I Introduction to Endoscopy

1 Education and Training in Endoscopy	2
<i>Jürgen Hochberger, Jürgen Maiss, and Jonathan Cohen</i>	
2 The Value of Clinical Research	11
<i>Michael B. Wallace and Peter D. Siersema</i>	
Introduction	11
Keys to Success	11
A Tough Skin	11
Building Teams	11
Designing Clinical Trials	12
Generating Ideas	12
Refining Ideas	12
Clinical Trial Design	12
Grant Writing	12

II The Patient and Endoscopy

3 Informed Consent for Gastrointestinal Endoscopy	16
<i>Andrew E. Axon and Anthony T. R. Axon</i>	
Introduction	16
What Is "Informed Consent"?	16
Clinician and Patient Relationship	16
What Information Is Required?	17
How Should the Information Be Provided?	17
Where and When Should the Consent Be Taken?	17
Withdrawal of Consent	17
Exceptions to the Requirement of Consent	18
References	18
4 Patient Preparation and Sedation for Endoscopy	19
<i>T. Wehrmann</i>	
Introduction	19
Preparation Assessment	19
Monitoring during Endoscopic Sedation	20
Introduction	20
Hemodynamic Monitoring	20
Pharmacology	20
Introduction	20
Benzodiazepines	20
Opioids	21
Propofol	22
Who Should Perform Endoscopic Sedation?	22
Postprocedure Care	23
Monitoring during Recovery	23
Discharge	23
References	23
5 Design of the Endoscopy Suite	25
<i>Hans-Dieter Allescher</i>	
Introduction	25
General Questions and Considerations	25
Guidelines for Planning an Endoscopy Suite	25
Pathways for Patients, Staff, and Material	25
Location of the Unit	26
Number of Rooms	26
X-Ray Requirements	27
The Endoscopic Examination Room	27
Size of the Rooms	27
Equipment	28

Conducting Clinical Trials	13
Presentation and National Meetings	13
Manuscript Writing	13
Ethics	13
Conflict of Interest	13
Registration of Clinical Trials and Underreporting of Negative Trials	13
Falsification of Data	14
Plagiarism	14
Manuscript Submission and Review Process	14
Expanding the Reach	14
The Future of Scientific Publications	14
References	14
6 Cleaning and Disinfection in Endoscopy	32
<i>Bret T. Petersen</i>	
Introduction	32
Principles of Disinfection	32
Definitions	32
Application to Gastrointestinal Endoscopes	32
Liquid Chemical Germicides and Automated Endoscope Reprocessors	34
Transmission of Infection by Gastrointestinal Endoscopy	35
Transmission by Endoscopes with Elevators	35
Failure or Breach in Reprocessing	35
Unusual Organisms	35
Design and Oversight of Reprocessing Facilities	36
References	36
7 Electrosurgical Principles for Endoscopy	37
<i>Louis M. Wong Kee Song and Michael B. Wallace</i>	
Introduction	37
Electrosurgical Principles	37
Electrical and Tissue Variables	37
Monopolar versus Bipolar Circuit	39
Electrosurgical Units and Waveforms	40
Practical Applications	43
Snare Polypectomy	43
Hot Biopsy	44
Sphincterotomy	44
Hemostasis	44
Miscellaneous	46
Electrosurgical Hazards and Safety	46
Unintended Burn Injury	46
Implanted Electromagnetic Devices	46
Bowel Explosion	46
