

Contents

1. Relevant Magnetic Resonance Imaging Techniques	2
<i>M. Vahlensieck, F. Traeber, and J. Gieseke</i>	
1.1 Introduction	2
1.1.1 Longitudinal and Transverse Magnetization	2
1.1.2 Measurement Time	2
1.1.3 Spatial Assignment	2
1.1.4 Sequence	2
1.2 Spin-Echo Sequence	2
1.2.1 T1 Contrast	2
1.2.2 Proton Density-Weighted Image Contrast	2
1.2.3 T2 Contrast	2
1.3 Turbo/Fast Spin-Echo Sequence	2
1.4 Gradient-Echo Technique	4
1.5 Ultrafast Magnetic Resonance Imaging Techniques	6
1.6 Fat Suppression	6
1.6.1 Chemical-Selective Saturation	6
1.6.2 Chopper-Dixon Method	7
1.6.3 Modified Dixon Technique	7
1.6.4 Short-Tau Inversion Recovery	7
1.6.5 Water Excitation	7
1.7 Contrast Media and Contrast Dynamic Enhancement	9
1.8 Magnetic Resonance Arthrography	9
1.8.1 Direct Magnetic Resonance Arthrography	9
1.8.2 Indirect Magnetic Resonance Arthrography	9
1.9 Cartilage Imaging and Parameter Maps (Quantitative Magnetic Resonance Imaging) ...	11
1.10 Magnetization Transfer Contrast	11
1.11 Diffusion-Weighted Imaging and Diffusion-Weighted Body Suppression	13
1.12 Magnetic Resonance Angiography	13
1.12.1 Gated-Inflow Technique	13
1.12.2 Phase Contrast Angiography	14
1.12.3 Contrast Angiography	14
1.13 Relaxometry	14
1.14 Three-Dimensional Reconstruction	14
1.15 Multiplanar Reformatting	15
1.16 Radial Acquisition	16
1.17 Spectroscopy and Spectroscopic Imaging	16
1.17.1 Hydrogen Spectroscopy	16
1.17.2 Phosphorus Spectroscopy	19
1.17.3 Carbon Spectroscopy	21
1.18 Cinematic Examinations	21
1.18.1 Cine Mode	21
1.18.2 Very Fast Sequences	21
1.19 Magnetic Resonance Myelography	21
1.20 Magnetic Resonance Neurography	21
1.21 Magnetic Resonance Imaging of Prostheses ...	21
2. The Spine	28
<i>K.M. Friedrich and M. Breitenseher</i>	
2.1 Imaging	28
2.1.1 Indications	28
2.1.2 Hardware	28
2.1.3 Examination Protocols	28
2.2 Anatomy and Physiology	30
2.2.1 Bone Marrow and Osseous Elements	30
2.2.2 Neuroforamina	37
2.2.3 Intervertebral Disks	39
2.2.4 Ligaments	39
2.2.5 Dural Sac, Spinal Cord, and Spinal Nerves	39
2.2.6 Imaging Artefacts	41
2.3 Degenerative Conditions of the Spine	41
2.3.1 Bone and Bone Marrow Changes along the Vertebral Body End Plates	41
2.3.2 Intervertebral Disk Changes	44
2.3.3 Changes to the Zygapophysial Joints	47
2.4 Spondylitis and Spondylodiscitis	49
2.4.1 Pyogenic and Specific Spondylitis	52
2.4.2 Rheumatoid Arthritis	53
2.4.3 Seronegative Spondyloarthropathy	55
2.5 Posttraumatic Spinal Changes	56
2.5.1 Posttraumatic Changes to the Intervertebral Disks and Ligaments	56
2.5.2 Posttraumatic Bone Changes	59
2.5.3 Posttraumatic Changes to the Spinal Canal	62
2.6 Postoperative Spinal Changes	65
2.6.1 The Postoperative Intervertebral Disk	65
2.6.2 The Postoperative Bony Spine	69
2.7 Tumors of the Spine	71
2.7.1 Development of Spinal Tumors	71
2.7.2 Localization of Tumors	72

2.7.3	Common Benign Tumors and Tumorlike Lesions	72	2.8	Clinical Significance of Magnetic Resonance Imaging	78
2.7.4	Common Malignant Primary Tumors	74	2.8.1	Acknowledgment	80
2.7.5	Common Malignant Secondary Tumors	76			
3.	The Shoulder	84			
	<i>M. Vahlensieck and C. Pfirrmann</i>				
3.1	Introduction	84	3.9	Disorders of the Synovial Lining and Joint Capsule	122
3.2	Examination Technique	84	3.9.1	Arthritis	122
3.2.1	Patient Positioning	84	3.9.2	Pigmented Villonodular Synovitis and Hemophilia	123
3.2.2	Coil Selection	84	3.9.3	Synovial Chondromatosis	123
3.2.3	Sequences and Parameters	84	3.9.4	Lipoma Arborescens	124
3.2.4	Special Imaging Techniques	85	3.9.5	Amyloid Arthropathy	124
3.3	Anatomy	87	3.9.6	Adhesive Capsulitis (Frozen Shoulder)	124
3.3.1	General Anatomy	87	3.10	Bone Disorders	124
3.3.2	Specific Magnetic Resonance Anatomy and Variants	87	3.10.1	Aseptic Osteonecrosis	124
3.4	Disorders of the Rotator Cuff	94	3.10.2	Impression Fractures of the Humeral Head	125
3.4.1	Impingement	94	3.10.3	Avulsion Injuries	127
3.4.2	Lesions of the Tendon Insertion (Insertion Tendinopathy, Rim Rent Lesions)	101	3.10.4	Distal Clavicle Edema	127
3.5	Disorders of the Proximal Biceps Tendons	102	3.10.5	Shoulder Arthrosis (Omarthrosis)	127
3.5.1	Tendinitis	102	3.10.6	Stress Reaction	128
3.5.2	Tears	104	3.10.7	Tubercle Cysts	129
3.5.3	Pulley Lesions	105	3.10.8	Congenital Malformations	129
3.5.4	Chondromatosis and Osteochondromatosis	106	3.11	Disorders of the Acromioclavicular Joint	129
3.6	Disorders of the Remaining Muscles (Including the Sequelae of Nerve Compression Syndrome)	107	3.12	Disorders of the Sternoclavicular Joint	130
3.6.1	Atrophy	107	3.13	Tumors of the Shoulder	130
3.6.2	Insertion Tendinopathy	108	3.14	Post-Therapy Findings	131
3.6.3	Fibrosis	108	3.14.1	Injection	131
3.6.4	Muscle Fiber Tear	109	3.14.2	Shock Wave Lithotripsy	131
3.7	Disorders of the Bursae	109	3.14.3	Surgical Procedures	131
3.7.1	Subacromial-Subdeltoid Bursa	109	3.15	Pitfalls in Interpreting the Images	136
3.7.2	Subcoracoid Bursa	110	3.15.1	Misinterpretation of Increased Signal Intensity	136
3.8	Disorders and Instability of the Glenoid Labrum and Capsular Ligaments	110	3.15.2	Misinterpreting Normal Variants	136
3.8.1	Traumatic Lesions	110	3.15.3	Misinterpretation of an Effusion	137
3.8.2	Habitual Shoulder Dislocation	121	3.15.4	Misinterpretation of Bone Marrow Distribution	137
3.8.3	Labral Cysts	122	3.15.5	Misinterpretation of a Persistent Acromion Ossification Center	137
4.	The Elbow	146	3.15.6	Misinterpretation of Muscle Insertions into Bone	138
	<i>M. Vahlensieck and M. D'Anastasi</i>		3.16	Clinical Relevance of Magnetic Resonance Imaging	138
4.1	Introduction	146			
4.2	Examination Technique	146	4.3.5	Recess and Bursae	155
4.2.1	Patient Positioning	146	4.3.6	Nerves	155
4.2.2	Coils	146	4.3.7	Blood Vessels	156
4.2.3	Planes and Sequences	146	4.4	Epicondylitis	158
4.3	Anatomy	149	4.4.1	Epicondylitis of the Radial Humerus	158
4.3.1	Ligaments	149	4.4.2	Epicondylitis of the Ulnar Humerus	158
4.3.2	Muscles and Tendons	152	4.5	Lesions of the Collateral Ligaments	159
4.3.3	Bones	154	4.5.1	Ulnar Collateral Ligament	159
4.3.4	Joint Cartilage	155	4.5.2	Radial Collateral Ligament	160
			4.5.3	Annular Ligament	161

4.6	Distal Biceps Tendon Rupture	161	4.13	Cartilage Damage	168
4.7	Rupture of the Triceps Tendon	161	4.14	Plicae	168
4.7.1	Insertion Tendinopathy of the Triceps Tendon	161	4.15	Bursitis	168
4.7.2	Snapping Triceps	161	4.16	Neuropathies	168
4.8	Traumatic Lesions	162	4.17	Neoplasms and Neoplasmlike Changes	171
4.9	Arthrosis	163	4.18	Posttherapy Findings	173
4.10	Apophysitis	165	4.19	Potential Sources of Mistakes When Interpreting Images	173
4.11	Osteochondritis	166	4.20	Clinical Relevance of Magnetic Resonance Tomography	173
4.11.1	Osteochondritis Dissecans	166			
4.11.2	Panner's Disease	167			
4.11.3	Loose Joint Bodies	168			
4.12	Radioulnar Synostosis	168			
5.	The Wrist and Fingers	182			
	<i>M. Vahlensieck and M. Richter</i>				
5.1	Examination Technique	182	5.11.2	Guyon's Canal	211
5.1.1	Patient Positioning	182	5.11.3	Bowling Thumb	212
5.1.2	Coil Selection	182	5.11.4	Wartenberg's Syndrome	212
5.1.3	Sequences and Parameters	182	5.12	Tumors	212
5.2	Anatomy	182	5.12.1	Subungual Tumors	212
5.2.1	General Anatomy of the Carpal Rows	182	5.12.2	Giant Cell Tumors of the Tendon Sheath	213
5.2.2	Special Magnetic Resonance Anatomy	186	5.12.3	Rheumatoid Nodules	214
5.3	Spontaneous Avascular Necrosis	191	5.13	Ganglion Cysts and Other Cysts	214
5.3.1	Avascular Necrosis of the Lunate (Kienböck's Disease)	191	5.13.1	Ganglion Cysts	214
5.3.2	Spontaneous Avascular Necrosis of the Scaphoid (Preiser's Disease, Köhler-Mouchet's Disease)	194	5.13.2	(Pure) Cysts	216
5.4	Ulnocarpal Impaction Syndrome	194	5.14	Disorders of the Synovial Membranes Including Chronic Polyarthritis	217
5.5	Ulnar Impingement Syndrome	196	5.15	Disorders of Tendons	218
5.6	Hamatolunate Impingement	197	5.15.1	The Radial Wrist	219
5.7	Arthrosis (Osteoarthritis)	197	5.15.2	The Dorsoradial Wrist	219
5.8	Carpal Coalition	198	5.15.3	Distal Dorsoradial Forearm	219
5.9	Traumatic Lesions of the Carpal Bones	199	5.15.4	The Ulnar Wrist	220
5.9.1	Bone Contusion (Bone Bruise) and Occult Fracture	199	5.15.5	Flexor Tendons	220
5.9.2	Fracture	200	5.16	Palmar Fibromatosis (Dupuytren's Disease)	220
5.9.3	Dislocation and Subluxation	200	5.17	Examples of Vascular Diseases	220
5.9.4	Traumatic Lesions and Findings of the Postoperative Scaphoid	200	5.18	Pitfalls in Interpreting Images	221
5.10	Diseases of the Ligaments	205	5.18.1	Incorrect Positioning of the Wrist	221
5.10.1	Interosseous (Intrinsic) Ligaments	205	5.18.2	Vascular Variants	221
5.10.2	Capsular Ligaments of the Wrist (Extrinsic Ligaments)	206	5.18.3	Accessory Muscles and Muscles of Variant Locations	223
5.10.3	Collateral and Annular Ligaments of Fingers	208	5.18.4	Chemical Shift Artefact	224
5.10.4	Triangular (Ulnar) Fibrocartilage Complex	208	5.18.5	Magic Angle Phenomenon	224
5.11	Nerve Compression Syndrome	209	5.18.6	Bone Variants	225
5.11.1	Carpal Tunnel	209	5.18.7	Carpe Bossu	225
			5.18.8	Dorsal and Palmar Entry Points for Nutrient Vessels in the Carpal Bones	225
			5.18.9	Flexor Tendon Sheaths of the Wrist and Hand	226
			5.19	Clinical Relevance of Magnetic Resonance Imaging	226

6. The Hip and Pelvis	234		
<i>M. Notohamiprodjo and M. Vahlensieck</i>			
6.1 Introduction	234	6.13 Early-Onset Osteoarthritis and Arthrosis	261
6.2 Examination Technique	234	6.14 Inflammatory Diseases	262
6.2.1 Patient Positioning	234	6.14.1 Osteomyelitis and Septic Arthritis	262
6.2.2 Coil Selection	234	6.14.2 Rheumatoid Arthritis	264
6.2.3 Sequences and Parameters	234	6.15 Diseases of the Capsule and Synovial Membranes	266
6.3 Anatomy	236	6.15.1 Synovial Osteochondromatosis	266
6.4 Avascular Necrosis of the Femoral Head	238	6.15.2 Synovial Folds (Plicae and Retinacula)	266
6.5 Transient Osteoporosis	242	6.16 Amyloid Arthropathy	267
6.6 Perthes' Disease	243	6.17 Insertional Tendinopathy (Enthesopathy)	267
6.7 Slipped Capital Femoral Epiphysis	246	6.17.1 Insertional Tendinopathy of the Gluteal Tendons ..	268
6.8 Hip Dysplasia	251	6.17.2 Insertional Tendinopathy of the Tendons of the Knee Flexor Group of Muscles	269
6.8.1 Hip Dysplasia in Neonates and Small Children (Congenital Hip Displacement)	251	6.17.3 Rare Types of Hip Enthesopathy	270
6.8.2 Hip Dysplasia in Adults	251	6.18 Snapping Hip (Coxa Saltans)	270
6.9 Trauma, Stress, and Fatigue Fractures	251	6.19 Neurovascular Compression Syndrome	270
6.9.1 Posttraumatic Fractures	251	6.20 Tumors	270
6.9.2 Stress and Fatigue Fractures	252	6.21 Pigmented Villonodular Synovitis	270
6.10 Impingement	254	6.22 Pitfalls in Interpreting the Images	271
6.10.1 Cam Impingement	254	6.22.1 Hematopoietic Bone Marrow	271
6.10.2 Pincer Impingement	254	6.22.2 Transcortical Synovial Herniation	271
6.10.3 Other Types of Impingement	256	6.22.3 Supra-acetabular Fossa	272
6.11 Lesions of the Acetabular Labrum	257	6.22.4 Bursitis	272
6.11.1 Anatomic Variants	258	6.22.5 Accessory Iliacus Tendon	272
6.11.2 Labral Tears	259	6.23 Clinical Relevance of Magnetic Resonance Imaging	276
6.12 Degenerative Ligamentum Teres of the Femoral Head	261		
7. The Knee	282		
<i>M. Vahlensieck and A. Hornig</i>			
7.1 Introduction	282	7.5.1 Anterior Cruciate Ligament Acute Tear	301
7.2 Examination Technique	282	7.5.2 Posterior Cruciate Ligament	306
7.2.1 Patient Positioning and Coil Selection	282	7.5.3 Postoperative Changes to the Cruciate Ligaments ...	307
7.2.2 Sequences and Parameters	282	7.6 Collateral Ligament Injuries	310
7.3 Anatomy	282	7.6.1 Medial Collateral Ligament Injuries	310
7.3.1 General Anatomy	282	7.6.2 Lateral Collateral Ligament Injuries	311
7.3.2 Specific Magnetic Resonance Imaging Anatomy	284	7.7 Lateral Capsular Ligament Injuries, Including Popliteus Injuries	311
7.4 Meniscal Lesions	290	7.8 Iliotibial Tract (Band) Syndrome	311
7.4.1 Degenerative Changes and Tears	290	7.9 Dyskinesia of the Femoropatellar Joint and Patellar Dislocation	312
7.4.2 Postoperative Changes	297	7.9.1 Impaired Gliding Function	312
7.4.3 Variant Discoid and Ring Meniscus	298	7.9.2 Patellar Dislocation	314
7.4.4 Parameniscal Cysts	299	7.10 Patellar and Quadriceps Tendonitis	315
7.4.5 Meniscal Ossification and Calcification	300		
7.4.6 Meniscal Subluxation (Extrusion)	301		
7.5 Cruciate Ligament Injuries	301		

7.11 Chondropathy, Early-Onset Osteoarthritis, Arthrosis, and Cartilage/Chondral Damage	317	7.17.1 Synovial Popliteal Cysts	336
7.11.1 Chondropathy	317	7.17.2 Bursitis	339
7.11.2 Early-Onset Osteoarthritis and Arthrosis	317	7.18 Lesions of Hoffa's Fat Pad and Other Fat Pads .	340
7.11.3 Chondral (Cartilage) and Osteochondral Damage ..	318	7.19 Ganglion Cysts (apart from Meniscal Ganglion Cysts/Parameniscal Cysts)	341
7.11.4 Treatment of Cartilage Damage and Posttreatment Follow-Up with Magnetic Resonance Imaging	320	7.19.1 Intra-articular Ganglion Cysts	342
7.12 Bone Trauma	322	7.19.2 Extra-articular Ganglion Cysts	342
7.12.1 Bone Bruises	322	7.20 Nerve Compression Syndrome and Periarticular Neuropathy	342
7.12.2 Fractures	322	7.21 Vascular Diseases	343
7.13 Transient (Regional) Migratory Osteoporosis and Shifting Bone Marrow Edema of the Knee	324	7.22 Special Features in Children	344
7.14 Osteochondritis Dissecans and Avascular Necrosis	324	7.23 Common Tumors and Tumorlike Lesions in and around the Knee	344
7.14.1 Osteochondritis Dissecans	324	7.24 Pitfalls When Interpreting the Images	345
7.14.2 Spontaneous Idiopathic Osteonecrosis of the Femoral Condyle (Ahlbäck's Disease)	325	7.24.1 Increased Signal Intensity at the Meniscus Periphery	345
7.14.3 Other Forms of Osteonecrosis in the Knee Region ..	328	7.24.2 Pulsatile Flow Artefacts of the Popliteal Artery	347
7.15 Changes to the Synovial Membrane and Joint Capsule, Sarcoidosis, and Gout	328	7.24.3 Line Artefacts	347
7.15.1 Rheumatoid Arthritis	328	7.24.4 Bi-, Tri-, and Multipartite Patella	347
7.15.2 Pigmented Villonodular Synovitis	329	7.24.5 Dorsal Defect of the Patella	347
7.15.3 Hemophilic Arthropathy	331	7.24.6 Accessory Posterior Sesamoids	347
7.15.4 Sarcoidosis	332	7.24.7 Calcification	348
7.15.5 Lipoma Arborescens	332	7.24.8 Meniscomeniscal Ligament	348
7.15.6 Amyloid Arthropathy	333	7.24.9 The Articularis (Muscle)	349
7.15.7 Chondromatosis	333	7.24.10 Absorption Cysts at the Insertion of the Cruciate Ligaments on the Tibial Plateau	349
7.15.8 Gout	334	7.24.11 Asymmetry of the Epiphyseal Plate	349
7.16 Synovial Plicae (Folds)	334	7.25 Clinical Relevance of Magnetic Resonance Imaging	350
7.17 Synovial Popliteal Cysts and Bursitis	336		
8. The Lower Leg, Ankle, and Foot	358		
<i>M. Vahlensieck, A. Sikorski, and C. Glaser</i>			
8.1 Introduction	358	8.4.9 Tarsal Coalitions	376
8.2 Examination Technique	358	8.4.10 Cartilage Deformity	379
8.2.1 Patient Positioning	358	8.5 Disorders of the Tendons	379
8.2.2 Coil Selection	358	8.5.1 Achilles Tendon	382
8.2.3 Magnetic Resonance Imaging Protocols with Regard to Sequences and Parameters	358	8.5.2 Plantaris Tendon	387
8.3 Anatomy	359	8.5.3 Peroneal Tendons	388
8.3.1 General Anatomy	359	8.5.4 Deep Flexor Tendons	390
8.3.2 Specific Magnetic Resonance Imaging Anatomy	361	8.5.5 Anterior Muscle Group (Extensor Group)	394
8.4 Disorders of Bones	367	8.6 Ligament Injuries and Impingement Problems following Ligament Damage	395
8.4.1 Osteochondral Injuries, Osteochondritis Dissecans, and Osteonecrosis of the Talus	367	8.6.1 Talocrural Joint	395
8.4.2 Apo- and Epiphysitis	370	8.6.2 Lisfranc Injury	398
8.4.3 Sesamoids and Accessory Bones	370	8.6.3 Sinus Tarsi Ligament Injuries and Sinus Tarsi Syndrome	398
8.4.4 Stress Reactions, Stress Fractures, and Occult Fractures	371	8.6.4 Plantar Calcaneonavicular Ligament	399
8.4.5 Bone Marrow Edema Syndrome of the Foot and Transient Osteoporosis	374	8.6.5 Impingement Syndrome	399
8.4.6 Osteomyelitis	374	8.7 Diseases of the Plantar Fascia (Plantar Aponeurosis)	400
8.4.7 Shin Splint Syndrome	375	8.7.1 Plantar Fasciitis	401
8.4.8 Pediatric Fractures	375	8.7.2 Plantar Fibromatosis (Ledderhose's Disease)	401

8.8	Diseases of the Fat Pads of the Feet and Plantar Vein Thrombosis	402	8.17	Typical Foot Tumors	411
8.9	Disorders of the Nerves and Compression Syndrome	402	8.17.1	Xanthomas	411
8.9.1	Tarsal Tunnel Syndrome	403	8.17.2	Ganglion Cysts	411
8.9.2	Other Compression Syndromes of the Foot	406	8.17.3	Bone Tumors	411
8.10	Osteoarthritis	406	8.17.4	Calcaneal Tumors	412
8.11	Arthritis	406	8.17.5	Giant Cell Tumors of the Tendon Sheath	412
8.12	Other Form of Synovitis	406	8.17.6	Malignant Soft Tissue Tumors	413
8.13	Diabetic Foot Syndrome	406	8.17.7	Subungual Tumors	413
8.13.1	Diabetic Neuro-Osteoarthropathy	406	8.17.8	Epidermal Inclusion Cysts	413
8.13.2	Nondiabetic Neuropathy	409	8.18	Disorders of the Toes	414
8.14	Hemophilic Osteoarthropathy	409	8.18.1	Trauma	414
8.15	Bursitis and Haglund's Heel	409	8.18.2	Sesamoids	415
8.16	Pseudobursae	411	8.18.3	Gout	415
9.	The Temporomandibular Joint	426	8.18.4	Hallux Valgus and Metatarsalgia	415
	<i>S. Robinson and R. Fischbach</i>		8.19	Pitfalls in Interpreting Images	415
9.1	Introduction	426	8.19.1	Signal Patterns of Anatomic Structures	415
9.2	Examination Technique	426	8.19.2	Accessory Bones and Sesamoids	416
9.2.1	Patient Positioning	426	8.19.3	Accessory Muscles	416
9.2.2	Coil Selection	426	8.20	Clinical Relevance of Magnetic Resonance Imaging	417
9.2.3	Sequences and Parameters	426			
9.2.4	Special Examination Techniques	427			
9.2.5	Dynamic Studies	427			
9.3	Anatomy	428			
9.3.1	General Anatomy	428			
9.3.2	Special Magnetic Resonance Imaging and Variants	428			
9.4	Disorders of the Articular Disk	430			
9.4.1	Abnormal Changes in the Structure and Shape of the Disk	430			
9.4.2	Disk Displacement	431			
10.	The Muscles	444			
	<i>A.J. Hoeink, T.-U. Niederstadt, and M. Vahlensieck</i>				
10.1	Introduction	444	9.4.3	Disk Adhesion	434
10.2	Examination Technique	444	9.4.4	Disk Perforation	434
10.2.1	Magnetic Resonance Imaging	444	9.4.5	Malpositions of the Condyle	434
10.2.2	Special Magnetic Resonance Spectroscopy of the Muscles	444	9.5	Arthritis and Other Synovial Disorders	435
10.3	Anatomy	446	9.5.1	Arthritis	435
10.3.1	General Anatomy	446	9.5.2	Other Synovial Disorders	436
10.3.2	Specific Magnetic Resonance Imaging and Functional Anatomy	453	9.6	Bone Disorder	436
10.4	Neuropathy	455	9.6.1	Osteoarthritis	436
10.5	Myotonic Disorders	456	9.6.2	Trauma	437
			9.7	Treatment Outcomes	438
			9.8	Clinical Relevance of Magnetic Resonance Imaging	439
			10.6	Muscular Dystrophy	456
			10.7	Inflammatory Myopathy	457
			10.7.1	Polymyositis, Dermatomyositis, and Inclusion Body Myositis	457
			10.7.2	Viral and Bacterial Myositis	458
			10.7.3	Pyomyositis	458
			10.7.4	Sarcoidosis	458
			10.8	Muscle Changes after Radiotherapy and Local Chemotherapy	460
			10.8.1	Radiotherapy	460
			10.8.2	Local Chemotherapy	460

10.9 Traumatic Myopathy	461	10.14 Muscle Tumors	468
10.9.1 Acute Muscle Overload	461	10.15 Pitfalls in Interpreting the Images	468
10.9.2 Chronic Overload	464	10.15.1 Signal Variations in Superficial Muscles	468
10.10 Muscle Fibrosis	465	10.15.2 Inversion Recovery Sequences	468
10.11 Compartment Syndrome	467	10.15.3 Misinterpretation of Findings in Association with Denervation	468
10.12 Rhabdomyolysis	467	10.16 Clinical Relevance of Magnetic Resonance Imaging	469
10.13 Secondary Myopathy	467		
11. Bone Marrow	474		
<i>M. D'Anastasi, M. Vahlensieck, and A. Baur-Melnyk</i>			
11.1 Examination Technique	474	11.3.6 Serous Atrophy	493
11.2 Anatomy	475	11.3.7 Storage Diseases	494
11.2.1 General Anatomy	475	11.3.8 Posttransplant Bone Marrow Changes	495
11.2.2 Specific Magnetic Resonance Imaging Anatomy	476	11.4 Focal Diseases	496
11.3 Generalized Disorders	478	11.4.1 Edema	496
11.3.1 Reconversion and Hyperplasia	479	11.4.2 Ischemia	497
11.3.2 Cell Infiltration, Displacement, Uncontrolled Hyperplasia, and Skeletal Dysplasia	481	11.4.3 Postradiation Changes	497
11.3.3 Sclerotic Skeletal Dysplasia	492	11.4.4 Inflammation	500
11.3.4 Hypoplasia and Fatty Replacement	492	11.4.5 Trauma	504
11.3.5 Bone Marrow Fibrosis	493	11.5 Clinical Relevance of Magnetic Resonance Imaging	509
12. Bone and Soft Tissue Tumors	516		
<i>M. Vahlensieck and A. Baur-Melnyk</i>			
12.1 Introduction	516	12.3.7 Effects of Radiochemotherapy on Healthy Bone	528
12.2 Examination Technique	516	12.4 Tumors: Specific Section	529
12.3 Tumo: General Information	516	12.4.1 Bone Tumors	529
12.3.1 Comparison of Benign and Malignant Tumors	516	12.4.2 Soft Tissue Tumors	549
12.3.2 Characteristic Signal Intensity Patterns	518	12.4.3 Solid Tumors with Cyst-Isointense Signal Pattern ...	564
12.3.3 Staging	520	12.4.4 Metastases	566
12.3.4 Biopsy Planning	527	12.4.5 Pseudotumors and Tumorlike Substance Deposits, Paget's Disease	567
12.3.5 Monitoring the Response to Chemotherapy	527	12.4.6 Extramedullary Hematopoiesis	568
12.3.6 Tumor Recurrence and Postoperative Fibrosis and Edema	528	12.4.7 Chloroma (Granulocytic Sarcoma)	568
13. Osteoporosis	574		
<i>S. Grampp, M. Vahlensieck, and H. K. Genant</i>			
13.1 Introduction	574	13.2.2 Relaxation Time Measurements and Spectroscopy ..	579
13.2 Examination Technique	574	13.3 Clinical Relevance of Magnetic Resonance Imaging	581
13.2.1 Magnetic Resonance Imaging	574		
14. The Sacroiliac Joints	586		
<i>M. Bollow, J. Braun, and K.-G. Hermann</i>			
14.1 Introduction	586	14.3 Anatomy	587
14.2 Examination Technique	586	14.3.1 General Anatomy	587
14.2.1 Patient Positioning and Coil Selection	586	14.3.2 Special Magnetic Resonance Imaging Anatomy	588
14.2.2 Imaging Planes	586	14.3.3 Variants	590
14.2.3 Sequences	586	14.3.4 Enthesis Organ	590
		14.4 Causes of Sacroiliitis	595

14.5 Inflammatory Rheumatoid Disorders of the Sacroiliac Joints	595	14.8 Osteitis Condensans Ilii and Sacri as well as Triangular Hyperostosis Ilii and Sacri	613
14.5.1 Spondyloarthritis	595	14.9 Osteomalacia	619
14.5.2 Juvenile Spondyloarthritis	598	14.10 Pyogenic, Septic Sacroiliitis	619
14.5.3 Magnetic Resonance Imaging Findings for Inflammatory Rheumatoid Sacroiliitis	598	14.11 Tuberculous Sacroiliitis	621
14.5.4 Staging and Scoring	608	14.12 Traumatic Changes	621
14.6 Osteoarthritis Deformans and Juxta-Articular Pneumatocysts	611	14.13 Tumor and Tumorlike Conditions of the Joint ..	621
14.7 Disseminated Idiopathic Skeletal Hyperostosis .	611		
15. The Jaws and Periodontal Apparatus	634		
<i>S. Robinson</i>			
15.1 Introduction	634	15.4.1 Periodontitis	636
15.2 Examination Technique	634	15.4.2 Osteitis and Osteomyelitis	637
15.2.1 Equipment and Coils	634	15.4.3 Osteoradionecrosis and Bisphosphonate-Induced Osteonecrosis of the Jaw	638
15.2.2 Imaging Plane	634	15.4.4 Dentogenic Sinusitis	639
15.2.3 Sequences	635	15.4.5 Pulp Vitality	640
15.3 Anatomy	635	15.4.6 Implantology	640
15.3.1 General Anatomy	635	15.4.7 Differentiation between Solid and Cystic Changes ..	640
15.3.2 Special Magnetic Resonance Imaging	635	15.5 Clinical Relevance of Magnetic Resonance Imaging	643
15.4 Special Disorders	636		
16. Appendix	648		
<i>M. Vahlensieck</i>			
16.1 Other Disorders and Diagnoses	648	16.2.1 Magic Angle Phenomenon	654
16.1.1 Differential Diagnosis of Swollen Extremities on Magnetic Resonance Imaging	648	16.2.2 Use of Dedicated Systems	656
16.1.2 The Skin, Subcutaneous Tissues, and Fascia	648	16.2.3 Use of 3 Tesla Systems	656
16.1.3 Chronic Sports Injuries	652	16.2.4 Use of Open High Field Systems	657
16.2 Other Aspects of Magnetic Resonance Imaging of the Musculoskeletal System	654	16.2.5 Use of Open Spinal Systems for Upright Imaging ...	658
Index	661
