1	Introduction	1
	<i>Sreekanth Thota and Debbie C. Crans</i>	
1.1	History of Metal Complexes	1
1.1.1	Introduction	1
1.1.2	Metal Complexes	1
1.1.3	Metal Complexes in Medicine	2
1.2	Nanotechnology	2
1.2.1	Introduction	2
1.2.2	Development of Nanotechnology	2
1.2.3	Nanotechnology in Medicine	3
1.3	Nanoparticles	4
1.3.1	Introduction	4
1.3.2	Development of Nanoparticles	5
1.3.2.1	Liposome-Based Nanoparticles	5
1.3.2.2	Polymeric Nanoparticles	5
1.3.2.3	Metal Nanoparticles	5
1.3.3	Nanoparticles in Science and Medicine	6
1.4	Nanotechnology-Supported Metal Nanoparticles	7
	Acknowledgment	7
	References	7
2	Methods for Preparation of Metal Nanoparticles	15
	<i>Siavash Iravani</i>	
2.1	Introduction	15
2.2	Methods for Preparation of Metallic NPs	15
2.2.1	Physical and Chemical Methods	15
2.2.2	Green and Bio-based Strategies	19
2.3	Conclusion	24
	References	24
3	Metal Nanoparticles as Therapeutic Agents: A Paradigm Shift in Medicine	33
	<i>Mahendra Rai, Dipali Nagaonkar, and Avinash P. Ingle</i>	
3.1	Introduction	33

3.2	Metal Nanoparticles in Diagnostics	35
3.2.1	Nanoparticles as Biolabels	35
3.2.2	Nanoparticulate Detection of Proteins	35
3.2.3	Nanobiosensing	36
3.2.4	<i>In vivo</i> Imaging	37
3.3	Advanced Drug Delivery	38
3.4	Nanoparticle-Mediated Gene Transfer	39
3.5	Nanotechnology in Regenerative Therapies	41
3.5.1	Tissue Engineering and Implants	41
3.5.2	Bone Regeneration Materials	41
3.5.3	In Dentistry	42
3.5.4	Cell Therapy	43
3.6	Nanoparticles–Essential Oils Combination Against Human Pathogens	43
3.7	Conclusion	44
	Acknowledgment	44
	References	44
4	Nanoparticles for Imaging	49
	<i>Yerra Rajeshwar</i>	
4.1	Introduction	49
4.2	Nanoparticles	49
4.3	Nanoparticles as Diagnostic Probes	52
4.3.1	Nanoparticles as Blood Pool Contrast Agents	52
4.3.2	Imaging for MPS	54
4.3.3	Cell Labeling and Tracking	57
4.3.4	Labeling Implants, Transplants, and Grafts	60
4.3.5	Nano- and Microparticles for Molecular Imaging	62
4.4	Nanoparticle-Based Theranostics	67
4.4.1	Nanoparticles for Imaging-Guided Interventions	67
4.4.2	Nano- or Microparticles for Imaging-Guided Hyperthermia Treatment	67
4.4.3	Imaging-Guided Drug Delivery	69
4.5	Conclusion	70
	References	71
5	Soft-Oxometalates: A New State of Oxometalates and Their Potential Applications as Nanomotors	83
	<i>Apabrita Mallick and Soumyajit Roy</i>	
5.1	Introduction to Soft-Oxometalates (SOMs)	83
5.1.1	Classification of Soft-Oxometalates	84
5.1.1.1	Spontaneously Formed Soft-Oxometalates	84
5.1.1.2	Designed Soft-Oxometalates	84
5.2	Application of Soft-Oxometalates	85
5.2.1	Control of Morphology of SOMs	85
5.2.2	SOMs in Catalysis	86
5.2.3	SOMs in Patterning	86

5.3	Active Nano/micro Motors	89
5.3.1	Catalytic Motors	89
5.3.2	Magnetically Propelled Motors	89
5.3.3	Electrically Propelled Motors	90
5.3.4	Light Driven Motors	90
5.3.5	Ultrasonically Driven Motors	90
5.4	Micro-Optomechanical Movement (MOM) in Soft-Oxometalates	90
5.5	Autonomous Movements Induced in Heptamolybdate SOMs	92
5.6	SOMs as Water Oxidation Catalysts	94
5.7	Conclusion	95
	Acknowledgment	95
	References	95
6	Medicinal Applications of Metal Nanoparticles	101
	<i>Ayan K. Barui, Rajesh Kotcherlakota, and Chitta R. Patra</i>	
6.1	Overview	101
6.2	Introduction and Background	101
6.2.1	History of Medicinal Use of Metals, Metal Ions, and Complexes	103
6.2.2	Nanotechnology and Nanomedicine	104
6.2.3	Application of Disease-Specific Nanomedicine	105
6.2.4	Importance of Metal Nanoparticles in Biology	105
6.3	Biomedical Applications of Metal Nanoparticles	106
6.3.1	Delivery of Biomolecules Using Metal Nanoparticles	107
6.3.1.1	Drug Delivery	107
6.3.1.2	Nucleic Acid Delivery	112
6.3.1.3	Immunological Molecule Delivery	113
6.3.2	Anticancer Activities of Metal Nanoparticles	114
6.3.3	Antiangiogenic Therapy Using Metal Nanoparticles	116
6.3.4	Proangiogenic Properties of Metal Nanoparticles	117
6.3.5	Metal Nanoparticles in Bioimaging	119
6.3.6	Biosensing Applications of Metal Nanoparticles	120
6.3.7	Antimicrobial Activity of Metal Nanoparticles	122
6.3.8	Metal Nanoparticles in Neurodegenerative Diseases	124
6.3.9	Metal Nanoparticles in Tissue Engineering	126
6.3.10	Metal Nanoparticles in Diabetes	126
6.3.11	Metal Nanoparticles for Retinal Disorder	127
6.3.12	Anti-Inflammatory Effects of Metal Nanoparticles	127
6.3.13	Biologically Synthesized Nanoparticles for Biomedical Applications	128
6.4	Pharmacokinetics of Metal Nanoparticles	129
6.5	Status of Metal Nanoparticles in Clinical Study	131
6.6	Future Prospect of Metal Nanoparticles in Medicine	132
	Acknowledgment	133
	Abbreviations	133
	References	135

7	Metal Nanoparticles in Nanomedicine: Advantages and Scope	155
	<i>Tapan K. Sau, Arunangshu Biswas, and Parijat Ray</i>	
7.1	Introduction	155
7.1.1	Therapeutic Use of Metals: Historical Perspective	155
7.1.2	Nanomedicines and Metals	156
7.2	Advantages Associated with Metal Nanosystems	157
7.2.1	Metals as Nanosystems	158
7.2.1.1	Small Size and Large Surface Area-to-Volume Ratio	158
7.2.1.2	Shape and Morphology Dependence	159
7.2.2	Varieties of Metal Nanoparticles, Synthesis, and Fabrication Techniques	159
7.2.3	Inertness, Biocompatibility, and Ease of Surface Modifications	160
7.2.4	Optical Properties: Localized Surface Plasmon Resonance (LSPR)	162
7.2.5	Large Scattering and Absorption Cross Sections and Photothermal Effects	166
7.2.6	Enhanced Local Electromagnetic Field: Surface-Enhanced Spectroscopies	167
7.3	Applications and Scope	169
7.3.1	Targeted Drug Delivery and Controlled Release	169
7.3.2	Photothermal and Photodynamic Therapies and Cancer Treatment	173
7.3.3	Antimicrobial and Wound Healing Effects	175
7.3.4	Clinical Diagnostics	177
7.3.4.1	Medical Imaging	178
7.4	Concluding Remarks	185
	Acknowledgments	185
	References	185
8	Applications of Metal Nanoparticles in Medicine/Metal Nanoparticles as Anticancer Agents	203
	<i>Wenjie Mei and Qiong Wu</i>	
8.1	Advantages of Metal Nanoparticles	203
8.1.1	Stability and Homogeneity	203
8.1.2	Luminescence Property	204
8.1.3	Biocompatibility	204
8.1.4	Metabolic Pathways	204
8.2	Metal Nanoparticles as Anticancer Agents	205
8.3	Gold Nanoparticles	205
8.3.1	AuNPs as Therapeutic Agents	206
8.3.1.1	AuNPs in Plasmonic Photothermal Therapy	206
8.3.1.2	AuNPs in Photodynamic Therapy	207
8.3.1.3	AuNPs as a Therapeutic Agent	207
8.3.2	AuNPs as Drug Carriers	208
8.3.2.1	Targeted Delivery of Anticancer Drugs	208
8.3.2.2	Delivery of Genes	209

8.3.3	AuNPs in Cancer Imaging	209
8.4	Silver Nanoparticles (AgNPs)	210
8.4.1	Synthesis of AgNPs	210
8.4.1.1	Chemical Methods	210
8.4.1.2	Physical Methods	210
8.4.1.3	Biological Methods	210
8.4.2	AgNPs as Inhibitor in Chemotherapy	211
8.4.2.1	AgNPs as Promising Inhibitor Against Tumor	211
8.4.3	AgNPs as Drug Carrier	212
8.4.4	AgNPs in Cellular Imaging and Clinic Diagnostics	213
8.4.5	Cytotoxicity of AgNPs	213
8.5	Copper Nanoparticles	214
8.5.1	Synthesis of CuNPs	214
8.5.2	Antibacterial Activity	214
8.5.3	Anticancer Activity	214
8.5.4	Molecular Imaging	215
8.5.5	Drug Carrier	216
8.6	Conclusion	217
	Acknowledgments	217
