Speech of the Minister of Justice of Rheinland-Pfalz (Germany) Peter Caesar at the occasion of the opening of the 14th Congress of the International Society of Forensic Haemogenetics	1
--	---

1 PCR Systems

1.1 General

Some Considerations for use of AMP-FLPS for Identity Testing (<i>B. Budowle, F. S. Baechtel, and C. T. Comey</i>)	11
Forensic Use of Short Tandem Repeats via PCR (<i>C. T. Caskey and H. A. Hammond</i>)	18
Automation of the Amplification and Sequencing of Mitochondrial DNA (<i>K. M. Sullivan, R. Hopgood, and P. Gill</i>) ...	26

1.2 Methodology

The Development and Evaluation of New Genetic Markers for the Application of PCR to Forensic Casework (<i>R. Reynolds, R. Saiki, M. Grow, N. Fildes, G. McClure, S. Scharf, S. Cosso, S. Walsh, and H. Erlich</i>)	29
Investigations to Improve Allele Definition in the "Collagen 2A1" System (AMP-FLP) (<i>C. Puers, P. Wiegand, and B. Brinkmann</i>)	32
Automated Analysis of Fluorescent Amplified Fragment Length Polymorphisms for DNA Typing (<i>J. Robertson, T. Schaefer, M. Kronick, and B. Budowle</i>)	35
Sex Identification of Forensic Samples Using PCR Analysis for the Presence of Y-Chromosome Specific DNA Sequences (<i>S. Nørby and B. Eriksen</i>)	38

Automation of DNA Profiling by Fluorescent Labelling of PCR Products (<i>K.M. Sullivan, S. Pope, C. Kimpton, P. Gill, and J. Sutton</i>)	41
PCR Typing Including High Resolution Gel Electrophoresis Reveals new Alleles in the COL2A1 VNTR (<i>E.S. Berg and B. Olaisen</i>)	44
The Usefulness of Chelating Resins for DNA Extraction from Forensic Material Prior to PCR Amplification (<i>M. V. Lareu, M.S. Rodriguez-Calvo, F. Barros, and A. Carracedo</i>) ...	47
The Isolation of DNA for Forensic PCR Analysis. An Evaluation of Available Methodologies (<i>R. Coquoz</i>)	50
Detection of Three Different VNTR's by DNA-Amplification (<i>A. Kloosterman, R. Vossen, D. Wust, W. de Leeuw, and A. Uitterlinden</i>)	53

1.3 Practical Application

Validation of the Use DNA Amplification for the Analysis of Forensic Samples by Comparison with Tests Using Non-Amplified DNA Polymorphisms (<i>L. Perlee and I. Balazs</i>)	57
Investigations on the Forensic Application of 4 AMPFLP Systems (<i>P. Wiegand, S. Rand, and B. Brinkmann</i>) ..	60
SDS-Page Typing of HLA-DQA1 and PMCT118 after PCR Amplification (<i>F. Barros, M. C. Vide, M. V. Lareu, and A. Carracedo</i>)	64
Gene Frequencies of ApoB Alleles in a Sample of Random Italian Individuals (Central and Southern Italy) (<i>E. d'Aloja, M. Dobosz, M. Pescarmona, A. Moschetti, and V. L. Pascali</i>)	67
Study of the HLA DQ α Polymorphism in the Population of Catalonia (Spain) (<i>M. Gené, E. Huguet, A. Carracedo, and J. Mezquita</i>)	70
Use of PCR for Forensic Analysis of DNA from Formaldehyde Fixed and Paraffin Embedded Human Tissues (<i>B. Ludes, M. C. Tortel, and P. Mangin</i>)	72
Comparison of Population Data Using 3 AMPFLP Systems (<i>K. Skowasch, M. Schürenkamp, and S. Rand</i>)	75
The Amplified Fragment Length Polymorphism Study of Locus PMCT118 and its Application in Forensic Biology (<i>Li Boling, Ding Yan, Ni Jintang, Chen Song, Hu Lan, and Ye Jian</i>)	78

DNA Typing from Formalin-Fixed, Paraffin-Embedded Tissues (<i>H. Fukushima, M. Ota, K. Tanaka, A. Ichinose, K. Sato, and K. Honda</i>)	81
HLA-DQA1 and HLA-DPB1 Gene Polymorphisms in the Japanese Populations (<i>A. Ichinose, M. Ota, H. Inoko, K. Sato, K. Tanaka, K. Kiyono, K. Honda, and H. Fukushima</i>)	84
The Study of ApoB Locus AMP-FLP and its Application in Forensic Sciences (<i>Li Boling, Ding Yan, Ni Jintang, Chen Song, Hu Lan, and Ye Jian</i>)	87
Application of HLA-Class II Genotyping by the Modified PCR-RFLP Method to the Forensic Science (<i>M. Ota, H. Inoko, T. Seki, A. Ichinose, K. Honda, K. Tsuji, and H. Fukushima</i>)	90
Simultaneous DNA Analysis of HLA-DPB and DQB Loci from Single Hairs: A Criminal Case Report (<i>S. Pelotti, V. Mantovani, G. Angelini, F. Barboni, and G. Pappalardo</i>)	93
Sex Determination by Genomic Dot Blot Hybridization and HLA-DQ α Typing by PCR from Fixed Tissues (<i>L. Pötsch, L. Penzes, M. Prager-Eberle, P. M. Schneider, and C. Rittner</i>)	96
HLA-DQ α Typing of Human Fingernails (<i>L. Pötsch, L. Penzes, M. Prager-Eberle, and C. Rittner</i>)	99
Identification of Fire Victims by Using DNA Amplification (PCR) (<i>A. Sajantila, M. Ström, B. Budowle, P. J. Karhunen, and L. Peltonen</i>)	102
Polymerase Chain Reaction: Typing of DNA Isolated from Various Forms of Biological Evidence (<i>J. Schnee and S. Aab</i>)	106
Analysis of D1S80 (PMCT 118) Locus Polymorphism in an Italian Population Sample by the Polymerase Chain Reaction (<i>A. Tagliabracci, R. Giorgetti, A. Agostini, M. Cingolani, and S. D. Ferrara</i>)	109
Sex Determination in Bloodstains and Single Hairs (<i>K. Tanaka, H. Fukushima, M. Ota, A. Ichinose, K. Sato, K. Honda, and S. Kiyono</i>)	112
Analysis of Forensic Stains via PCR Amplification of Polymorphic Simple (gata) _n Repeats (<i>L. Roewer, J. Arnemann, and J. T. Epplen</i>)	115
Species Identification by Polymerase Chain Reaction and Direct Sequencing (<i>S. Tsuchida, F. Umenishi, and S. Ikemoto</i>) ..	118

2 DNA (RFLP, VNTR) Systems

2.1 General

Paternity Investigations Based on DNA-Analysis only (<i>W. Bär and A. Kratzer</i>)	123
Achievement of Interlaboratory Uniformity – A Summary of Work Carried out by the EDNAP Group (<i>P. Gill, S. Woodroffe, W. Bär, B. Brinkmann, A. Carracedo, B. Eriksen, S. Jones, A. D. Kloosterman, B. Ludes, B. Mevag, V. L. Pascali, M. Rudler, H. Schmitter, P. M. Schneider, and J. A. Thomsón</i>)	126
Cloning and Characterisation of Novel Single Locus Probes for Forensic Purposes (<i>C. P. Kimpton, R. Hopgood, S. K. Watson, P. Gill, and K. Sullivan</i>)	129

2.2 Methodology

The Use of a Chemiluminescent Detection System for Paternity and Forensic Testing. Verification of the Reliability of the Oligonucleotide-Probes Used for Genetic Analysis (<i>J. Neuweiler, J. Venturini, I. Balazs, S. Kornher, D. Hintz, and J. Victor</i>)	132
A Multi-Locus Probe for Human DNA Fingerprinting Based on <i>CHI</i> -like Sequences (<i>N. Z. Ehtesham and S. E. Hasnain</i>)	137
The Effects of Using Different Molecular Weight Markers in DNA Profiling (<i>M. J. Greenhalgh</i>)	140
Influence of Agarose Concentration and Electric Field Strength on the Separation of DNA-Fragments During Electrophoresis (<i>B. L. Guo, M. Prinz, and M. Staak</i>)	143
Size Calculations of Restriction Fragments: Comparison Between Two Laboratories (<i>L. Henke, P. H. van Eede, J. Henke, and G. G. de Lange</i>)	146
Matching Criteria for Paternity Testing with VNTR Systems (<i>N. Morling and H. E. Hansen</i>)	149
Computer-Aided Fragment Size Determination of Single Locus DNA Probes (<i>M. Muche</i>)	153
Chemiluminescent Detection of Single Locus and Multilocus Hybridization Patterns (<i>M. Prinz, C. Loch, and M. Staak</i>)	156
Precision and Accuracy in the Analysis of VNTR Polymorphisms for Paternity Testing (<i>S. C. Reavis, T. Schlaphoff, R. Martell, and E. D. du Toit</i>)	159

A Simple Method to Prevent Inhibition of TAQ Polymerase and HINF1 Restriction Enzyme in DNA Analysis of Stain Material (<i>W. Pflug, G. Mai, G. Wahl, S. Aab, B. Eberspächer, and U. Keller</i>) ...	163
Optimal Size Calling Methods for Electrophoretic Analysis Utilizing Internal Size Standards (<i>K. Corcoran, E. Mayrand, J. Robertson, T. Shaefer, and M. Kronick</i>)	166
Extraction of DNA from Coagulated Blood Samples (<i>R. Scheithauer and H. J. Weisser</i>)	169
Investigation of Variation in Fragment Size Determinations Found when Using Single Locus DNA Probes (<i>J. A. Thomson, T. Fedor, M. Gouldstone, P. J. Lincoln, C. P. Phillips, D. Syndercombe Court, V. Tate, and P. H. Watts</i>)	172
Optimization of the Digoxigenin/Chemiluminescence Method for the VNTR Detection (<i>N. Dimo-Simonin, C. Brandt-Casadevall, and H. R. Gujer</i>)	175

2.3 Practical Application

Paternity Analysis Using the Multilocus DNA Probe MZ 1.3 (<i>P. M. Schneider, R. Fimmers, U. Schacker, and C. Rittner</i>)	179
Analysis of Australian, Black, Caucasian, Chinese and Amerindian Populations with Hypervariable DNA Loci (<i>I. Balazs, J. Neuweiler, R. C. Williams, and C. Lantz</i>)	182
The Application of DNA-Polymorphisms in Paternity Testing (<i>M. Basler, W. Sprecher, M. Rink, and K.-S. Saternus</i>)	184
Allele Frequency in the Population of Spain Using Several Single Locus Probes (<i>E. Valverde, C. Cabrero, A. Diez, A. Carracedo, and T. Borrás</i>)	187
DNA Fingerprints of Families from Bejsce/South-East Poland (<i>T. Dobosz, P. Koziol, K. Sawicki, M. Szczepaniak, J. Jagielski, C. Vogt, and S. Szymaniec</i>)	190
Paternity Testing with Five VNTR System in Danes (<i>H. E. Hansen, and N. Morling</i>)	192
Comparison of Population Genetics of the Single Locus Probes PS194 and PL427-4 (<i>W. Martin, H. H. Hoppe, and M. Muche</i>)	195
Comparison of Minisatellite DNA Probes and Blood Group, Protein, and Enzyme Markers in Paternity Cases (<i>G. Mauff, G. Pulverer, E. Mühlenbrock, L. Kochhan, A. Klein, K. Volz, A. Bräutigam, K. Hummel, R. Fimmers, and M. P. Baur</i>)	198

Allele Frequency Distribution of Two VNTR Polymorphisms (YNH24/D2S44; Alpha Globin 3'HVR/D16) in Italy (<i>V.L. Pascali, M. Dobosz, M. Pescarmona, E. d'Aloja, and A. Fiori</i>) ..	201
DNA-Profiling with PHINS310, PMUC7, PMR24/1, PYNH24 and PMS43A for Paternity Testing (<i>T. Rothämel, H.J. Krüger, W. Keil, and H.D. Tröger</i>)	204
Frequency Databases for the DNA Probes MS1, MS31, MS43A, and YNH24, Derived from Caucasians, and Afrocaribbeans in the London Area (<i>C. Buffery, F. Burridge, M. Greenhalgh, S. Jones, and G. Willott</i>)	207
An Evaluation of Single Locus Probes in Casework (<i>F.J. Burridge, M.J. Greenhalgh, and G.M. Willott</i>)	210
On DNA Typing of Hard Tissues (<i>U. Hammer, U. Bulnheim, and R. Wegener</i>)	213
Use of the Minisatellite Probe MZ 1.3 for Identification and Relation of Dismembered Corpses (<i>W. Huckenbeck and H. Müller</i>)	216
RFLP in Conjunction with Anatomical Traits in Individualisation of Bone (<i>G. V. Rao and V. K. Kashyap</i>)	219
Application of DNA Fingerprinting to Problematical Paternity Cases (<i>T. Kishida, M. Fukuda, and Y. Tamaki</i>)	222
Application of Conventional Polymorphisms and Single Locus DNA Probes in Cases of Disputed Paternity (<i>P.J. Lincoln, C.P. Phillips, D. Syndercombe Court, J.A. Thomson, and P.H. Watts</i>)	225
MS1, MS31 and MS43A Single Locus Probes: A Preliminary Study in the Basque Population and its Application in Paternity Testing (<i>S. Alonso, A. Castro, A. García-Orad, P. Arizti, G. Tamayo, and M. Martínez de Pancorbo</i>)	228
DNA Fingerprinting with Probes 33.15 and 33.6 in Population from the Basque Country (<i>S. Alonso, A. Castro, A. García-Orad, P. Arizti, G. Tamayo, and M. Martínez de Pancorbo</i>)	231
Casuistic: The Use of DNA-Fingerprinting in Cases of Affiliation Without Mother (<i>W. Huckenbeck, H. Müller, and M. Prinz</i>)	234
Results of DNA Analysis from Six Forensic Science Laboratories in Germany (<i>W. Pflug, J. Teifel-Greding, S. Herrmann, M. Gerhard, R. Wenzl, and H. Schmitter</i>)	237
Allele Frequencies for Five Different Single Locus Probes in a Population of South-West Germany (<i>W. Pflug, G. Bäßler, G. Mai, U. Keller, S. Aab, B. Eberspächer, and G. Wahl</i>)	240

Distribution of Variable Number of Tandem Repeat (VNTR) DNA Polymorphism at D2S44 Locus in Tuscany (Italy) <i>R. Domenici, I. Spinetti, M. Nardone, M. Pistello, and L. Ceccherini-Nelli</i>	243
Experiences with Six Single Locus Probes in Paternity Testing <i>(B. Brüggemann, D. Teixidor, M. Kilp, and S. Seidl)</i>	246
Detection of DNA Polymorphisms by Using α Satellite Probes: Application to the Forensic Identification <i>(M. Yamada, Y. Yamamoto, T. Fukunaga, Y. Tatsuno, and K. Nishi)</i> ..	249
Population Genetic Studies of Six Hypervariable DNA-Loci <i>(A. Wilting, U. Hintzen, M. O. Völker, and J. Bertrams)</i>	252
Minisatellite DNA Probe MZ1.3: Band Sharing Rates Among Siblings and the Part of Informative Bands Among Children <i>(D. Padeberg, U. Hintzen, and J. Bertrams)</i>	255
DNA Fingerprinting in Paternity Testing in Lithuania <i>(V. Naktinis, V. Popendikyte, G. Khvatovitch, and G. Garmus)</i>	258
DNA Typing in Forensic Casework in Norway: Strategies and Experiences <i>(B. Mevåg, S. Jacobsen, B. Eriksen, and B. Olaisen)</i>	260
Determination of Incest in Forensic Casework Using Multi-Locus DNA Profiling <i>(P. L. Ivanov, L. V. Verbovaya, and M. B. Maljutov)</i>	263

3 Biostatistics and Databases

The Robustness of Models for Evaluating Patterns of DNA Multi-Locus Probes <i>(Ch. Brenner)</i>	269
Comparison of Different Methods for the Calculation of Indices for Paternity <i>(R. Fimmers, P. M. Schneider, and M. P. Baur)</i>	277
How to Deal with Mutations in DNA-Testing <i>(R. Fimmers, L. Henke, J. Henke, and M. P. Baur)</i>	285
The Relationship of the HLA Phenotype Frequency of the Alleged Father to the Resulting Paternity Index in Caucasian Non-Exclusion Paternity Cases <i>(R. H. Walker and A. B. Eisenbrey)</i>	288
DNASY5: A User-Friendly Computer Program for Evaluating Single Locus Probe Data in Forensic Casework <i>(I. W. Evett, R. Pinchin, and J. Scrannage)</i>	291

Series Sexual Crimes Identified by a DNA Computerised Database (<i>J.E. Allard</i>)	295
Experiences with a Computerised Database of DNA Profiles in Forensic Casework (<i>M.J. Greenhalgh and J.E. Allard</i>)	298

4 Conventional Systems

4.1 General

Genetic and Molecular Aspects of the Human Red Cell Acid Phosphatase Polymorphism (<i>J. Dissing</i>)	303
A de novo Mutation in the Alpha-1-Antitrypsin Gene Detected in a Case of Disputed Paternity by DNA Sequence Analysis (<i>S. Weidinger, J.-P. Faber, U. Bäcker, F. Schwarzfischer, and K. Olek</i>)	306
Isoelectric Focusing of Inter-Alphatrypsin-Inhibitor (ITI) (<i>C. Luckenbach, J. Kömpf, A. Amorim, J. Rocha, and A. Trein</i>)	309
Human ZN-Alpha 2-Glycoprotein Phenotyping in Several Populations (<i>N. Nakayashiki, I. Yuasa, K. Umetsu, K. Suenaga, K. Omoto, T. Ishida, S. Misawa, and S. Katsura</i>)	311
Comparative Typing of Orosomucoid Variants and Proposal for a New Nomenclature (<i>I. Yuasa, S. Weidinger, and K. Umetsu</i>) ..	314
Intragenic Recombination Within the Alpha-1-Antitrypsin Locus (<i>G. Wetterling</i>)	317

4.2 Methodology

Blotting Techniques for the Detection of Protein Polymorphisms in Stains (<i>S. Rand</i>)	320
Two-Dimensional Isoelectric Focusing Analysis of Rare and Silent Esterase D Types. Description of a New ESD Variant Phenotype (<i>A. Alonso, S. Weidinger, G. Visedo, M. Sancho, and J. Fernandez-Piqueras</i>)	329
A Simple Technique for the Determination of GGTP Types (<i>M. Oya, Y. Kimura, N. Komatsu, and A. Kido</i>)	332
New Variation in Low-Sulphur Keratins Detected by Hybrid Isoelectric Focusing (HIEF) (<i>M.S. Rodriguez-Calvo, I. Muñoz, and A. Carracedo</i>)	335

The Influence of Infused Erythrocytes on the Detection of Individual Membrane-, Enzyme- and DNA-Systems (<i>W. Huckenbeck, B. Mainzer, P. Lipfert, H. Müller, A. Wehr, and V. Stancu</i>)	338
Serum Protein Typing/ -Subtyping by IEF in PAG (<i>G. Geserick, H. Schröder, A. Correns, P. Otremba, and H. Waltz</i>)	341
Dot Blot Immunoassay for Detection of HLA Antigens in Forensic Stains (<i>D. V. Rao and V. K. Kashyap</i>)	344
The Use of Microtiter Techniques for the Determination of Red Blood Cell Phenotypes in Paternity Testing (<i>D. Mayr and W. R. Mayr</i>)	347
D ^u Detection by an Automated Direct Agglutination Method that Equals Detection by Indirect Antiglobulin Test (<i>J. Obst</i>)	350
Absorption-Elution Test for AB0-Determination of Secretor and Nonsecretor Saliva Stains (<i>J. Bolt and J. Lötterle</i>)	353
Determination of ORM Phenotypes Using Gels Precotes 4-6 ^R and Phastsystem TM (<i>M. De la Iglesia, A. Gremo, M. A. Martínez-Aguilera, and J. M. Ruiz De la Cuesta</i>)	356
Fast Determination of TF Phenotypes Using Minigels Gradient 4-6,5 Modified (<i>M. De la Iglesia, M. A. Martínez-Aguilera, A. Gremo, J. M. Ruiz De la Cuesta</i>)	359
The Use of Microtiter Plates and the Apparatus Dynatech for Automation of the Routine Determination of AB0-Group from Body Fluids (or Stains) and Hair (<i>P. Makovec, M. Laupy, and M. Brezina</i>)	362
P1, C2, GC, ATIII, PLG Typing in Bloodstains by Hybrid Isoelectric Focusing (HIEF) (<i>I. Muñoz, A. Carracedo, L. Concheiro, and V. L. Pascali</i>)	364

4.3 Practical Application

Parentage Testing Using DBP Subtyping in South African (SA) Populations (<i>W. Petersen, T. Schlaphoff, R. Martell, and E. du Toit</i>)	367
Iso-Electric Focusing Study of Serum Proteins (GC, TF, PI and ORM) in Four Endogamous Groups of Maharashtra, Western India: Application in Paternity Testing (<i>S. S. Mastana, V. Ray, S. S. Bhattacharya, and S. S. Papiha</i>)	370
PGM1 System: A Rare Allele and an Intragenic Recombination in Two Cases of Disputed Paternity (<i>M. L. Pontes, M. F. Pinheiro, and A. C. Gomes</i>)	373

Genetic Markers (HP, TF, GC and PI) in Two Polish Population Samples. Preliminary Report (<i>H. Walter, H. Danker-Hopfe, M. Lemmermann, and M. Lorenz</i>)	376
Haptoglobin Subtypes in Lower Saxony (Germany) (<i>M. Basler, G. Lang, and K.-S. Saternus</i>)	379
C4 Phenotype and Gene Distribution in a Population of Eastern Lombardy (Italy) (<i>N. Cerri, F. de Ferrari, G. Carella, A. Malagoli, and R. Cattaneo</i>)	382
Distribution of Transferrin (TF), Red Cell Acid Phosphatase (EAP), Esterase D (ESD) and Group Specific Component (GC) Phenotypes in China (<i>Guo Da Wei, Xui Xiao Li, Xing Xiao Ping, and Wang Lin</i>)	385
Null and Rare Alleles in Paternity Testing (<i>A. C. Gomes, M. F. Pinheiro, M. L. Pontes, A. Santos, and J. Pinto da Costa</i>)	389
Comparative Subtyping of ACP-1, PGM-1 and ESD in Human Placenta and Cord Blood by Isoelectric Focusing: Practical Considerations of Forensic Significance (<i>M. J. Iturralde, M. Montesino, A. Alonso, I. Montesino, and M. Sancho</i>)	391
Distribution of Adenosine Deaminase (EC 3.5.4.4) Phenotypes in a Series of HIV-Seropositive Patients (<i>W. Huckenbeck, B. Jacob, B. M. E. Kuntz, and H. T. Brüster</i>)	394
Determination of C1R Types in Bloodstains (<i>A. Kido, N. Komatsu, Y. Kimura, and M. Oya</i>)	397
Coagulation Factor XIII B Phenotyping in a Japanese Population and in Bloodstains (<i>N. Komatsu, A. Kido, Y. Kimura, and M. Oya</i>) ..	400
Formal Genetic Data on ORM1 Subtypes (<i>C. Luckenbach, J. Kömpf, H. Ritter, J. Rocha, and A. Amorin</i>)	403
Species Identification from Tissue Particles Using Lectin- and Immuno-Histochemical Methods (<i>K. Nishi, T. Fukunaga, Y. Yamamoto, M. Yamada, M. Kane, N. Ito, and S. Kawahara</i>)	407
Polymorphism of Plasminogen in Sardinia (Italy) (<i>R. Domenici and I. Spinetti</i>)	410
Haptoglobin Subtypes in a Population from South West Germany (<i>U. Härle, W. Reichert, R. Mattern, and G. Pfaff</i>)	413
Plasma Protein Polymorphism in HIV-Seropositive Patients: GC- and TF* C-Subtypes and PI-System (<i>W. Huckenbeck, V. Stancu, B. M. E. Kuntz, and H. T. Brüster</i>)	416
Determination of PGM, ESD, GLO (1) and EAP Polymorphs from Human Dental Pulp (<i>A. Sharma, V. K. Arora, and V. Bhalla</i>) ...	419

Haptoglobin Subtyping by Polyacrylamide Gel Isoelectric Focusing of Serum, Hemolyzed Blood and Bloodstains (<i>A. Correns, D. Patzelt, P. Otremba, H. Schröder, and G. Geserick</i>)	422
Detection of Blood Group H Antigens of Red Cells, Blood and Saliva Stains, and Hairs by Anti-H Reagents (<i>K. Furukawa, T. Nakajima, T. Matsuki, and K. Kubo</i>)	425
Evaluation of Sperm Specific Lactate Dehydrogenase Isoenzyme C4 (LDH C4). Application to Semen Detection in Stains (<i>R. Pawlowski and B. Brinkmann</i>)	428
PGM1 Subtyping by Isoelectric Focusing (IEF) in Parentage Testing in South African (SA) Populations (<i>V. Borrill, W. Petersen, R. Martell, and E. du Toit</i>)	431
Orosomuroid (ORM) Phenotyping by Isoelectric Focusing in Immobilized PH-Gradient Followed by Immunoblotting (<i>W. Huckenbeck, S. Weidinger, and V. Stancu</i>)	434
AB0 Blood Grouping and Species Identification of Bloodstains by Sandwich ELISA Using Monoclonal Antibody Specific for Human Erythrocyte Band 3 (<i>A. Kimura, T. Uda, S. Nakashima, M. Osawa, H. Ikeda, S. Yasuda, and T. Tsuji</i>)	437
Monoclonal Antibodies to Blood Group Substances in Vaginal Secretions (<i>A. Kimura, M. Osawa, H. Ikeda, S. Yasuda, T. Tsuji, S. Rand, and B. Brinkmann</i>)	440
GC in Human Saliva Stains (<i>J. Lötterle and J. Bolt</i>)	443
Immunoblotting and Immunofixation Techniques for Subtyping GC in Old Bloodstains and Semen Stains (<i>I. López-Abadía, A. Gremo, and J.M. Ruiz De la Cuesta</i>)	446
Old Bloodstain and Semen Stain Characterization in the Transferrin Typing System Using Minigels and Phastsystem (<i>I. López-Abadía, A. Gremo, and J.M. Ruiz De la Cuesta</i>)	449
