

Part III Direct Current

15 Basic Information and Calculation of Main Parameters for UHVDC Transmission System 729
Yang Shen, Xilei Chen and Yuting Qiu

15.1 Operating Principle of Converter 729

15.1.1 6-Pulse Converter 731

15.1.2 12-Pulse Converter 738

15.1.3 Double 12-Pulse Converter Connected in Series 739

15.2 Operating Modes of the UHVDC Transmission System 740

15.2.1 Selection of Voltage Level of UHVDC Converters 741

15.2.2 Operating Modes of UHVDC System 742

15.3 Calculation of Main Circuit Parameters of UHVDC System 748

15.3.1 Main Connection and Operation Modes of UHVDC Transmission Project 750

15.3.2 Rated Operating Parameters of DC System 751

15.3.3 Rated Operating Parameters of AC System 752

15.3.4 Parameters of DC Line 752

15.3.5 Equipment Parameters 753

15.3.6 Operating Parameters of DC System 763
