<b>Part I</b>	<b>Fundamentals</b>	<b>1</b>
<b>1</b>	<b>Introduction</b>	<b>3</b>
<b>2</b>	<b>Fundamental Risk Factors of Financial Markets</b>	<b>7</b>
2.1	Interest Rates	7
2.1.1	Day Count Conventions	8
2.1.2	Business Day Conventions	12
2.1.3	Discount Factors	13
2.1.4	Compounding Methods	14
2.1.5	Spot Rates	20
2.1.6	Forward Rates	20
2.2	Market Prices	24
2.3	An Intuitive Model for Financial Risk Factors	25
2.3.1	Random Walks as the Basis for Pricing and Risk Models	25
2.3.2	Risk Factors as Random Walks	28
2.4	Ito Processes and Stochastic Analysis	36
2.4.1	General Diffusion Processes	36
2.4.2	Ito's Lemma	37
2.4.3	Transition Probabilities, Forward and Backward Equation	44
2.4.4	Forward and Backward Equation in the Black-Scholes World	52

<b>3</b>	<b>Financial Instruments: A System of Derivatives and Underlyings</b>	<b>55</b>
3.1	Issuer and Counterparties	55
3.2	Spot Transactions	56
3.3	Forward Transactions	57
3.3.1	Forward Rate Agreements and Forwards	57
3.3.2	Financial Futures	58
3.3.3	Swaps	60
3.4	Options	61
3.5	Classification of Fixed Income Securities	64
3.5.1	Money Market Securities	65
3.5.2	Capital Market Securities	69
<b>Part II</b>	<b>Methods</b>	<b>73</b>
<b>4</b>	<b>Overview of the Assumptions</b>	<b>75</b>
<b>5</b>	<b>Present Value Methods, Yields and Traditional Risk Measures</b>	<b>79</b>
5.1	Present Value and Yield to Maturity	79
5.2	Internal Rate of Return and Net Present Value	81
5.3	Accrued Interest, Residual Debt and Par Rates	85
5.4	Traditional Sensitivities of Interest Rate Instruments	89
5.4.1	Average Lifetime and Macaulay Duration	89
5.4.2	Modified Duration and Convexity	90
5.4.3	Summation of Traditional Sensitivities	95
<b>6</b>	<b>Arbitrage</b>	<b>97</b>
6.1	Forward and Futures Contracts	97
6.1.1	Forward Price and Cash and Carry Arbitrage	97
6.1.2	The Stochastic Process for the Forward Price	100
6.1.3	Forward Positions	101
6.1.4	Futures Positions and Basis Risk	101

6.2	Options	102
6.2.1	Upper and Lower Bounds for Option Prices	102
6.2.2	Early Exercise of American Options	104
6.2.3	Relationships Between Puts and Calls	105
7	<b>The Black-Scholes Differential Equation</b>	107
7.1	Derivation of the Black-Scholes Equation from Arbitrage Arguments	108
7.1.1	The Black-Scholes Equation for European Options	109
7.1.2	The Black-Scholes <i>Inequality</i> for American Options	111
7.1.3	A First Contact with the Risk-Neutral World	114
7.2	The Black-Scholes Equation and the Backward Equation	115
7.2.1	A Second Contact with the Risk-Neutral World	118
7.3	The Relationship to the Heat Equation	119
8	<b>Integral Forms and Analytic Solutions in the Black-Scholes World</b>	123
8.1	Option Prices as Solutions of the Heat Equation	124
8.2	Option Prices and Transition Probabilities	126
8.3	Compilation of Black-Scholes Option Prices for Different Underlyings	130
8.3.1	Options on the Spot Price	130
8.3.2	Options on the Forward Price	131
8.3.3	Options on Interest Rates	134
9	<b>Binomial and Trinomial Trees</b>	139
9.1	General Trees	140
9.1.1	Evolution of the Underlying and the Replicating Portfolio	140
9.1.2	Evolution of the Derivative	141
9.1.3	Forward Contracts	143

9.2	Recombining Trees	144
9.2.1	The Underlying	144
9.2.2	The Binomial Distribution for European Derivatives	145
9.2.3	A Third Contact with the Risk-Neutral World	149
9.3	Random Walk and Binomial Parameters	153
9.4	The Binomial Model with Infinitesimal Steps	156
9.4.1	Components of the Black-Scholes Option Pricing Formula	158
9.5	Trinomial Trees	159
9.5.1	The Trinomial Tree as an Improved Binomial Tree	162
<b>10</b>	<b>Numerical Solutions Using Finite Differences</b>	<b>165</b>
10.1	Discretizing the Black-Scholes Equation	166
10.1.1	The Explicit Method	167
10.1.2	The Implicit Method	168
10.1.3	Combinations of Explicit and Implicit Methods (Crank-Nicolson)	168
10.1.4	Symmetric Finite Differences of the Underlying Price	170
10.2	Difference Schemes	174
10.2.1	Initial Conditions	178
10.2.2	Dirichlet Boundary Conditions	178
10.2.3	Neumann Boundary Condition	184
10.2.4	Generalized Neumann Boundary Conditions	189
10.2.5	Free Boundary Conditions for American Options	191
10.3	Convergence Criteria	196
10.3.1	Improving the Convergence Properties	199
10.4	Discrete Dividends	201
10.5	Example	202
10.5.1	Relationship Between Explicit Finite Difference and Tree Methods	206

<b>11</b>	<b>Monte Carlo Simulations</b>	207
11.1	A Simple Example: The Area of a Disk	209
11.2	The General Approach to Monte Carlo Simulations	213
11.3	Monte Carlo Simulation of Risk Factors	214
11.3.1	Simulation of the Evolution of a <i>Single</i> Risk Factor	214
11.3.2	Simulation of <i>Several</i> Correlated Risk Factors	218
11.4	Pricing	222
11.5	American Monte Carlo	223
<b>12</b>	<b>Hedging</b>	227
12.1	Hedging Derivatives with Spot Transactions	227
12.1.1	Hedging of Forwards and Futures	230
12.2	Hedging Derivatives with Forward Contracts	232
12.2.1	Hedging with Forwards	232
12.2.2	Hedging with Futures	235
12.3	Hedge-Ratios for Arbitrary Combinations of Financial Instruments	236
12.4	“Greek” Risk Management with Sensitivities	239
12.4.1	Sensitivities and a Portfolio’s Change in Value	239
12.4.2	Omega and Beta	243
12.4.3	Summation of Sensitivities of Different Underlyings	245
12.5	Computation of the Greek Risk Variables	247
12.5.1	Sensitivities in the Binomial Model	247
12.5.2	Sensitivities in the Black-Scholes Model	249
12.5.3	Sensitivities by Means of Finite Difference Methods	250
12.5.4	Sensitivities by Means of Monte Carlo Simulations	251
<b>13</b>	<b>Martingales and Numeraires</b>	253
13.1	The Martingale Property	253
13.2	The Numeraire	255
13.3	Self-financing Portfolio Strategies	260
13.4	Generalization to Continuous Time	263
13.5	The Drift	274

13.6	The Market Price of Risk	278
13.7	Tradable Underlyings	280
13.8	Applications in the Black-Scholes World	282
<b>14</b>	<b>Interest Rates and Term Structure Models</b>	<b>287</b>
14.1	Instantaneous Spot Rates and Instantaneous Forward Rates	288
14.2	Important Numeraire Instruments	290
14.2.1	The Risk-Neutral Measure	291
14.2.2	The Forward-Neutral Measure	293
14.3	The Special Case of Deterministic Interest Rates	294
14.4	Tradable and Non-tradable Variables	296
14.5	Convexity Adjustments	299
14.5.1	In-Arrears Swaps	302
14.5.2	Money Market Futures	304
14.6	Arbitrage-Free Interest Rate Trees Grid (Tree) Models	307
14.6.1	Backward Induction	308
14.6.2	Forward Induction and Green's Functions	312
14.7	Market Rates vs. Instantaneous Rates	317
14.7.1	Arrow-Debreu Prices	318
14.7.2	Pricing Caplets Using Arrow-Debreu Prices	322
14.8	Explicit Specification of Short Rate Models	324
14.8.1	The Effect of Volatility	325
14.8.2	Normal Models	327
14.8.3	Lognormal Models	330
14.9	The Example Program TermStructureModels.xlsm	334
14.9.1	Construction of Interest Rate Trees and Option Pricing	334
14.9.2	Absolute and Relative Volatilities	337
14.9.3	Calibration of Volatilities	338
14.10	Monte Carlo on the Tree	340
14.11	The Drift in Term Structure Models	342
14.11.1	Heath-Jarrow-Morton Models	342
14.11.2	Short Rate Models	343

14.12	Short Rate Models with Discrete Compounding	348
14.12.1	Normal Models	349
14.12.2	Lognormal Models	350
14.13	Other Interest Rate Models	350
<b>Part III</b>	<b>Instruments</b>	<b>353</b>
<b>15</b>	<b>Simple Interest Rate Products</b>	<b>355</b>
15.1	Zero Bonds	356
15.1.1	Cash Flows and Present Value	356
15.1.2	Yield to Maturity and Par Rate	356
15.1.3	Sensitivities	357
15.2	Forward Rate Agreements	357
15.3	Coupon Bonds	360
15.3.1	Cash Flows and Present Value	360
15.3.2	Yield to Maturity	361
15.3.3	Par Rates	363
15.3.4	Sensitivities	365
15.4	Forward Bonds	366
15.4.1	Present Value	366
15.4.2	Forward Par Rate and Forward Yield to Maturity	366
15.5	Interest Rate Futures	367
15.5.1	Futures on Zero Bonds	367
15.5.2	Futures on Coupon Bonds	368
15.6	Floaters	371
15.6.1	Cash Flows and Present Value	372
15.6.2	Yield to Maturity, Par Rate and Sensitivities	375
15.7	Swaps	375
15.7.1	Cash Flows and Present Value	376
15.7.2	Par Swap Rate and Yield to Maturity	378
15.7.3	Sensitivities	381
15.8	Forward Swaps	382
15.8.1	Present Value	383
15.8.2	Forward Par Swap Rates	383
15.8.3	Annuity as Numeraire	385

<b>16</b>	<b>FX Derivatives</b>	<b>389</b>
16.1	FX Forward Rate and Cross Currency Basis	389
16.2	FX Swaps	390
16.2.1	Short Term Financing of Positions in Foreign Currency	392
16.3	FX Forwards and FX Futures	392
16.4	Cross Currency Swaps	393
16.4.1	Plain Vanilla CCY Swap	393
16.4.2	Mark to Market CCY Swaps	393
16.4.3	Cash Flows and Present Value	394
16.5	CCY Basis	396
<b>17</b>	<b>Variants of Fixed Income Instruments</b>	<b>399</b>
17.1	Basis Swaps	399
17.1.1	Present Value and Cash Flows of Basis Swaps	400
17.1.2	Par Basis Swap Spread	401
17.2	Annuity Loans	401
17.2.1	Cash Flows and Residual Debt	401
17.2.2	Present Value	403
17.2.3	Yield to Maturity and Par Rates	407
17.2.4	Sensitivities	409
17.3	Fixing-in-Arrears	410
17.4	Float Rate with Cap/Floor	410
17.5	Call Rights and Break Clause	411
17.6	Reverse Floater	411
17.7	Constant Maturity Swaps	412
<b>18</b>	<b>Plain Vanilla Options</b>	<b>415</b>
18.1	Traditional and General Definition of an Option	415
18.2	Conventions	416
18.3	Options on Spot and Forward Prices	417
18.3.1	European Options	417
