1	Introduction	1
1.1	Preliminaries	1
1.2	Differential Equations, Initial and Boundary Conditions	3
1.3	Major Assumptions	5
1.4	Vorticity-Dynamic Formulation	11
	References	16
2	Theorems of Helmholtz and Kelvin	17
2.1	Introduction	17
2.2	Kinematic-Kinetic Partition of Flow Problems	18
2.3	Kinematic Preliminaries	20
2.4	Helmholtz' First Vortex Theorem	25
2.5	Vorticity Loops	28
2.6	Kelvin's Theorem	29
2.7	Helmholtz' Second Vortex Theorem	30
2.8	Concluding Remarks	32
	References	33
3	Vorticity Kinematics	35
3.1	Differential Equations of Vorticity Kinematics	35
3.2	Vector Identities	38
3.3	Poisson's Equation and Integral Representations	40
3.4	Poisson's Equation and Boundary Conditions	43
3.5	Law of Biot-Savart	46
3.6	Generalized Law of Biot-Savart	49
3.7	Uniqueness of Solution	51
3.8	Boundary Conditions in Vorticity Kinematics	52
	References	55

4 Vorticity Kinetics. 57

4.1 Navier–Stokes Momentum Equation. 57

4.2 Convection and Material Derivative 58

4.3 Viscous Force and Diffusion of Momentum. 62

4.4 Vorticity and Flow Regions 64

4.5 Appearance and Transport of Vorticity. 66

4.6 Speeds of Vorticity Transport. 68

4.7 Boundary Conditions in Vorticity Kinetics. 69

4.8 Approaching Steady Flow 71

References. 73

5 Vorticity-Moment Theorem 75

5.1 Preliminary Remarks 75

5.2 Total Vorticity Conservation. 76

5.3 Asymptotic Behavior of Velocity Field 79

5.4 Total Velocity. 82

5.5 Aerodynamic Force 83

5.6 Moment of Aerodynamic Force 85

5.7 Two-Dimensional Flows. 86

5.8 Observations. 91

References. 94

6 Classical Aerodynamics. 95

6.1 Vorticity-Moment Theorems. 95

6.2 Kutta–Joukowski’s Theorem and Vortical Flow Zones. 96

6.3 Non-Streamlined Flow and Karman Vortex Street 100

6.4 Vorticity Loop and Vorticity Moment 103

6.5 Lifting-Line Theory: Uniform Circulation Lift 105

6.6 Lift on Finite Wing with Varying Circulation. 110

6.7 Induced Drag 112

6.8 Wake-Integral Expressions for Lift and Drag 113

References. 116

7 Unsteady Aerodynamics 117

7.1 Aircraft and Streamlined Flows 117

7.2 Animal Flight and Flapping Wings. 120

7.3 Classical Versus Vorticity-Dynamic Approach 123

7.4 Apparent Mass of Sphere and Circular Disk. 127

7.5 Apparent Mass Coefficients 131

References. 137
