

Contents

List of Contributors — IX

Dominik Schaniel and Theo Woike

Introduction — 1

Reinhard B. Neder

Static structural analysis of condensed matter: from single-crystal to amorphous — 13

Karlheinz Schwarz and Peter Blaha

DFT calculations of solids in the ground state — 67

Valerio Olevano

TDDFT, excitations, and spectroscopy — 101

Sébastien Pillet

Time-resolved structural analysis: probing condensed matter in motion — 143

Bruce D. Patterson

Ultrafast science — 221

Index — 269
