14.4	Smart Materials	357
14.4.1	Introduction	357
14.4.2	Self-healing Polymers	358
14.4.3	Shape-memory Polymers	360
14.5	Uses of Polymers in Biomedicine	362
14.5.1	Cardiovascular Applications	363
14.5.2	Stents and Stenting	365
14.5.3	Tissue Adhesives and Artificial Skin	367

14.5.4	Bones, Joints, and Teeth	368
14.5.5	Contact Lenses and Intraocular Lenses	368
14.6	Tissue Engineering	369
14.7	Controlled Release of Drugs	372
	References and Sources for Part Four	373
