Preface — vii

Introduction — 1

Part I: Basics

1 Model examples — 5

- 1.1 Noncommutative tori — 5
 - 1.1.1 Geometric definition — 5
 - 1.1.2 Analytic definition — 6
 - 1.1.3 Algebraic definition — 7
 - 1.1.4 Abstract noncommutative torus — 7
 - 1.1.5 First properties of the $\mathcal{A}_\theta$ — 8
- 1.2 Elliptic curves — 9
 - 1.2.1 Weierstrass and Jacobi normal forms — 9
 - 1.2.2 Complex tori — 10
 - 1.2.3 Weierstrass uniformization — 11
 - 1.2.4 Complex multiplication — 11
- 1.3 Functor $\mathcal{E}_\tau \rightarrow \mathcal{A}_\theta$ — 12
- 1.4 Ranks of elliptic curves — 15
 - 1.4.1 Symmetry of complex and real multiplication — 15
 - 1.4.2 Arithmetic complexity of the $\mathcal{A}_{\text{RM}}$ — 15
- 1.5 Classification of surface automorphisms — 17
 - 1.5.1 Anosov automorphisms — 17
 - 1.5.2 Functor F — 18
 - 1.5.3 Handelman's invariant — 19
 - 1.5.4 Module determinant — 19
 - 1.5.5 Numerical examples — 20

2 Categories and functors — 23

- 2.1 Categories — 23
- 2.2 Functors — 26
- 2.3 Natural transformations — 28

3 C^* -algebras — 31

- 3.1 Basic definitions — 31
- 3.2 Crossed products — 33
- 3.3 K -theory of the C^* -algebras — 35

3.4	Noncommutative tori —	39
3.4.1	The n -dimensional noncommutative torus —	39
3.4.2	The 2-dimensional noncommutative torus —	40
3.5	AF-algebras —	42
3.5.1	Generic AF-algebras —	42
3.5.2	Stationary AF-algebras —	45
3.6	UHF-algebras —	46
3.7	Cuntz–Krieger algebras —	48

Part II: Noncommutative invariants

4	Topology —	53
4.1	Classification of the surface automorphisms —	53
4.1.1	Pseudo-Anosov automorphisms of a surface —	53
4.1.2	Functors and invariants —	55
4.1.3	Jacobian of measured foliations —	57
4.1.4	Equivalent foliations —	59
4.1.5	Proofs —	60
4.1.6	Anosov maps of the torus —	65
4.2	Torsion in the torus bundles —	68
4.2.1	Cuntz–Krieger functor —	68
4.2.2	Proof of Theorem 4.2.1 —	69
4.2.3	Noncommutative invariants of torus bundles —	71
4.3	Obstruction theory for Anosov’s bundles —	72
4.3.1	Fundamental AF-algebra —	72
4.3.2	Proofs —	75
4.3.3	Obstruction theory —	80
4.4	Cluster C^* -algebras and knot polynomials —	83
4.4.1	Invariant Laurent polynomials —	84
4.4.2	Birman–Hilden theorem —	85
4.4.3	Cluster C^* -algebras —	86
4.4.4	Jones and HOMFLY polynomials —	88
4.4.5	Proof of Theorem 4.4.1 —	89
4.4.6	Examples —	95
5	Algebraic geometry —	101
5.1	Elliptic curves —	101
5.1.1	Noncommutative tori via Sklyanin algebras —	102
5.1.2	Noncommutative tori via measured foliations —	107

5.2	Algebraic curves of genus $g \geq 1$ — 111
5.2.1	Toric AF-algebras — 112
5.2.2	Proof of Theorem 5.2.1 — 113
5.3	Projective varieties of dimension $n \geq 1$ — 117
5.3.1	Serre C^* -algebras — 118
5.3.2	Proof of Theorem 5.3.4 — 120
5.3.3	Example — 124
5.4	Tate curves and UHF-algebras — 126
5.4.1	Elliptic curve over p -adic numbers — 126
5.4.2	Proof of Theorem 5.4.1 — 126
5.4.3	Example — 130
5.5	Mapping class group — 131
5.5.1	Harvey's conjecture — 131
5.5.2	Proof of Theorem 5.5.1 — 132
6	Number theory — 137
6.1	Isogenies of elliptic curves — 137
6.1.1	Symmetry of complex and real multiplication — 138
6.1.2	Proof of Theorem 6.1.1 — 139
6.1.3	Proof of Theorem 6.1.2 — 142
6.1.4	Proof of Theorem 6.1.3 — 144
6.2	Ranks of elliptic curves — 148
6.2.1	Arithmetic complexity of $\mathcal{A}_{\text{RM}}$ — 149
6.2.2	Mordell AF-algebra — 149
6.2.3	Proof of Theorem 6.2.1 — 150
6.2.4	Numerical examples — 154
6.3	Transcendental number theory — 155
6.3.1	Algebraic values of $\mathcal{J}(\theta, \varepsilon) = e^{2\pi i \theta + \log \log \varepsilon}$ — 156
6.3.2	Proof of Theorem 6.3.1 — 156
6.4	Class field theory — 159
6.4.1	Hilbert class field of a real quadratic field — 159
6.4.2	AF-algebra of the Hecke eigenform — 161
6.4.3	Proof of Theorem 6.4.1 — 162
6.4.4	Examples — 165
6.5	Noncommutative reciprocity — 167
6.5.1	L -function of noncommutative tori — 167
6.5.2	Proof of Theorem 6.5.1 — 168
6.5.3	Supplement: Größencharacters, units and $\pi(n)$ — 174
6.6	Langlands conjecture for the $\mathcal{A}_{\text{RM}}^{2n}$ — 176
6.6.1	$L(\mathcal{A}_{\text{RM}}^{2n}, s)$ — 177
6.6.2	Proof of Theorem 6.6.1 — 180
6.6.3	Supplement: Artin L -function — 182

6.7	Projective varieties over finite fields —	184
6.7.1	Traces of Frobenius endomorphisms —	184
6.7.2	Proof of Theorem 6.7.1 —	186
6.7.3	Examples —	190

Part III: Brief survey of NCG

7	Finite geometries —	199
7.1	Axioms of projective geometry —	199
7.2	Projective spaces over skew fields —	200
7.3	Desargues and Pappus axioms —	201
8	Continuous geometries —	203
8.1	W^* -algebras —	203
8.2	Von Neumann geometry —	205
9	Connes geometries —	207
9.1	Classification of type III factors —	207
9.1.1	Tomita–Takesaki theory —	207
9.1.2	Connes invariants —	208
9.2	Noncommutative differential geometry —	209
9.2.1	Hochschild homology —	209
9.2.2	Cyclic homology —	210
9.2.3	Novikov conjecture for hyperbolic groups —	211
9.3	Connes' index theorem —	211
9.3.1	Atiyah–Singer theorem for families of elliptic operators —	212
9.3.2	Foliated spaces —	212
9.3.3	Index theorem for foliated spaces —	213
9.4	Bost–Connes dynamical system —	214
9.4.1	Hecke C^* -algebra —	215
9.4.2	Bost–Connes theorem —	215
10	Index theory —	217
10.1	Atiyah–Singer theorem —	217
10.1.1	Fredholm operators —	217
10.1.2	Elliptic operators on manifolds —	218
10.1.3	Index theorem —	219
10.2	K -homology —	220
10.2.1	Topological K -theory —	220
10.2.2	Atiyah's realization of K -homology —	222
10.2.3	Brown–Douglas–Fillmore theory —	223

10.3	Kasparov's KK -theory —	224
10.3.1	Hilbert modules —	224
10.3.2	KK -groups —	225
10.4	Applications of index theory —	226
10.4.1	Novikov conjecture —	227
10.4.2	Baum–Connes conjecture —	228
10.4.3	Positive scalar curvature —	229
10.5	Coarse geometry —	230
11	Jones polynomials —	233
11.1	Subfactors —	233
11.2	Braids —	234
11.3	Trace invariant —	236
12	Quantum groups —	239
12.1	Manin's quantum plane —	239
12.2	Hopf algebras —	241
12.3	Operator algebras and quantum groups —	242
13	Noncommutative algebraic geometry —	243
13.1	Serre isomorphism —	244
13.2	Twisted homogeneous coordinate rings —	245
13.3	Sklyanin algebras —	246
14	Trends in noncommutative geometry —	249
14.1	Derived categories —	249
14.2	Noncommutative thickening —	250
14.3	Deformation quantization of Poisson manifolds —	251
14.4	Algebraic geometry of noncommutative rings —	252
	References —	253
	Index —	261
