

Contents

Preface — V

List of abbreviations — IX

1 Introduction — 1

- 1.1 Introduction to Cell Biology and Cell Communication — 1
- 1.2 Nanoscale Actors and Their Properties — 6
- 1.3 Nanoscale Reactions — 25
- 1.4 The Brain and the Functioning of Nerve Cells — 31
- 1.5 Machines and Computers on the Microscale and Nanoscale — 38
- 1.6 Detection Methods — 40
- 1.7 Sensor Elements — 41

2 Movement — 43

- 2.1 Human Movement and Muscles on the Molecular Scale — 43
- 2.2 Movement Using Biological Molecules and Methods — 49
- 2.3 Biomimetic Movement — 52
- 2.4 Summary and the Bigger Picture — 52

3 Vision — 56

- 3.1 Human Vision on the Molecular Scale — 56
- 3.2 Photosensors Using Biological Molecules and Methods — 56
- 3.3 Biomimetic Photosensors — 59
- 3.4 Summary and the Bigger Picture — 62

4 Smell and Taste — 64

- 4.1 Human Smell and Taste on the Molecular Scale — 64
- 4.2 Chemical Sensors Using Biological Cells, Molecules, and Methods — 65
- 4.3 Biomimetic Chemical Sensors — 71
- 4.4 Summary and the Bigger Picture — 74

5 Hearing — 76

- 5.1 Human Hearing on the Molecular Scale — 76
- 5.2 Vibration Sensors Using Biological Cells, Molecules, and Methods — 80
- 5.3 Biomimetic Acoustic Sensors — 82
- 5.4 Summary and the Bigger Picture — 85

VIII — Contents

6	Skin, The Body's Largest Organ — 86
6.1	Human Skin on the Molecular Scale — 86
6.2	Chemical Sensors Using Biological Cells, Molecules, and Methods — 94
6.3	Biomimetic Temperature and Pressure Sensors — 95
6.4	Summary and the Bigger Picture — 100
7	Future Developments — 103
Index	— 105
