Preface — v

1 Introduction, overview, and history — 1

- 1.1 Introduction and overview — 1
 - 1.2 Historical overview — 1
 - 1.2.1 The rise of the use of oil in the late 1800s — 2
 - 1.2.2 Petroleum consumption in the early 1900s, the First World War — 2
 - 1.2.3 Petroleum consumption during the Second World War — 3
 - 1.2.4 Post-World War II plastic production — 3
 - 1.3 World petroleum production — 4
 - 1.4 World petroleum use — 4
 - 1.5 Bio-based organic chemical production — 5
- References — 5

2 Petroleum refining — 7

- 2.1 Introduction — 7
 - 2.2 Refining for fuel — 9
 - 2.2.1 Desalting — 9
 - 2.2.2 Distillation — 9
 - 2.2.3 Hydrotreating or hydroprocessing — 9
 - 2.2.4 Cracking or hydrocracking — 9
 - 2.2.5 Coking — 10
 - 2.2.6 Visbreaking — 10
 - 2.2.7 Steam cracking — 10
 - 2.2.8 Catalytic reformers — 10
 - 2.2.9 Alkylation — 11
 - 2.2.10 Removal of the natural gas fraction (the C1) — 11
 - 2.2.11 Sulfur recovery — 11
 - 2.3 Commodity chemicals — 11
 - 2.4 Monomers — 12
 - 2.5 Pollution and recycling — 12
- References — 12

3 The C1 fraction — 15

- 3.1 Introduction — 15
- 3.2 Methane — 15
- 3.3 Methanol — 16
- 3.4 Acetic acid — 17
- 3.5 Formic acid — 17

3.6	Formaldehyde — 18
3.7	CO and CO ₂ — 19
3.7.1	Carbon monoxide — 19
3.7.2	Carbon dioxide — 21
3.8	Dichloromethane — 21
3.9	Chloroform — 21
3.10	Chlorofluorocarbon compounds — 22
3.11	Hydrogen — 23
3.12	Recycling and reuse — 23
	References — 24

4	The C2 fraction — 25
4.1	Introduction — 25
4.2	Ethane — 26
4.3	Ethylene — 27
4.4	Ethylene oxide — 27
4.5	Acetaldehyde and acetic acid — 28
4.6	Ethanol — 31
4.6.1	Ethanol as fuel — 31
4.7	Acetylene — 31
4.8	Vinyl derivatives — 32
4.9	Recycling — 32
	References — 33

5	The C3 fraction — 35
5.1	Introduction — 35
5.2	Propane — 35
5.3	Propylene/propene — 35
5.4	Propylene oxide — 37
5.5	Acetone (and phenol) — 37
5.6	Isopropanol — 38
5.7	Acrolein — 39
5.8	Acrylonitrile — 40
5.9	Recycling and reuse — 41
	References — 41

6	The C4 fraction — 43
6.1	Butane — 43
6.1.1	n-Butane — 43
6.1.2	Isobutane — 43
6.2	Butadiene — 44

6.3	Monomers for rubber —	45
6.4	Recycling —	46
References —		46

7 The C5–C8 fraction — 49

7.1	Introduction —	49
7.2	Light fuels —	49
7.3	Gasoline —	49
7.3.1	Gasoline as a liquid fuel —	49
7.3.2	Gasoline additives —	50
7.4	RON and MON —	51
References —		52

8 Benzene, toluene, xylene — 53

8.1	Isolation —	53
8.2	Solvents —	53
8.3	Benzene —	53
8.3.1	Steam cracking or catalytic reforming —	54
8.3.2	Toluene hydrodealkylation —	55
8.3.3	Toluene disproportionation —	55
8.4	Fuel —	55
8.5	Ethylbenzene and styrene —	55
8.6	Cumene —	56
8.7	Cyclohexane —	57
8.8	Aniline —	58
8.9	Chlorobenzene —	59
8.10	Toluene diisocyanate —	60
8.11	Trinitrotoluene —	60
8.12	Xylene —	61
8.13	Terephthalic acid —	61
8.14	Dimethyl terephthalate —	62
8.15	Phthalic anhydride —	62
8.16	Recycling and reuse —	63
References —		63

9 The higher alkanes — 65

9.1	Introduction —	65
9.2	Fuel oil —	65
9.3	Lubricating oils —	66
9.4	Paraffin —	66
9.5	Recycling and reuse —	67
References —		68

10 Further oils and lubricants — 69

- 10.1 Polyalpha olefins — 69
- 10.2 Polyalkalene glycols — 71
- 10.3 Silicones — 72
- 10.4 Recycling and reuse — 74

References — 74

11 Fuels, biofuels — 75

- 11.1 Gasoline — 75
- 11.2 Bioethanol — 75
- 11.3 Diesel and biodiesel — 76
- 11.4 Kerosene and jet fuel — 78
- 11.5 Biobutanol — 78

References — 79

12 Polymers — 81

- 12.1 Introduction and history — 81
- 12.2 Resin identification code 1–6 — 82
 - 12.2.1 RIC 1, polyethylene terephthalate — 82
 - 12.2.2 RIC 2 and RIC 4, high-density polyethylene and low-density polyethylene — 83
 - 12.2.3 RIC 3, polyvinylchloride — 84
 - 12.2.4 RIC 5, polypropylene (PP) — 85
 - 12.2.5 RIC 6, polystyrene (PS) — 87
- 12.3 Thermoplastics — 87
- 12.4 Thermosets — 88
- 12.5 Specialty plastics — 88
- 12.6 Bio-based plastics — 89
 - 12.6.1 Polylactic acid — 89
- 12.7 Recycling — 90

References — 91

13 Naphthalene and higher polyaromatics — 93

- 13.1 Production — 93
- 13.2 Naphthalene — 93
- 13.3 Anthracene — 94
- 13.4 Anthraquinone — 95
- 13.5 Recycling and reuse — 96

References — 96

14 Coal as a source — 97

- 14.1 Introduction — 97
- 14.2 Coal gasification — 98

- 14.3 Coal liquefaction — 99
- 14.4 Recycling and reuse — 100
- References — 100

15 Pharmaceuticals — 101

- 15.1 Introduction — 101
- 15.2 Source materials — 101
- 15.3 Classifications — 102
 - 15.3.1 Top 100 prescription medications — 102
 - 15.3.2 Major over-the-counter medicines — 106
- 15.4 Development — 107
- 15.5 Production methods — 107
 - 15.5.1 Aspirin synthesis — 108
 - 15.5.2 Acetaminophen — 108
 - 15.5.3 Ibuprofen — 109
 - 15.5.4 Codeine — 110
 - 15.5.5 Morphine — 110
- 15.6 Reuse and recycling — 110
- References — 111

16 Food chemicals and food additives — 113

- 16.1 Introduction — 113
- 16.2 Vitamins — 113
 - 16.2.1 Vitamin A — 113
 - 16.2.2 Vitamin B₁ — 114
 - 16.2.3 Vitamin B₂ — 115
 - 16.2.4 Vitamin B₃ — 115
 - 16.2.5 Vitamin B₅ — 116
 - 16.2.6 Vitamin B₆ — 117
 - 16.2.7 Vitamin B₇ — 117
 - 16.2.8 Vitamin B₉ — 118
 - 16.2.9 Vitamin B₁₂ — 118
 - 16.2.10 Vitamin C — 120
 - 16.2.11 Vitamin D — 121
 - 16.2.12 Vitamin E — 121
 - 16.2.13 Vitamin K — 122
 - 16.2.14 Vitamin F — 122
 - 16.2.15 Vitamin uses — 123
- 16.3 Food additives — 124
 - 16.3.1 Food coloring — 125
 - 16.3.2 Flavor enhancers — 128
 - 16.3.3 Preserving freshness — 130
 - 16.3.4 Enhancing mouth feel — 131

16.3.5	Inorganic additives —	132
16.4	Food additive production —	133
16.5	Recycling or reuse —	133
References —		133

17	Agrochemicals —	135
17.1	Introduction —	135
17.2	Ammonia —	135
17.3	Ammonia-based fertilizers —	136
17.3.1	Ammonium nitrate —	136
17.3.2	Urea —	137
17.3.3	Ammonium sulfate —	137
17.3.4	Mixed fertilizers —	138
17.4	Pesticides —	138
17.4.1	Herbicides —	139
17.4.2	Insecticides —	140
17.5	Reuse and recycling —	141
References —		142
