Preface	xii
Contributors	xiii
1 Fundamental Problems in Orthodontics	1
1.1 Biomechanical Factors	2
1.1.1 Tipping Tooth Movement	4
1.1.2 Bodily Tooth Movement	6
1.1.3 Centers of Resistance for Groups of Teeth	8
1.1.4 Segmented Archwire Technique	10
1.1.5 Sliding Mechanics	11
1.2 Extrusion	12
1.3 Intrusion	14
1.4 Rotation	16
1.5 Torque	17
1.6 Relationship between Force and Resorption	20
1.6.1 Force	20
1.6.2 Resorption	24
1.6.3 Root Resorption	26
1.7 Orthodontic Tooth Movement	29
1.7.1 Tissues Supporting the Teeth	29
1.7.2 Phases of Tooth Movement	31
1.7.3 Phase I of Orthodontic Tooth Movement	31
1.7.4 Phase II of Orthodontic Tooth Movement	32
1.7.5 Phase III of Orthodontic Tooth Movement	34
1.8 Hereditary Anomalies	35
1.9 Genetics	38
1.9.1 Genotype	38
1.9.2 Phenotype	38
1.9.3 Phenotypic Plasticity	39
1.9.4 Genetically Determined Craniofacial Abnormalities	39
1.9.5 Epigenetic Factors	40
1.9.6 Genetic Abnormalities	44
1.9.7 Cleidocranial Dysostosis	44
1.9.8 Primary Failure of Tooth Eruption	47
1.9.9 Odontogenic Disturbances	50
1.10 Mechanobiology	54
1.10.1 Root Resorptions	58
1.11 Orthodontic Side Effects	60
1.11.1 Enamel Demineralization	60
1.11.2 Enamel Deposits	61
1.11.3 Treatment of White Spot Lesions	63
1.11.4 Attachment Loss	64
1.11.5 Enamel Abrasions/Enamel Fractures	66
1.11.6 Orthodontic Force and Root Resorption	69
2 Treatment of Crossbite	73
2.1 Lateral Crossbite	74
2.2 Treatment of Lateral Crossbite in Primary and Early Mixed Dentition	75
2.2.1 Transverse Expansion Plate	75
2.2.2 Clinical Application of Transverse Expansion Plate/Steel Screw	76
2.2.3 Memory Expander	77
2.2.4 Activation of the Memory Screw	77
2.2.5 Wearing Time	77
2.2.6 Clinical Handling of Expansion Plates	79
2.2.7 Rapid Palatal Expansion	80
2.2.8 Memory Palatal Split Screw	81
2.3 Treatment of Lateral Crossbite in Late Mixed Dentition and Adulthood	83
2.3.1 Transpalatal Arch (Goshgarian)	84
2.3.2 Quad Helix	86
2.3.3 Crisscross Elastics	94
2.3.4 Rapid Palatal Expansion in Late Mixed Dentition and Adulthood	95
2.3.5 Surgically Supported Rapid Palatal Expansion ...	96
2.3.6 Distraction and Surgically Supported Rapid Palatal Expansion	98
2.4 Anterior Crossbite	100
2.5 Treatment of Anterior Crossbite in Primary and Mixed Dentition	101
2.5.1 Anterior Crossbite and Angle Class III without Skeletal Involvement	104
2.5.2 Anterior Crossbite and Angle Class III with Skeletal Involvement	105
2.6 Treatment of Anterior Crossbite in Late Mixed Dentition and in Adults	106
2.6.1 Protrusion/Retrusion Mechanism with the Compound Archwire	107
2.7 Treatment of Laterognathia in Adults	110
3 Treatment of Deep Bite	111
3.1 Orthodontic Problems of Deep Bite	112
3.2 Definition of Deep Bite	113
3.3 Therapy of Deep Bite	114
3.3.1 Pseudo Deep Bite	114
3.3.2 True Deep Bite	114

Contents

3.4	Therapy of Deep Bite in Mixed Dentition	115	3.14.1	Material	142
3.4.1	Angle Class I	116	3.14.2	Activation	142
3.4.2	Angle Class II/1	116	3.15	Treatment of Deep Bite in Adults	146
3.4.3	Angle Class II/2	117	3.15.1	Segmented Intrusion Mechanics	146
3.4.4	Angle Class III	117	3.15.2	Biomechanics	146
3.5	Activator	118	3.15.3	Clinical Application	149
3.5.1	Mode of Action	118	3.16	Combination Treatment: Orthognathic Surgery and Deep Bite	154
3.5.2	Indication	119	3.16.1	Deep Bite and Angle Class I	154
3.5.3	Construction Bite for Deep Bite and Class I or Class II/2	119	3.16.2	Deep Bite and Angle Class II/1	155
3.5.4	Clinical Handling of Construction Bite	120	3.16.3	Deep Bite and Angle Class II/2	155
3.5.5	Activator Wearing Time	120	3.16.4	Deep Bite and Angle Class III	156
3.5.6	Timing of Therapy	121	3.16.5	Diagnostic Planning	156
3.5.7	Grinding Measures with the Activator	121	3.16.6	Orthodontic Pretreatment/Decompensation of Deep Bite	158
3.6	Activator–Headgear Combination	126	3.16.7	Sagittal Decompensation	158
3.7	Occlusal Plate and Headgear	128	3.16.8	Vertical Decompensation	159
3.8	Therapy for Deep Bite in the Permanent Dentition	130	3.16.9	Anchorage	160
3.8.1	Angle Class I	130	3.16.10	Leveling Phase	161
3.8.2	Angle Class II/1	131	3.16.11	Guidance Phase	161
3.8.3	Angle Class II/2	131	3.16.12	Orthodontic Postoperative Care of Deep Bite	162
3.8.4	Angle Class III	131	3.16.13	Retention	163
3.9	Specific Biomechanics	132	3.17	Bite Blocks	164
3.10	Orthodontic Mechanics for Bite Raising	134	3.18	Anterior Bite Block	166
3.10.1	Forces	135	3.19	Posterior Bite Plane	170
3.10.2	Intrusion Distance	135	3.20	Stability Parameters for Deep Bite	174
3.10.3	Material	135	3.20.1	Growth	174
3.11	Sweep	136	3.20.2	Extrusion of the Molars	174
3.12	Sweep and Low-Pull Headgear	138	3.20.3	Leveling of the Curve of Spee	174
3.13	NiTi Tip-Back Mechanics	140	3.20.4	Intrusion of the Anterior Teeth	174
3.14	NiTi Overlay	142	3.20.5	Extraction	175
			3.20.6	Axial Position	175
4	Treatment of Open Bite	177			
4.1	Orthodontic Problems of Open Bite	178	4.5.1	Spring Activator	205
4.1.1	Dental Open Bite	178	4.5.2	Transpalatal Arch	218
4.1.2	Skeletal Open Bite	178	4.6	Treatment of Open Bite and Angle Class II	220
4.1.3	Habits	182	4.7	Treatment of Open Bite and Angle Class III	223
4.1.4	Mandibular Joint Trauma	185	4.8	Orthodontic Treatment of Open Bite in the Permanent Dentition	225
4.1.5	Iatrogenic Open Bite	186	4.8.1	Angle Class I	225
4.1.6	Muscle Function	189	4.8.2	Angle Class II	225
4.2	Treatment of Open Bite	190	4.8.3	Angle Class III	225
4.2.1	Angle Class I	190	4.9	Biomechanics of Orthodontic Open Bite Treatment	226
4.2.2	Angle Class II	191	4.10	Extraction Treatment	230
4.2.3	Angle Class III	191	4.11	Molar Intrusion	233
4.3	Treatment of Open Bite in the Primary Dentition	192	4.12	Treatment of Open Bite in Adults	238
4.3.1	Oral Screen Appliance	193	4.12.1	Surgically Supported Palatal Expansion and Orthodontic Therapy	239
4.3.2	Rapid Palatal Expansion	202	4.13	Combined Treatment—Orthognathic Surgery and Open Bite	240
4.4	Treatment of Open Bite in the Mixed Dentition	203	4.13.1	Open Bite and Angle Class I	240
4.4.1	Angle Class I	203			
4.4.2	Angle Class II	203			
4.4.3	Angle Class III	203			
4.5	Treatment of Open Bite and Angle Class I	204			

4.13.2	Open Bite and Angle Class II	241	4.13.10	Stability Parameters of Open Bite	250
4.13.3	Open Bite and Angle Class III	241	4.13.11	Functional Orthodontics	250
4.13.4	Diagnostic Planning	242	4.13.12	Active Bite Blocks	251
4.13.5	Orthodontic Pretreatment/Decompensation	244	4.13.13	Musculature	251
4.13.6	Anchorage	246	4.13.14	Chin Cap	251
4.13.7	Leveling Phase/Guidance Phase	246	4.13.15	Microscrews/Mini-Tabs	251
4.13.8	Orthodontic Postoperative Care	247	4.13.16	Myofunctional Therapy	252
4.13.9	Retention	247	4.13.17	Orthognathic Surgery	252
5	Treatment of Class II Malocclusion	253			
5.1	Orthodontic Problems of Class II	254	5.9.1	First-Phase Treatment for a Skeletal Class II Anomaly	284
5.1.1	Skeletal Class II	254	5.9.2	Level of Severity of the Skeletal Class II Anomaly	284
5.1.2	Dental Class II	256	5.9.3	Selection of the Appliance	285
5.2	Cause and Differential Diagnosis of Class II	258	5.9.4	Treatment Timing	285
5.2.1	Dental Class II	259	5.9.5	Second Phase of Treatment for a Class II Anomaly	285
5.2.2	Skeletal Class II	259	5.9.6	Functional Orthodontics	286
5.2.3	Distally Forced Bite	259	5.10	Sander II Appliance	288
5.2.4	Angle Class II/1	260	5.10.1	Design of the Sander II Appliance	288
5.2.5	Angle Class II/2	261	5.10.2	Advantages of the Sander II Appliance	289
5.3	Treatment of Class II Malocclusion	262	5.10.3	Biomechanics of the Sander II Appliance	290
5.3.1	Primary Dentition and Early Mixed Dentition	262	5.10.4	Construction Bite for the Sander II Appliance	291
5.3.2	Late Mixed Dentition	262	5.10.5	Mode of Action of the Sander II Appliance	292
5.3.3	Permanent Dentition	262	5.10.6	Additional Features of the Sander II Appliance ...	294
5.3.4	Adults	262	5.10.7	Combination Therapy with Functional Orthodontics and Headgear	300
5.4	Treatment of Dental Class II in the Late Mixed Dentition	263	5.10.8	Sander II Appliance and Low-Pull Headgear	302
5.4.1	First Phase of Treatment of Dental Class II Anomaly	263	5.10.9	Sander II Appliance and High-Pull Headgear	310
5.4.2	Second Phase of Treatment of a Class II Anomaly	263	5.11	Treatment of Class II/2 in the Late Mixed Dentition	318
5.5	Headgear	264	5.12	Treatment of Dental and Skeletal Class II in the Permanent Dentition	322
5.5.1	Indication for Symmetric Headgear	265	5.12.1	Fixed Intermaxillary Appliances	322
5.5.2	Contraindication for Symmetric Headgear	265	5.12.2	Flexible, Fixed Intermaxillary Appliances	322
5.6	Special Biomechanics of Headgear	266	5.12.3	Hybrid Intermaxillary Appliances	323
5.6.1	Tipping with Coronal or Apical Center of Rotation	267	5.12.4	Herbst Appliance	323
5.6.2	Tipping with Center of Rotation in the Region of the Center of Resistance	267	5.12.5	Sabbagh Universal Spring	323
5.6.3	Clinical Application	268	5.12.6	Elasto-Harmonizer	323
5.6.4	Quantity of Force	268	5.12.7	Twin Block	324
5.6.5	Wearing Time	269	5.12.8	Herbst Appliance	332
5.6.6	Aim of the First Phase of Treatment in Dental Class II Therapy	269	5.12.9	SUS Appliance and Elasto-Harmonizer	340
5.6.7	Treatment Timing	269	5.13	Treatment of Class II in Adults	346
5.7	Asymmetric Headgear	274	5.13.1	Compensation of Skeletal Class II	346
5.7.1	Indication for Asymmetric Headgear	275	5.13.2	Asymmetric Headgear and Transpalatal Arch	348
5.7.2	Contraindication for Asymmetric Headgear	275	5.13.3	Asymmetric Headgear and NiTi Tip-Back Mechanics	350
5.8	Special Biomechanics—Adjustment of Asymmetric Headgear	276	5.13.4	Carrière Distalizer	353
5.8.1	Biomechanics of Inner Arm Geometry	276	5.13.5	Microscrews	358
5.8.2	Biomechanics of Outer Arm Geometry	277	5.14	Compensatory Treatment of Skeletal Class II	366
5.8.3	Clinical Application	278	5.14.1	Extraction Therapy	366
5.8.4	Treatment Timing	278	5.14.2	Compensation by Means of Distalization	366
5.9	Therapy of Skeletal Class II in the Late Mixed Dentition	284	5.15	Combination Treatment for Orthognathic Surgery of Class II	372

Contents

5.15.1	Diagnostic Planning of Orthodontic Surgery in Class II	372	5.15.8	Anchorage	379
5.15.2	Model Surgery with Model Repositioning Instrument	375	5.15.9	Guidance Phase	380
5.15.3	Three-Dimensional Planning of Orthognathic Surgery	375	5.15.10	Contraction Phase	380
5.15.4	Functional Orthodontic Pretreatment with Splints and Physiotherapy	376	5.15.11	Measures before Surgery for Class II	381
5.15.5	Orthodontic Pretreatment/Decompensation of Class II	376	5.15.12	Psychological Aspects	382
5.15.6	Decompensation of Class II/1	378	5.15.13	Orthodontic Postoperative Care	382
5.15.7	Leveling	378	5.16	Stability Parameters in Class II	388
			5.16.1	Growth	388
			5.16.2	Functional Orthodontics	389
			5.16.3	Headgear	389
			5.16.4	Herbst Appliance	390
			5.16.5	Orthognathic Surgery	390
6	Treatment of Class III Malocclusion	391			
6.1	Orthodontic Problems of Class III	392	6.6	Treatment of Class III in the Late Mixed Dentition ..	422
6.2	Cause and Differential Diagnosis of Class III.	396	6.6.1	Extraction Therapy	423
6.2.1	Anterior Crossbite	396	6.6.2	Alignment of Displaced Teeth	426
6.2.2	Progenic Forced Bite	396	6.6.3	Rapid Palatal Expansion for Pretreatment Prior to Orthognathic Surgery	428
6.2.3	Maxillary Micrognathia	397	6.6.4	Splint Therapy	429
6.2.4	Progenia	397	6.7	Treatment of Class III in the Permanent Dentition	430
6.2.5	Combination of Different Morphological Class III Variants	397	6.7.1	Orthodontic Materials/Brackets	430
6.3	Treatment of Class III Malocclusion	398	6.7.2	Archwire Sequence	431
6.3.1	Primary Dentition/Early Mixed Dentition	398	6.7.3	Mechanics	431
6.3.2	Late Mixed Dentition	398	6.7.4	Treatment of Dental Class III	432
6.3.3	Children with Permanent Dentition	398	6.8	Adult Treatment of Class III	438
6.3.4	Adults	398	6.8.1	Treatment of Dental Class III	439
6.4	Early Treatment of Class III	399	6.8.2	Compensatory Treatment of Skeletal Class III	444
6.4.1	Head–Chin Cap and Maxillary Plate	400	6.8.3	Combined Treatment with Orthognathic Surgery of Class III	450
6.4.2	Delaire Mask and Rapid Palatal Expansion	402	6.8.4	Orthodontic Pretreatment/Decompensation of Class III	452
6.5	Functional Orthodontic Therapy in the Primary and Early Mixed Dentition	410	6.9	Stability Parameters of Class III	462
6.5.1	Bionator	411			
6.5.2	Sander III	414			
7	Extraction Therapy	463			
7.1	Orthodontic Problems of Extraction Therapy	464	7.6	Extraction Therapy in the Permanent Dentition ...	491
7.1.1	Sagittal Crowding	464	7.6.1	Extraction of the First Premolars	491
7.1.2	Transverse Crowding	467	7.6.2	Extraction of the Second Premolars	491
7.1.3	Primary Crowding	468	7.6.3	Molar Extraction	491
7.1.4	Tertiary Crowding	469	7.6.4	Anterior Tooth Extraction	492
7.1.5	Extraction Criteria	470	7.6.5	Symmetrical Extraction	492
7.1.6	Visual Treatment Objective	472	7.6.6	Asymmetrical Extraction	492
7.1.7	Residual Gaps	474	7.7	Extraction Therapy in Class I Anomalies	493
7.1.8	Resorptions	475	7.7.1	Sliding Mechanics	493
7.1.9	Segmented Archwire Technique	476	7.7.2	Modified Sliding Mechanics	497
7.1.10	Modified Sliding Mechanics	477	7.7.3	Segmented Archwire Technique	502
7.2	Anchorage	478	7.7.4	Biomechanics of Canine Retraction	503
7.2.1	Anchorage in Angle Class I	479	7.7.5	Activation of Segmented Archwire	504
7.2.2	Anchorage in Angle Class II	480	7.8	Extraction Therapy in Class II Anomalies	508
7.2.3	Anchorage in Angle Class III	481	7.9	Biomechanics of Extraction Therapy in Class II Anomalies	510
7.3	Bracket Systems	482	7.9.1	Modified Sliding Mechanics	510
7.4	Occlusion	483	7.9.2	Modified Sliding Mechanics and Class II Elastic	510
7.5	Extraction Therapy in the Early Mixed Dentition ...	484			
7.5.1	Systematic Extraction Therapy	484			

7.9.3	Segmented Archwire Technique	510	7.9.6	Combination Treatment for Extraction Therapy of Class II	527
7.9.4	Modified Sliding Mechanics with Microscrew ...	512			
7.9.5	Modified Sliding Mechanics with Class II Elastics	520	7.10	Extraction Therapy in Class III Anomalies	532
			7.11	Stability Parameters of Extraction Therapy	536
