

Contents

List of contributors	VII
<i>Edward D. Levin</i>	
The rationale for studying transmitter interactions to understand the neural bases of cognitive function	1
<i>Mohammad R. Zarrindast</i>	
Neurotransmitters and cognition	5
<i>Geoff Warnock, Jos Prickaerts and Thomas Steckler</i>	
Interactions between CRF and acetylcholine in the modulation of cognitive behaviour	41
<i>Martin Sarter, John P. Bruno, Vinay Parikh, Vicente Martinez, Rouba Kozak and Jerry B. Richards</i>	
Forebrain dopaminergic-cholinergic interactions, attentional effort, psychostimulant addiction and schizophrenia	65
<i>James J. Chrobak, Helen R. Sabolek and Jamie G. Bunce</i>	
Intraseptal cholinergic infusions alter memory in the rat: method and mechanism	87
<i>Jörg-Peter Ewert and Wolfgang W. Schwippert</i>	
Modulation of visual perception and action by forebrain structures and their interactions in amphibians	99
<i>Adi Guterman and Gal Richter-Levin</i>	
Neuromodulators of LTP and NCAMs in the amygdala and hippocampus in response to stress	137
<i>Patrizio Blandina and Maria Beatrice Passani</i>	
Central histaminergic system interactions and cognition	149
<i>Hans C. Dringenberg and Min-Ching Kuo</i>	
Cholinergic, histaminergic, and noradrenergic regulation of LTP stability and induction threshold: cognitive implications	165

Edward D. Levin and Amir H. Rezvani
Nicotinic-antipsychotic drug interactions and cognitive function 185

Robert D. Oades
Function and dysfunction of monoamine interactions in children
and adolescents with AD/HD 207

José Larrauri and Nestor Schmajuk
Prepulse inhibition mechanisms and cognitive processes:
a review and model 245

Index 279
