

Contents

1	Why Another Textbook of Radiology?	1
	Can You Imagine Radiology to be Fun?	1
	What Is So Special about Learning (and Teaching) Radiology?	1
	What Makes This Textbook Different to Others?	1
	How Is This Book Structured?	1
	Who Will Accompany You through This Book? ..	2
	What Is There to Say about the Style of the Book?	3

A Short Run through Radiological Basics

3	Tools in Radiology	6
3.1	Projection Radiography	6
	Generation of X-Rays	6
	Attenuation of X-Rays	6
	Detection of X-Rays	6
	Techniques of Exposure	8
	Contrast Media Examinations	8
	Image Processing	8
3.2	Computed Tomography	9
	Working Principle	9
	Contrast Media	10
3.3	Ultrasonography	10
	Working Principle	10
3.4	Magnetic Resonance Tomography	10
	Generation of the MR Signal	11
	What Is So Special about the “External” and “Internal” Magnetic Fields?	13
	How Do We Generate an MR Signal in a Salami?	13
	Spatial Allocation of the MR signal	14
	Analysis of the MR Signal	14
3.5	Our Perception	15
4	Phenomena in Imaging and Perception	18
4.1	What Do I Need to Know for Image Analysis?	18
	Is the Quality of the Study Technically Adequate?	18
	How Do I Analyze an Image?	18

2	Radiology's Role in Medicine	4
	What Is So Different in Radiology as Opposed to Other Clinical Disciplines?	4
	Which Other Special Aspects Are There to Consider?	4
	What Else Could Improve Your Compassion for the Radiologists?	4
	Tissue Characteristics on Radiographic Images	18
	What Is a Normal, What Is a Pathological Finding?	21
	Where is the Pathology?	21
	What Can Go Wrong in Perception?	25
4.2	Can We Reach a Diagnosis that Approaches Histological Certainty?	26
	Are There Any Volume Changes?	26
	What Happens to the Surrounding Anatomy?	26
	What Is the Internal Structure Like?	26
	What Pathology Commonly Occurs in a Particular Anatomical Region?	26
5	Risks, Risk Minimization, and Prophylactic Measures	27
5.1	The Nonindicated Study	27
5.2	The Ill-Prepared Study	28
5.3	Studies with Contrast Media	29
	Contrast Media in Radiography and CT	29
	Contrast Media in Magnetic Resonance Tomography	31
	Contrast Media in Ultrasonography	31
5.4	The False Finding	31
5.5	Risks of Radiological Procedures	32
	Risks of Projection Radiography and Computed Tomography	32
	Risks of Ultrasound	35
	Risks of Magnetic Resonance Tomography	35
5.6	Risks of Intervention	36

From Detection to Diagnosis and Beyond

6	Chest	40
6.1	How Do I Analyze a Radiograph of the Chest?	40
	First Determine the Image Quality	40
	Now Go Ahead and Analyze the Thorax	40
	Now Get Additional Information from the Lateral Chest Radiograph	46
	I See an Abnormality—What Do I Do Now?	46
6.2	Opacities in the Lung	47
	Solitary, Circumscribed Opacity of the Lung	47
	Multiple Lesions in the Lung	56
	Diffuse, Homogeneous Opacity of the Lung	60
6.3	Acute Pulmonary Changes	63
	Acute Diffuse Linear, Reticular, Reticulonodular (Interstitial) Pattern	63
	Acute Diffuse Acinar, Confluent (Alveolar) Pattern	69
6.4	Chronic Lung Disease	72
	Chronic Linear, Reticular, Micronodular (Interstitial) Pattern	72
6.5	Pulmonary Symptoms without Correlating Findings in the Chest Radiograph	78
6.6	Lesions in the Mediastinum	83
	Widening of the Upper Mediastinum	83
	Abnormal Findings of the Lower Mediastinum	86
6.7	Enlargement of the Hila	91
6.8	The Ultimate Exam	93
7	Cardiovascular and Interventional Radiology	97
7.1	Interventions in Vascular Occlusive Disease	99
	Arterial Occlusion	99
	Venous Obstruction	102
7.2	Tissue Biopsies	104
7.3	Insertion of a Drain	107
7.4	Implantation of a Transjugular Intrahepatic Portosystemic Stent-Shunt (TIPSS)	108
7.5	Implantation of a Vena Cava Filter	109
7.6	Implantation of a Port	110
7.7	Embolization	111
7.8	Neural Blockades	113
7.9	Gregory's Test	114

8	Bone and Soft Tissues	115
8.1	How Do You Analyze a Bone Image?	120
	Bone	120
	Joints	120
	Soft Tissues	120
	I See an Abnormality—What Do I Do Now? . . .	121
8.2	Diseases of the Bone	121
	Focal Bone Lesions	121
	Generalized Bone Diseases	132
8.3	Diseases of the Spine	139
8.4	Diseases of the Joints	146
	Joints of the Upper Extremity	147
	Joints of the Lower Extremity	151
8.5	Fracture and Dislocation	161
8.6	Soft Tissue Tumors	162
8.7	Gregory's Test	164
9	Gastrointestinal Radiology	168
9.1	How Do We Analyze an Abdominal Radiograph?	174
	What Can You Evaluate on an Abdominal Radiograph?	174
	Why Are You Interested in the Standard Chest Radiograph in a Patient with Abdominal Pain?	176
	I See an Abnormality—What Do I Do Now? . . .	176
9.2	Patient with Acute Abdominal Pain	177
9.3	Diseases of the Esophagus	182
9.4	Diseases of the Small Bowel	188
9.5	Diseases of the Large Bowel	192
9.6	Problems with Defecation	198
9.7	Diseases of the Liver and the Intrahepatic Biliary System	200
	Focal Liver Lesion	200
	Diffuse Liver Disease	208
9.8	Diseases of the Extrahepatic Biliary System	210
9.9	Diseases of the Pancreas	211
9.10	Diseases of the Peritoneum and Retroperitoneum	214
9.11	Gregory's Test	216

10 Genitourinary Tract	219
10.1 How Do You Assess a Renal Ultrasound?	220
I See an Abnormality—What Do I Do Now? . . .	220
10.2 Renal Masses	221
10.3 Renal Volume Loss/Renal Atrophy	225
10.4 Increase in Renal Volume	226
10.5 Renal Calculi	227
10.6 Adrenal Tumors	228
10.7 Where Is Greg?	229
11 Central Nervous System	231
11.1 How Do You Analyze a Sectional Study of the Head?	233
Key Points of Thorough Image Analysis	233
I See an Abnormality—What Do I Do Now? . . .	234
Are You Ready for Your First Case?	234
11.2 Perfusion Disturbances of the Brain	235
Brain Hemorrhage	235
Cerebral Infarction	237
11.3 Brain Tumors	240
Perisellar Brain Tumors	250
Tumors of the Cerebellopontine Angle	253
11.4 Neurodegenerative Diseases	255
11.5 Congenital Disorders of the Brain	258
11.6 Spinal Cord Tumors	261
11.7 Gregory's Vernissage	266
Solutions to the Test Cases	342
Post Scriptum	344
Index	345

12 Breast	268
12.1 How Do You Analyze a Mammogram?	270
How Do You Evaluate the Image Quality?	270
What Do You Have to Pay Attention to in Image Analysis?.....	270
Ready for Your First Case? Let's Go!	272
12.2 Tumorlike Lesions and Tumors of the Breast	272
12.3 Breast Implant	280
12.4 Tumors of the Male Breast	282
12.5 Dr. Skywang's Test	283
13 Face and Neck Imaging	285
13.1 Diseases of the Nose and Sinuses	286
13.2 Disease of the Ears	292
13.3 Diseases of the Temporomandibular Joint	293
13.4 Injuries and Diseases of the Orbit	294
13.5 Diseases of the Neck	299
13.6 The Teeth You Need	302
14 Trauma	304
14.1 Polytrauma	304
14.2 Luxations and Fractures	331
14.3 Hannah's Test	339
