

## Index of Content

Preface	1
Index of content	3
 1 Groups with involutoric generator	 5
1.1 Fundamental statements about groups with an involutoric generator	5
1.2 Mappings in groups with involutoric generator	6
 2 The Group -lane ( $\mathbf{G}, \mathbf{E}$ )	 9
2.1 Fundamental theorems for a group plane	9
2.2 Mappings in the group plane	16
2.3 Geometries with kernels of perpendicularity	23
2.4 Regular geometries	29
2.5 Survey of the different types of geometries	33
 3 The group Space $\mathbf{G}(\mathbf{E}^2, \mathbf{E}^3)$	 35
 4 Construction of the field of coordinates $\mathbf{K}(\mathbf{G}, \mathbf{E})$	 53
 5 Imbedding of the group plane into a projective plane	 69
5.1 Implementation of homogeneous coordinates for the points of a plane of the group space	70
5.2 Implementation of homogeneous coordinates for the lines and planes of the bundle of the fixed point ( $\omega$ )	72
 6 Konstruktion of a quadratic form	 79
6.1 Konstruktion of a quadratic form for $\text{Char } \mathbf{K}(\mathbf{G}, \mathbf{E}) \neq 2$	81
6.2 Constraction of a quadratic form for $\text{Char } \mathbf{K}(\mathbf{G}, \mathbf{E}) = 2$	85
6.3 Main theorem of the metric plane ( $\mathbf{G}, \mathbf{E}$ ) that is imbedded into a projective plane over $\mathbf{V}_3(\mathbf{K})$	93
