

Table of content

1. INTRODUCTION AND MOTIVATION.....	1
1.1. INTRODUCTION	1
1.2. SCOPE OF THE WORK	2
2. GENERAL ASPECTS OF SnO_2 GAS SENSORS	5
2.1. SnO_2	5
2.2. SURFACE REACTIONS	5
2.2.1. Adsorption.....	5
2.2.2. Impact of oxidizing and reducing gases	6
2.2.3. Surface species	8
2.3. EFFECT OF DOPING	10
2.3.1. Catalytic or spillover effect.....	11
2.3.2. Fermi energy control.....	11
2.4. GAS SENSOR CHARACTERISTICS	12
2.4.1. Sensor signal.....	12
2.4.2. Sensitivity.....	12
2.4.3. Selectivity.....	12
2.5. IR SPECTROSCOPY	13
2.5.1. Principle	13
2.5.2. Methods	13
2.5.3. Application of isotopic labeled test gases.....	15
2.5.4. Example and advantages of using isotopically labeled gases	15
3. EXPERIMENTAL.....	17
3.1. MATERIAL PREPARATION	17
3.1.1. Undoped SnO_2 materials	17
3.1.2. Doped SnO_2	18
3.2. SENSOR PREPARATION/CALIBRATION	19
3.3. MATERIAL CHARACTERIZATION.....	21
3.4. DC RESISTANCE MEASUREMENTS.....	22
3.5. DRIFTS MEASUREMENTS.....	22
3.6. CATALYTIC CONVERSION	23
4. SENSING WITH UNDOPED TIN DIOXIDE	25
4.1. MATERIAL CHARACTERIZATION.....	27
4.2. SENSING CHARACTERISTICS	30

4.2.1.	Humidity	31
4.2.2.	Carbon monoxide	32
4.2.3.	Ethanol.....	33
4.2.4.	Methane	34
4.2.5.	Hydrogen	34
4.2.6.	Conclusion and summary	35
4.3.	S&A WET	36
4.3.1.	Reaction of water vapor in dry air.....	36
4.3.2.	Reaction of water vapor in N ₂	39
4.3.3.	Reaction of H ₂ in dry air and in humidity	40
4.3.4.	Reaction of CO in dry air and in humidity	43
4.3.5.	Reaction of CO ₂ in dry air and in humidity.....	46
4.3.6.	Reaction of EtOH in dry air and in humidity	47
4.3.7.	Conclusion and summary	49
4.4.	S&A DRY	51
4.4.1.	Reaction of water vapor in dry air.....	51
4.4.2.	Reaction of water vapor in N ₂	53
4.4.3.	Reaction of H ₂ in dry air and in humidity	54
4.4.4.	Reaction of CO in dry air and in humidity	55
4.4.5.	Reaction of CO ₂ in dry air and in humidity.....	57
4.4.6.	Reaction of EtOH in dry air and in humidity	58
4.4.7.	Conclusion and summary	60
4.5.	IPC1000	61
4.5.1.	Reaction of water vapor in dry air.....	62
4.5.2.	Reaction of water vapor in N ₂	64
4.5.3.	Reaction of H ₂ in dry air and in humidity	66
4.5.4.	Reaction of CO in dry air and in humidity	67
4.5.5.	Reaction of CO ₂ in dry air and in humidity.....	68
4.5.6.	Reaction of EtOH in dry air and in humidity	68
4.5.7.	Conclusion and summary	70
4.6.	INFLUENCE OF WATER VAPOR ON TIN DIOXIDE'S GAS SENSING PROPERTIES	71
5.	DOPING WITH PALLADIUM	76
5.1.	MATERIAL CHARACTERIZATION.....	77
5.2.	SENSING CHARACTERISTICS	78
5.2.1.	Humidity	79
5.2.2.	Carbon monoxide	80
5.2.3.	Ethanol.....	81
5.2.4.	Methane	81

5.2.5.	<i>Hydrogen</i>	82
5.3.	DRIFTS INVESTIGATION.....	83
5.3.1.	<i>Reaction of water vapor</i>	83
5.3.2.	<i>Reaction of H₂ in dry syn. air and in humidity</i>	85
5.3.3.	<i>Reaction of CO in dry syn. air and in humidity</i>	88
5.4.	EFFECT OF PD-DOPING ON SnO ₂ - SUMMARY.....	91
6.	DOPING WITH COBALT	93
6.1.	MATERIALS CHARACTERIZATION.....	96
6.2.	SENSING CHARACTERISTICS	97
6.2.1.	<i>Variation of operation temperature</i>	97
6.2.2.	<i>Humidity</i>	99
6.2.3.	<i>Humidity effect on the detection of different test gases</i>	99
6.2.4.	<i>Conclusion and summary</i>	101
6.3.	SENSING PROPERTIES OF S&A DRY:Co ₃ O ₄	102
6.4.	EFFECT OF CO-DOPING ON SnO ₂ - SUMMARY	107
7.	CONCLUSIONS AND OUTLOOK	109
7.1.	CONCLUSION	109
7.1.1.	<i>Undoped SnO₂</i>	109
7.1.2.	<i>Pd-doped SnO₂</i>	109
7.1.3.	<i>Co-doped SnO₂</i>	110
7.2.	OUTLOOK	110
