Introduction *xxix*

Volume 1

Part One Pros and Cons of Inkjet Technology 1

- 1 Pros and Cons of Inkjet Technology in Industrial Inkjet Printing 3
Werner Zapka
- 2 Comparing Inkjet with Other Printing Processes and Mainly Screen Printing 7
Gunter Huebner
 - 2.1 Comparing Inkjet with Screen Printing 11
 - 2.2 Screen Printing Principles and Capabilities 13
 - 2.3 Variants of Screen Printing Techniques 14
 - 2.4 Controlling Layer Thickness 16
 - 2.5 Achievable Resolution 17
 - 2.6 Application Examples 18
 - 2.6.1 Printed Antennae 18
 - 2.6.2 Printed Batteries 18
 - 2.6.3 Fine Line Printing 19
 - 2.7 Conclusion and Further Sources of Information 20
 - References 21

Part Two Inks 23

- 3 A System Approach to Develop New Platforms of Industrial Inkjet Inks 25
Mark Bale
 - 3.1 Introduction 25
 - 3.2 Ink Technologies for Industrial Inkjet 26
 - 3.2.1 Aqueous 27

3.2.2	Solvent	28
3.2.3	Oil	29
3.2.4	Hot Melt	30
3.2.5	Energy-Curable	30
3.2.6	Hybrids	31
3.2.7	Choosing an Ink Type	31
3.3	Ink Characterization Methods	31
3.3.1	Overview of Fluid Measurements	33
3.3.1.1	Viscosity	33
3.3.1.2	Surface Tension	33
3.3.1.3	Particle Size	33
3.3.1.4	Sedimentation	34
3.3.1.5	Other Properties	35
3.3.2	Examples of Dried Ink Evaluation	36
3.3.2.1	Color	36
3.3.2.2	Adhesion	36
3.3.2.3	Mechanical Resistance	37
3.3.2.4	Fluid Resistance/Compatibility	37
3.3.2.5	Weathering and Other Stress Tests	37
3.4	Printhead Evaluation	38
3.4.1	Equipment	38
3.4.1.1	Ink Supply	38
3.4.1.2	Drop Viewing	39
3.4.2	Drop Visualization in Practice	39
3.4.2.1	Drop Velocity Determination	40
3.4.2.2	Waveform Basics	40
3.4.2.3	Frequency Dependence	41
3.4.3	Jetting Sustainability	42
3.4.3.1	Manual Methods	42
3.4.3.2	Automated Methods	43
3.4.4	Nozzle Latency/Open Time	43
3.5	Print Process Factors	44
3.5.1	Surface Wetting	44
3.5.1.1	Contact Angle Testing	45
3.5.1.2	Pretreatment	45
3.5.1.3	Print Evaluation Methods	46
3.5.2	Ink–Ink Interactions	47
3.5.3	Drying Considerations	47
3.6	Case Study: Hybrid Aqueous–UV	48
3.6.1	Ink Concept Introductions	48
3.6.2	Head Interactions: Latency	49
3.6.2.1	Head Design Comparisons	49
3.6.2.2	Influence of Waveform	51
3.6.2.3	Ink Recirculation	51
3.6.2.4	Managing Nozzle Health	53
3.6.3	Head Interactions: Sustainability	54
3.6.4	Substrate Interactions	55

3.6.4.1	Substrate and Ink Comparisons	55
3.6.4.2	Print Process Factors	56
3.6.5	Outlook	56

Part Nine Printing Strategies 579

- 34 Turning Industrial Application Requirements into Real Solutions 581**
Timothy N. Rosario
- 34.1 Application Development 581
- 34.2 Productivity 582
- 34.3 Single-Pass Printing 583
- 34.3.1 Introduction 583
- 34.3.2 Drop Size Requirement 583
- 34.3.3 Drop Placement 585
- 34.3.4 Placement Error in X 585
- 34.3.5 Placement Error in Y 587
- 34.4 Imaging Models 589
- 34.5 High Standoff Printing 591
- 34.6 Summary 596
- References 597

Part Ten Application Development 599

- 35 Inkjet Printing for Printed Electronics 601**
Pit Teunissen, Robert Abbel, Tamara Eggenhuizen, Michiel Coenen, and Pim Groen
- 35.1 Technology 601
- 35.1.1 Introduction 601
- 35.1.2 Production Upscaling 602
- 35.2 Application Examples 605
- 35.2.1 Printed Smart Card 605
- 35.2.2 Inkjet Printing of the Bezel in Touch Panels 606
- 35.2.3 Multilayer IJP for Smart Labels 609
- 35.2.4 Inkjet Printed Organic Photovoltaics 610
- 35.2.5 Inkjet Printing of Two-Colored Organic Light-Emitting Diodes 613
- 35.3 Conclusions 614
- References 615
- 36 Inkjet-Printed Metal Lines and Sensors on 2D and 3D Plastic Substrates 617**
Polzinger Bernhard, Keck Jürgen, Eberhardt Wolfgang, and Zimmermann André
- 36.1 Introduction 617
- 36.2 Inkjet Printing of Metal Lines on Injection-Molded Substrates 618
- 36.2.1 Printing Results 618
- 36.2.2 Resistance 619
- 36.2.3 Adhesion 619
- 36.3 Electrical Connection of Printed Metal Lines 620
- 36.3.1 Overprinting of Contact Pads 620
- 36.3.2 Spring Contacts 621

36.3.3	Soldering	621
36.3.4	Isotropic Conductive Adhesive	622
36.4	Inkjet Printing of Metal Lines on 3D Surfaces	622
36.5	Sensors on Injection-Molded Thermoplastic Substrates	624
36.5.1	Temperature Sensor	624
36.5.2	Stress Sensor	625
36.5.3	Touch Sensor	626
