	Page
32 Rare Earth Elements and Boron	1
32.1 Borides	1
General References	1
32.1.1 Comparative Data for MB_2	2
32.1.1.1 Preparation	2
32.1.1.2 Crystallographic Properties. Density	2
32.1.1.3 Thermal and Magnetic Properties. Electronic Structure	4
32.1.2 Comparative Data for M_2B_5	6
32.1.3 Comparative Data for "MB_x" ($x=3$ to 4)	6
32.1.4 Comparative Data for MB_4	6
32.1.4.1 Formation, Preparation	6
32.1.4.2 Crystallographic Properties	8
32.1.4.3 Valency	12
32.1.4.4 Mechanical and Thermal Properties	12
32.1.4.5 Magnetic Properties	15
32.1.4.6 Electrical Properties	17
32.1.4.7 Chemical and Electrochemical Behavior	21
32.1.5 Comparative Data for MB_6	21
32.1.5.1 Existence	21
32.1.5.2 Homogeneity Range	22
32.1.5.3 Preparation	23
Preparation of Polycrystalline Samples	23
Single-Crystal Growth	28
Preparation of Films	31
32.1.5.4 Crystallographic Properties	33
32.1.5.5 Lattice Vibrations	39
32.1.5.6 Nuclear Magnetic Resonance	42
32.1.5.7 Crystal Field Splitting	44
32.1.5.8 Mechanical Properties	45
32.1.5.9 Thermal Properties	49
32.1.5.10 Magnetic Properties	55

	Page
32.1.5.11 Electrical Properties	57
Electronic Structure	57
Electrical Resistivity. Magnetoresistance	62
Hall Effect. Thermoelectric Power	67
Properties of Charge Carriers	70
Thermionic Emission and Related Properties	72
Binary Hexaborides MB_6	73
Ternary Hexaborides $M_{1-x}La_xB_6$	76
Secondary Emission	77
Reflection of Electrons	77
32.1.5.12 Optical and Dielectric Properties	80
32.1.5.13 Photoemission and X-Ray Spectra	85
32.1.5.14 Electrochemical Behavior	87
32.1.5.15 Chemical Behavior	87
Reactions on Irradiation with Neutrons	87
Thermal Stability	89
Reactions with Gases	93
Reactions with Elements	95
Reactions with Compounds	96
32.1.6 Comparative Data for MB_{12}	100
32.1.6.1 Preparation	100
32.1.6.2 Crystallographic Properties. Density	102
32.1.6.3 Microhardness	104
32.1.6.4 Thermal Properties	105
32.1.6.5 Magnetic Properties	106
32.1.6.6 Electrical Properties	107
Electronic Structure	107
Resistivity. Magnetoelectric and Thermoelectric Properties	108
Thermionic Emission	110
32.1.6.7 Electrochemical Behavior	111
32.1.6.8 Chemical Behavior	111
32.1.7 Comparative Data for MB_{-66}	112
32.1.7.1 General	112
32.1.7.2 Preparation	112
32.1.7.3 Crystallographic Properties	113
32.1.7.4 Hardness. Thermal Properties	115
32.1.7.5 Magnetic, Electrical, and Optical Properties	116

32.1.8 Data for Individual Borides	119
32.1.8.1 Scandium Borides	119
The Sc-B System	119
ScB ₂	121
ScB ₄ (?)	125
ScB ₅ (?)	126
ScB ₁₂	127
Solid Solutions of Sc in β Boron (ScB ₋₂₈)	128
32.1.8.2 Yttrium Borides	129
The Y-B System	129
YB ₂	131
"YB ₃ "	133
YB ₄	133
YB ₆	140
Preparation and Stoichiometry	140
Crystallographic Properties. Density	143
Lattice Vibrations. Electron-Phonon Coupling	144
Mechanical and Thermal Properties	146
Magnetic and Electrical Properties	147
Optical Properties	153
Chemical Behavior	153
Y _{1-x} Sc _x B ₆ (?)	155
YB ₁₂	155
YB ₋₆₆	158
32.1.8.3 Lanthanum Borides	162
The La-B System	162
Nonconfirmed Borides La ₃ B, La ₂ B, and LaB	164
LaB ₄	165
LaB ₆	168
Homogeneity Range	168
Preparation	170
Preparation of Polycrystalline Samples	170
Single-Crystal Growth and Zone Refining	174
Preparation of Films and Coatings	181
Crystallographic Properties	190
Lattice Vibrations	194
Nuclear Magnetic Resonance	200
Mechanical Properties	201
Thermal Properties	204
Thermal Expansion and Melting Point	204
Vaporization. Sublimation	205
Enthalpy of Formation	209
Heat Capacity. Thermodynamic Functions	209
Thermal Conductivity	212
Magnetic Properties	213
Electrical Properties	214
