1	Introduction	17
1.1	Structure and Function of the Proteasome	17
1.1.1	Structure	17
1.1.2	Function	18
1.1.3	The Proteasome in Adaptive Immunity	21
1.1.4	Proteasome Isoforms	22
1.1.5	Proteasome Inhibitors and their Applications	24
1.2	Approaches to Model Proteasome Dynamics	25
1.2.1	Cleavage Site Usage and Peptide Length	25
1.2.2	Hydrolysis of Short Fluorogenic Peptides	26
1.2.3	Compartmentalised SFP Model for Proteasome Dynamics (Liepe et al. 2015 [1])	26
1.3	Parameter Inference	30
1.3.1	Bayesian Inference	30
1.3.2	Approximate Bayesian Computation	31
1.3.3	Approximate Bayesian Computation Based on Sequential Monte Carlo	31
1.4	Aim of this Work	32
2	Material and Methods	33
2.1	Experimental Data	33
2.2	Mathematical Models	35
2.2.1	Species and Parameters	35
2.2.2	Compartmentalised SFP Model without Inhibitor (Liepe et al. 2015 [1])	39
2.2.3	Catalytic Subunit Model with Inhibitor: ODE Model	41
2.2.4	Calculation of Quasi-Steady State Approximations	43
2.2.5	Catalytic Subunit Model with Reversible Inhibitor: QSS Model	45
2.2.6	Catalytic Subunit Model with Irreversible Inhibitor: QSS Model	47

2.2.7	Compartmentalised SFP Model with Reversible Inhibitor	47
2.2.8	Compartmentalised SFP Model with Irreversible Inhibitor	48
2.3	Software	50
3	Results	55
3.1	Comparison of the Dynamics of Proteasome Subtypes	55
3.1.1	Immuno- and Standard Proteasomes Differ in Active Site-Related and Transport Regulation-Related Parameters	61
3.1.2	Post-translational Modifications Can Influence Peptide Transport, Transport Regulation and Active Site Dynamics	64
3.1.3	Transport Efficiency Differs between Thymoproteasomes Compared to Immuno- and Standard Proteasomes	66
3.2	Modelling Inhibitor Influence on the Catalytic Subunits of the Proteasome	68
3.2.1	Modelling the Dynamics of the Catalytic Subunit	68
3.2.2	Reversible Inhibitors	72
3.2.3	Irreversible Inhibitors	76
3.3	Modelling Inhibitor Influence in a Compartmentalised SFP Model	79
3.3.1	Influence of Different Parameters on the Inhibiting Effect	80
3.4	Potent and Isoform-Specific Inhibitors	85
3.4.1	Potent Inhibitors	85
3.4.2	Isoform-Specific Inhibitors	88
4	Discussion	95
