List of Figures	xv
List of Tables	xix
Abbreviations	xxi
1 Introduction	1
1.1 The Need to Alter the Performance of a Mobile Network	2
1.2 Approach of the Work	6
2 Fundamentals	9
2.1 Realistic Network Scenarios	9
2.1.1 Macroscopic View	11
2.1.2 Microscopic View	12
2.1.3 Network Topology	13
2.1.4 SiMoNe – Simulator for Mobile Networks	18
2.2 Self-Organising Network Functions	20
2.2.1 LTE Load Balancing	22
2.2.2 LTE Robustness Optimisation	23
2.2.3 LTE/WiFi Traffic Steering	24
2.3 Key Performance Indicators	25
2.3.1 Cell Load	26
2.3.2 Cell Throughput	28
2.3.3 Unsatisfied Users	28
2.3.4 Handover Success Ratio	29
2.4 Related Work	30
2.4.1 State of the Art	30
2.4.2 Open Issues and Contributions of this Work	32

3	Advanced Mobility Modelling	35
3.1	Mobility Models	37
3.1.1	Random Walk/Waypoint Mobility	38
3.1.2	Vehicular Mobility	39
3.1.3	Pedestrian Mobility	39
3.1.4	Indoor Mobility	40
3.1.5	Group/Correlated Mobility	41
3.1.6	Highway Mobility	42
3.2	Impact on the Network Performance in Realistic Network Scenarios . .	43
3.2.1	Handover Success Ratio	46
3.2.2	Handover Failure Ratio	46
3.2.3	Ping-Pong Handover Ratio	51
3.2.4	Overall Handover Performance	52
3.2.5	Other Key Performance Indicators	54
3.3	Concluding Remarks	56
4	Cell Classification and Network Simulation Scenarios	59
4.1	Cell Attributes and Classification	59
4.1.1	Cell Attribute Descriptions	60
4.1.2	Cell Attribute Determination	66
4.1.3	Cell Classification	70
4.2	Simulation Methodology and Network Evaluation Scenarios	73
4.2.1	Methodology	73
4.2.2	Scenario A: <i>Urban Location with a Normal Mobility Profile</i> . . .	75
4.2.3	Scenario B: <i>Rural Location with a Normal Mobility Profile</i> . . .	78
4.2.4	Scenario C: <i>Rural Location with a High-Speed Mobility Profile</i> .	80
4.2.5	Scenario D: <i>Large-Scale Network for Reference and Evaluation</i> .	80
4.3	Concluding Remarks	83
5	The Impact of Realistic Network Scenarios on SON Functions	87
5.1	LTE Load Balancing	89
5.2	LTE Robustness Optimisation	94
5.3	LTE/WiFi Traffic Steering	98
5.4	Concluding Remarks	100
6	Self-Organising Networks – Management and Operations	103
6.1	Examples for Operator Goals	104

6.2	Evaluation of SON Function Steering	106
6.2.1	Default SCV Settings	106
6.2.2	Managed SCV Settings	111
6.3	Evaluation of SON Function Combinations	117
6.3.1	Impact of SON Function Combinations on the KPI Behaviour	119
6.3.2	Probabilistic Combination of Different SON Functions	123
6.3.3	Improved SON Management Decisions	130
6.4	Instructions for a Mobile Network Operator	133
6.5	Concluding Remarks	136
7	Conclusions and Future Work	139
7.1	Realistic Mobile System Modelling	140
7.2	From Self-Organising to Cognitive Networks	141
7.3	The Future of Mobile Radio Communications	143
	Appendix A SON Function Configuration Values	145
	Appendix B Data Traffic Types	149
	Appendix C Simulation Scenarios	152
	Bibliography	157
