<i>B. Streit, T. Städler and C.M. Lively</i>	
Introduction	IX

Ecosystem structure and trophic interactions

<i>M.A. Leibold and A.J. Tessier</i>	
Habitat partitioning by zooplankton and the structure of lake ecosystems	3
<i>M.J. Winterbourn</i>	
New Zealand mountain stream communities: Stable yet disturbed?	31
<i>C. Brönmark, J. Dahl and L. Greenberg</i>	
Complex trophic interactions in freshwater benthic food chains	55
<i>D.E. Wooster, A. Sih and G. Englund</i>	
Prey dispersal and predator impacts on stream benthic prey	89

Aspects of life-history evolution

<i>N. Walz</i>	
Rotifer life history strategies and evolution in freshwater plankton communities	119
<i>D. Ebert</i>	
The evolution and genetics of maturation in <i>Daphnia</i>	151
<i>J. Jokela</i>	
Optimal energy allocation tactics and indeterminate growth: Life-history evolution of long-lived bivalves	179

Population biology and reproductive modes

<i>K. Schwenk and P. Spaak</i>	
Ecology and genetics of interspecific hybridization in <i>Daphnia</i>	199
<i>T. Städler and P. Jarne</i>	
Population biology, genetic structure, and mating system parameters in freshwater snails	231
<i>S.G. Johnson, C.M. Lively and S.J. Schrag</i>	
Evolution and ecological correlates of uniparental and biparental reproduction in freshwater snails	263

B. Okamura

Genetic similarity, parasitism, and metapopulation structure
in a freshwater bryozoan 293

Evolutionary processes following colonizations

M.A. Bell and C.A. Andrews

Evolutionary consequences of postglacial colonization
of fresh water by primitively anadromous fishes 323

Subject index 365
