LIST OF TABLES	iv
LIST OF FIGURES	vii
LIST OF ABBREVIATIONS	viii
LIST OF ANNEXES	ix
1. INTRODUCTION	1
2. LITERATURE REVIEW	3
2.1 Spoilage bacteria	3
2.1.1 Aerobic Plate Count (APC)	3
2.1.1.1 Examination procedure	3
2.1.1.2 APC in food safety and quality	4
2.1.1.3 APC reports along meat production chains	4
2.1.2 <i>Enterobacteriaceae</i> Count (EBC)	6
2.1.2.1 Examination procedure	6
2.1.2.2 EBC in food safety and quality	6
2.2 <i>Salmonella</i>	8
2.2.1 Microbiology of <i>Salmonella</i>	8
2.2.2 Sources and transmission of <i>Salmonella</i>	8
2.2.3 Salmonellosis	9
2.2.4 <i>Salmonella</i> characterization	9
2.2.4.1 <i>Salmonella</i> serotyping	10
2.2.4.2 Pulsed-Field Gel Electrophoresis (PFGE)	10
2.2.4.2.1 PFGE principle	10
2.2.4.2.2 Computer assisted data analysis	11
2.2.5 <i>Salmonella</i> along processing lines of food of animal origin	13
2.2.6 <i>Salmonella</i> serovars in Ethiopia	16
2.2.7 PFGE as a tool for tracking possible source and transmission routes of <i>Salmonella</i>	18
2.3 <i>Escherichia coli</i>	18
2.3.1 Microbiology of <i>E. coli</i>	18
2.3.2 Sources and transmission of <i>E. coli</i>	19
2.3.3 <i>E. coli</i> infection	19
2.3.4 <i>E. coli</i> along meat production lines	20
2.4 Antimicrobial susceptibility/resistance profiles	23
2.4.1 <i>Salmonella</i>	23
2.4.2 <i>E. coli</i>	26
3. THE GIVEN TECHNOLOGICAL PROCEDURES	28
3.1 Abattoir, butchers, processing plant and supermarkets	28
3.1.1 The abattoir line	28
3.1.2 The processing plant line	28
3.2 The incoming animals	29
3.3 The processing procedures	29
3.3.1 The abattoir line (Chain 1)	29
3.3.2 The beef processing plant line (Chain 2)	30
4. MATERIALS AND METHODS	32
4.1 Sampling	32
4.1.1 Sample size determination	32

4.1.2 Sample sources.....	33
4.1.3 Sampling occasions.....	34
4.1.4 Sample types.....	36
4.1.5 Sampling locations.....	38
4.1.5.1 The abattoir line.....	38
4.1.5.2 The processing plant line.....	39
4.2 Sampling techniques.....	42
4.3 Sample-handling and transport.....	42
4.4. Laboratory techniques.....	42
4.4.1 Sample preparation for microbiological examination.....	43
4.4.2 Spoilage bacteria examination.....	43
4.4.2.1 Aerobic Plate Count (APC).....	44
4.4.2.2 Enterobacteriaceae Count (EBC).....	45
4.4.2.3 Recalculation.....	45
4.4.2.4 Determining microbiological quality of mortadella from supermarkets.....	46
4.4.3 <i>Salmonella</i> examination.....	47
4.4.3.1 Isolation.....	47
4.4.3.2 Serotyping.....	47
4.4.3.3 Characterization by PFGE.....	47
4.4.4 <i>Escherichia coli</i> examination.....	48
4.5 Resistance testing.....	50
4.6 Data processing and analysis.....	51
5. RESULTS.....	53
5.1 Abattoir line.....	53
5.1.1 Spoilage bacteria.....	53
5.1.2 <i>Salmonella</i>	53
5.1.2.1 <i>Salmonella</i> prevalence.....	53
5.1.2.2 <i>Salmonella</i> serovars.....	55
5.1.2.3 Pulsed-field gel electrophoresis (PFGE).....	57
5.1.2.3.1 PFGE profiles of <i>Salmonella</i>	57
5.1.2.3.2 Tracking possible sources and transmission routes.....	62
5.1.3 <i>E. coli</i> along the abattoir line.....	66
5.1.3.1 Overall <i>E. coli</i> prevalence.....	66
5.1.3.2 Prevalence in the abattoir.....	66
5.1.3.3 Prevalence at the butchers.....	67
5.2 Processing plant line.....	67
5.2.1 Spoilage bacteria.....	67
5.2.1.1 Overall spoilage bacteria.....	67
5.2.1.2 Spoilage bacteria in the processing plant.....	70
5.2.1.3 Spoilage bacteria at supermarkets.....	70
5.2.1.4 Microbiological quality of the product (Mortadella).....	72
5.2.2 <i>Salmonella</i>	74
5.2.2.1 <i>Salmonella</i> prevalence.....	74
5.2.2.2 <i>Salmonella</i> serovars.....	76
5.2.2.3 Pulsed-field gel electrophoresis (PFGE).....	79
5.2.2.3.1 PFGE profiles of <i>Salmonella</i>	79
5.2.2.3.2 Tracking possible sources and transmission routes.....	82
5.2.3 <i>E. coli</i>	83
5.2.3.1 Overall <i>E. coli</i> prevalence.....	83
5.2.3.2 Prevalence at the processing plant.....	84
5.2.3.3 Prevalence at supermarkets.....	85

5.3 Antimicrobial susceptibility/resistance profiles of isolates	85
5.3.1 <i>Salmonella</i> isolates.....	85
5.3.1.1 Overall susceptibility/resistance.....	85
5.3.1.2 Abattoir line.....	86
5.3.1.3 Processing plant line.....	87
5.3.2 <i>E. coli</i> isolates	95
5.3.2.1 Overall susceptibility/resistance.....	95
5.3.2.2. Abattoir line.....	95
5.3.2.3 Processing plant line.....	96
6. DISCUSSION	102
6.1 Materials and methods.....	102
6.1.1 Materials	102
6.1.2 Methods.....	104
6.2 Results	105
6.2.1 Spoilage bacteria in general.....	105
6.2.1.1 Aerobic Plate Count	106
6.2.1.2 Enterobacteriaceae Counts	108
6.2.2 <i>Salmonella</i>	110
6.2.2.1 <i>Salmonella</i> prevalence.....	110
6.2.2.1.1 Overall <i>Salmonella</i> situation	110
6.2.2.1.2 <i>Salmonella</i> situation at sample locations.....	111
6.2.2.2 <i>Salmonella</i> serotypes.....	114
6.2.2.3 Transmission routes of <i>Salmonella</i>	118
6.2.2.3.1 Molecular diversity of <i>Salmonella</i> obtained from both lines	118
6.2.2.3.2 Tracking possible sources and transmission routes.....	120
6.2.2.4 Antimicrobial susceptibility/resistance of <i>Salmonella</i>	122
6.2.2.4.1 Overall susceptibility/resistance.....	122
6.2.2.4.2 Susceptibility/resistance of <i>Salmonella</i> strains from both lines	123
6.2.2.4.3 Resistant <i>Salmonella</i> strains	124
6.2.3 <i>E. coli</i>	125
6.2.3.1 <i>E. coli</i> prevalence	125
6.2.3.1.1 Overall <i>E. coli</i> situation	125
6.2.3.1.2 <i>E. coli</i> situation at different locations.....	125
6.2.3.2 Antimicrobial susceptibility/resistance of <i>E. coli</i> isolates	127
6.2.3.2.1 Overall susceptibility/resistance to individual drugs.....	127
6.2.3.2.2 Susceptibility/resistance of <i>E. coli</i> strains by source line.....	128
6.2.3.2.3 Resistant <i>E. coli</i> strains.....	129
6.2.4 Conclusions.....	131
6.2.4.1 Data obtained in this study.....	131
6.2.4.2 Conclusions from practical points of view.....	132
6.2.4.3 Future emphasis.....	133
7. SUMMARY	134
8. ZUSAMMENFASSUNG	139
9. REFERENCES.....	142
10. ANNEX.....	xi
11. PUBLICATIONS, ORAL PRESENTATIONS AND CONFERENCE	xliii
12. ACKNOWLEDGEMENTS	xlvi
13. DECLARATION	xxvii
