Coordination Compounds of Manganese	1
Introduction	1
 30 Complexes with Schiff Bases	 3
General References	3
General Aspects	3
 30.1 Complexes with Schiff Bases Containing One Azomethine Group	 4
30.1.1 With Schiff Bases Derived from Benzaldehyde or Substituted Benzaldehydes	4
From Benzaldehyde or Its Derivatives and 2-Aminophenols	4
From Aminobenzaldehydes and Alkyl- or Arylamines	5
From Benzaldehyde and a Heterocyclic Amino Compound	6
30.1.2 With Schiff Bases Derived from Salicylaldehyde	7
From Salicylaldehyde and Alkylamines or Related Compounds	7
Manganese(II) Compounds	8
Manganese(III) Compounds	9
Manganese(IV) Compounds	14
From Salicylaldehyde and Aniline or Its Derivatives	15
Manganese(II) Complexes in Solution	16
Isolated Manganese(II) and Manganese(III) Compounds	17
From Salicylaldehyde and Aminoalkanols or (Aminoalkyl)phenols	20
Manganese(II) Compounds	20
Manganese(II,III) Compound	22
Manganese(III) Compounds	22
Manganese(IV) Compounds	25
From Salicylaldehyde and Aminophenols or Related Compounds	28
Manganese(II) Complexes in Solution	28
Isolated Manganese(II) Compounds	29
Manganese(III) Compounds	31
Manganese(IV) Compounds	33
From Salicylaldehyde and Amino Carboxylic Acids or Amino Ketones	34
Manganese(II) Complexes in Solution	34
Isolated Manganese(II) and Manganese(III) Compounds	35
From Salicylaldehyde and Heterocyclic Amines	39
Manganese(II) Compounds	39
Manganese(III) Compound	43
30.1.3 With Schiff Bases Derived from Substituted Salicylaldehydes	44

	Page
From Substituted Salicylaldehydes and Alkyl- or Benzylamines	44
Manganese(II) Compounds	44
Manganese(III) Compounds	45
Manganese(IV) Compounds	47
From Substituted Salicylaldehydes and Aniline or Its Derivatives	50
Manganese(II) Compounds	50
Manganese(III) Compounds	52
From Substituted Salicylaldehydes and Aminoalkanols or (Aminoalkyl)phenols	52
Manganese(II) Compounds	53
Manganese(III) Compounds	54
From Substituted Salicylaldehydes and 2-Aminophenol or Related Compounds	56
From Substituted Salicylaldehydes and Amino Carboxylic Acids	59
From Substituted Salicylaldehydes and (Aminoalkyl)pyridines	60
30.1.4 With Schiff Bases Derived from 3-Formylsalicylic Acid	62
30.1.5 With Schiff Bases Derived from Dihydroxybenzaldehydes or Related Compounds	63
30.1.6 With Schiff Bases Derived from 2-Hydroxy-1-naphthaldehyde	66
30.1.7 With Schiff Bases Derived from 4-Formyl-3-hydroxy-2-naphthoic Acid	73
30.1.8 With Schiff Bases Derived from Heterocyclic Aldehydes	74
From 2-Furancarbaldehyde and a Heterocyclic Amino Compound	74
From 2-Furan- or 2-Thiophenecarbaldehyde and Amino Carboxylic or Amino Sulfonic Acids	75
From N-Heterocyclic Aldehydes and Amines	78
From N-Heterocyclic Aldehydes and Aminophenols or an Amino Thioether	82
From N-Heterocyclic Aldehydes and Amino Carboxylic or Amino Sulfonic Acids or Amino Ketones	83
30.1.9 With Schiff Bases Derived from Monoketones	87
From 2-Hydroxyacetophenone and Aromatic or Heterocyclic Amino Compounds	87
From Other Hydroxyketones and Aromatic Amines	89
From 2-Pyridyl Methyl Ketone and 2-Aminomethylpyridine	90
From 2-(Alkyl- or Arylamino)cycloheptatrienones and Amines	91
30.1.10 With Schiff Bases Derived from Formyl Ketones	92
30.1.11 With Condensation Products of Acetylacetone and Ammonia or Amino Compounds	95
30.1.12 With Schiff Bases Derived from Other Polyoxo Compounds	96
30.2 Complexes with Schiff Bases Containing Two Azomethine Groups	98
General	98
30.2.1 With Schiff Bases Derived from Salicylaldehyde and Diamines	98
From Salicylaldehyde and Ethylenediamine	98
Manganese(II) Compounds	99
Manganese(III) Compounds	102
Manganese(III,IV) and Manganese(IV) Compounds	114

	Page
From Salicylaldehyde and 1,2-Propanediamine	116
From Salicylaldehyde and 1,3-Propanediamine	117
Manganese(II) Compounds	117
Manganese(III) Compounds	118
Manganese(III, IV) and Manganese(IV) Compounds	122
From Salicylaldehyde and 1,3-Diamino-2-propanol	122
From Salicylaldehyde and Long-Chain Alkanediamines	124
From Salicylaldehyde and Branched-Chain Alkanediamines	127
From Salicylaldehyde and Oxa-, Thia-, or Phosphaalkanediamines	129
From Salicylaldehyde and 1,2-Cyclohexanediamine	131
From Salicylaldehyde and 1,2-Phenylenediamine or Derivatives	132
From Salicylaldehyde and Other Diamines	135
30.2.2 With Schiff Bases Derived from Salicylaldehyde and Azaalkanediamines	140
Manganese(I) Nitrosyl Compounds	140
Manganese(II) Compounds	141
Manganese(II, III) Compounds	144
Manganese(III) Compounds	144
30.2.3 With Schiff Bases Derived from Salicylaldehyde and Diazaalkanediamines	148
Manganese(II) Compounds	148
Manganese(III) Compounds	149
30.2.4 With a Schiff Base Derived from Salicylaldehyde and N,N'-Ethylenebis-(2-aminoacetamide)	151
30.2.5 With Schiff Bases Derived from Substituted Salicylaldehydes and Diamines ...	152
From Substituted Salicylaldehydes and Ethylenediamine	152
Manganese(II) Compounds	152
Manganese(III) Compounds	154
Manganese(IV) Compounds	159
From Substituted Salicylaldehydes and 1,2-Propanediamine	161
From Substituted Salicylaldehydes and 1,3-Propanediamine	164
From Substituted Salicylaldehydes and 1,3-Diamino-2-propanol	166
From Substituted Salicylaldehydes and Other Alkanediamines	167
From Substituted Salicylaldehydes and 1,2-Phenylenediamine	168
From Substituted Salicylaldehydes and Oxa- or Phosphaalkanediamines	170
From Substituted Salicylaldehydes and Piperazinediylbis(propanamine)	172
30.2.6 With Schiff Bases Derived from Substituted Salicylaldehydes and Azaalkanediamines	173
Manganese(I) Nitrosyl Compounds	173
Manganese(II) Compounds	174
Manganese(II, III) Compound	176
Manganese(III) Compounds	177
Manganese(IV) Compound	181
30.2.7 With Schiff Bases Derived from Substituted Salicylaldehydes and Diazaalkanediamines	181
30.2.8 With Schiff Bases Derived from 2,4-Dihydroxybenzaldehyde and Diamines	183

	Page
30.2.9 With Schiff Bases Derived from 3-Formylsalicylic Acid and Diamines	184
30.2.10 With Schiff Bases Derived from Hydroxynaphthaldehydes and Diamines or Azaalkanediamines	185
30.2.11 With Schiff Bases Derived from Heterocyclic Aldehydes and Amines	189
From 2-Pyridinecarbaldehyde and Diamino Compounds	189
From 2-Pyridinecarbaldehyde and a Triamine or Azaalkanediamines	193
From 8-Hydroxy-5-quinolinecarbaldehyde and Aromatic Diamines	195
From 2-Thiophenecarbaldehyde and a Biphenyldiamine	196
30.2.12 With Schiff Bases Derived from Ketones and Diamines or Polyamines	196
Remark	196
From 2-Hydroxyacetophenones and Alkanediamines	196
Manganese(II) Compounds	197
Manganese(III) Compounds	197
Manganese(III, IV) Compound	200
From 2-Hydroxybenzophenone and Alkane- or Azaalkanediamines	201
From Monoacetyl Derivatives of Heterocycles and Alkane- or Azaalkanediamines	201
From Acetylacetone and Diamines	203
Manganese(II) Compounds	203
Manganese(III) Compounds	204
From Benzoylacetone and Diamines	208
From 2,6-Diacetylpyridine and N,N'-Bis(2-aminoethyl)-1,2-ethanediamine	210
From 2-Furylglyoxal and 1,2-Phenylenediamine	210
30.2.13 With Schiff Bases Derived from Dialdehydes and Amino Compounds	210
From Aliphatic Dialdehydes and Amines	210
From 1,3- or 1,4-Benzenedicarbaldehydes and Amino Compounds	211
From Methylenebis(salicylaldehyde) or Biphenylenebis (azosalicylaldehyde) and Amines	214
From Gossypol and Anthranilic Acid	216
From Pyrrole- or Pyridinedicarbaldehyde and 2-Aminophenol	217
30.2.14 With Schiff Bases Derived from Diketones and Amino Compounds	217
From Diacetyl and Aliphatic Diamines	217
From Acetylacetone and 2-Aminopyridine	218
From Acetylacetone and Thiourea	219
From Benzil and 2-Aminoethanol or Aniline	220
From 2,6-Diacetylpyridine and N-(2-aminoethyl)-1,2-ethanediamine	221
From 2,6-Diacetylpyridine and 2-Aminobenzenethiol	222
From Pyridinediylbis(1,3-butanedione) and 2-Aminoethanol	222
From Isoindoledione and 2-Amino-3-methylpyridine or -4-methylpyridine	223
30.3 Complexes with Schiff Bases Containing Three Azomethine Groups	224
30.3.1 From Salicylaldehyde or Substituted Salicylaldehydes and N,N-Bis(2-aminoethyl)-1,2-ethanediamine	224
30.3.2 From Pyridinecarbaldehyde and 2-Aminomethyl-2-methyl-1,3-propanediamine or cis,cis-1,3,5-Cyclohexanetriamine	226

	Page
30.4 Complexes with Schiff Bases Containing Four Azomethine Groups	227
30.4.1 From Salicylaldehyde and Alkane- or Cycloalkanetetramines	227
30.4.2 From Salicylaldehyde or Substituted Salicylaldehydes and Phenylenebis(methylene)bis(1,3-propanediamine)	229
30.4.3 From Salicylaldehyde or Related Compounds and Phenylenebis(methylene)bis(azaalkanediamines)	230
30.4.4 From Salicylaldehyde and 1,2,4,5-Benzenetetramine	231
30.4.5 From Heterocyclic Oxo Compounds and 2-Amino-4-methylpyridine	231
30.5 Complexes with Schiff Base Macrocycles	232
Remark	232
30.6 Complexes with Polymeric Schiff Bases	233
30.6.1 With Ligands Derived from Methylenebis(salicylaldehyde) and Alkanediamines, Azaalkanediamines, or Aromatic Diamines	233
30.6.2 With Ligands Derived from Sulfonylbis(salicylaldehyde) or -bis(phenyleneazosalicylaldehyde) and Aromatic Diamines	236
30.6.3 With Ligands Derived from Hydroxyphenyl Ketones and Aromatic Diamines ...	237
30.6.4 Other Polymeric Schiff Base Complexes	238
31 Complexes with Hydrazones or Related Compounds	239
Remark	239
31.1 Complexes with Hydrazones	239
General Reference	239
Survey	239
31.1.1 With Ligands Containing One Azomethine Group	240
With Hydrazones of Hydroxybenzaldehydes	240
With Hydrazones of 2-Pyridinecarbaldehyde or Related Compounds	244
With Hydrazones of 8-Quinolinecarbaldehyde	248
With Hydrazones of Hydroxyacetophenones or Benzoin	249
With Hydrazones of Pyridyl or Quinolyl Methyl Ketones	250
With Monohydrazones of Diketones or Diketone Monooximes	252
With Monohydrazones of Heterocyclic Dioxo Compounds	254
With Monohydrazones of Polyketones	256
With Hydrazones of Oxo Carboxylic Acids or Related Compounds	259
With Benzamide Hydrazone	260
31.1.2 With Ligands Containing Two Azomethine Groups	261
With Aldazines	261
With a Dihydrazone Derived from 2-Thiophenecarbaldehyde	263
With Dihydrazones of Dioxo Compounds	264
With Hydrazones Derived from Schiff Bases of Dioxo Compounds	268

	Page
31.2 Complexes with Acylhydrazones	270
General References	270
Survey	270
31.2.1 With Ligands Containing One Azomethine Group	271
With Acylhydrazones Derived from Benzaldehyde or Related Compounds	271
With Acylhydrazones Derived from Salicylaldehyde or Related Compounds	272
From Salicylaldehydes or 2-Hydroxy-1-naphthaldehyde and Benzo- or Salicylohydrazide	272
From Salicylaldehyde and Anthranilohydrazide	278
From Salicylaldehyde or Related Compounds and Hydrazides of N-Heterocyclic Carboxylic Acids	280
From Salicylaldehyde and Hydrazides of Other Heterocyclic Carboxylic Acids	285
From Salicylaldehyde and Oxamohydrazide or Derivatives	287
With Acylhydrazones Derived from 4-Hydroxy-3-methoxy-benzaldehyde	287
With Acylhydrazones Derived from O-Heterocyclic Aldehydes	288
With Acylhydrazones Derived from N-Heterocyclic Aldehydes	292
With Acylhydrazones Derived from Aliphatic Ketones	294
With Acylhydrazones Derived from Aceto- or Benzophenone	299
With Acylhydrazones Derived from 2-Hydroxyacetophenone or Related Compounds ..	300
With Acylhydrazones Derived from 1-Hydroxy-2-acetonaphthone	306
With Acylhydrazones Derived from Heterocyclic Oxo Compounds	307
31.2.2 With Ligands Containing Two Azomethine Groups	310
With the Condensation Product of Benzaldehyde and 2,6-Pyridinebis(carbohydrazide)	310
With Condensation Products of Salicylaldehyde and Dihydrazides	310
With Condensation Products of Ketones and Dihydrazides	313
With the Condensation Product of Acetone and Carbonic Dihydrazide	316
With Condensation Products of Salicylaldehyde or Derivatives and Carbonothioic Dihydrazide	316
With Bis(acylhydrazones) of Terephthalaldehyde	317
With Bis(acylhydrazones) of Acetylacetone	318
With Bis(acylhydrazones) of 2,6-Diacetylpyridine	320
With Bis(thioacylhydrazones) of Alkanediones	325
31.3 Complexes with Semicarbazones	325
31.3.1 With Semicarbazones of Hydroxybenzaldehydes or -naphthaldehyde	325
31.3.2 With Semicarbazones of Ketones	327
With Semicarbazones of Alkanones	327
With Semicarbazones of Phenylalkenone or Diphenylalkadienone	328
With a Semicarbazone of a Heterocyclic Oxo Compound	329
31.3.3 With Monosemicarbazones of Benzil or Oxo Carboxylic Acids	330
31.3.4 With Monosemicarbazones of Quinones	331
31.3.5 With Monosemicarbazones of Heterocyclic Dioxo Compounds	332
31.3.6 With Bissemicarbazones	333
31.4 Complexes with Amidinohydrazones	336

	Page
31.5 Complexes with Thiosemicarbazones	337
General Aspects	337
31.5.1 With Thiosemicarbazones of Benzaldehyde or Substituted Benzaldehydes	338
31.5.2 With Thiosemicarbazones of Hydroxybenzaldehydes or -naphthaldehydes	339
31.5.3 With Thiosemicarbazones of Alkanones	341
31.5.4 With Thiosemicarbazones of 4-Phenyl-3-buten-2-one or 2-Hydroxy-5-methylacetophenone	342
31.5.5 With Thiosemicarbazones of Cycloalkanones	342
31.5.6 With Thiosemicarbazones of Diacetyl Oxime or Oxo Carboxylic Acids	344
31.5.7 With Thiosemicarbazones of Quinones	346
31.5.8 With Thiosemicarbazones of Aldehydes or Ketones Containing Heterocyclic Groups	347
31.5.9 With Thiosemicarbazones of Heterocyclic Oxo Compounds	350
31.5.10 With Bisthiosemicarbazones	351
With Bisthiosemicarbazones of Glyoxal or 1,2-Diketones	351
With Bisthiosemicarbazones of Other Dioxo Compounds	352
31.5.11 With Condensation Products of 2-Hydroxybenzaldehydes and S-Alkyl-isothiosemicarbazides	354
31.5.12 With Condensation Products of Aldehydes and Thiocarbazoyl Carbohydrazides	356
31.6 Complexes with Condensation Products of Aldehydes or Ketones and Carbazates or Thiocarbazates	360
31.6.1 With Ethyl Salicylidenecarbazate	360
31.6.2 With Ligands Derived from Salicylaldehyde or Acetylacetone and O-Ethyl Thiocarbazate	361
31.6.3 With Ligands Derived from Aldehydes and Methyl Dithiocarbazates	361
31.6.4 With Ligands Derived from Ketones and Methyl Dithiocarbazates	363
31.7 Complexes with Dimethyl Carbonohydrizonodithioate	364
32 Complexes with Carbazones, Thiocarbazones, and Formazans	365
32.1 Complexes with 1,5-Diphenylcarbazone or Derivatives	365
32.2 With 1,5-Diphenylthiocarbazone or Related Compounds	366
32.3 Complexes with Diphenylformazans	368
Ligand Formula Index	369
Physical Constants and Conversion Factors	415
