CHAPTER 1

The Vertebrate Clock: Localisation, Connection and Entrainment

M.H. HASTINGS. With 4 Figures	1
A. Introduction	1
I. Rhythms and Our Lives	1
II. Circadian Rhythms and Internal Temporal Order	1
III. Entrainment and the Phase Response Curve	3
B. Localisation of the Circadian Clock in Vertebrates	4
I. Criteria for Identifying the Clock	4
II. The Retina as a Circadian Oscillator	5
III. The Pineal Gland as a Circadian Oscillator	6
IV. The Suprachiasmatic Nuclei of the Hypothalamus as a Circadian Oscillator	8
C. Neuroanatomy of the SCN	9
I. Internal Structure and Organisation of the SCN	9
II. Afferent Connections of the SCN	11
III. Outputs of the SCN	12
D. Entrainment of the SCN	13
I. Light and Glutamate	13
II. Glutamatergic Signals and Gene Expression in the SCN ...	14
III. Non-photic Entrainment of the Circadian System	17
IV. Melatonin and Entrainment of the Circadian System	18
V. Conclusion	20
References	21

CHAPTER 2

Regulation of Cell Division Cycles by Circadian Oscillators: Signal Transduction Between Clocks

L.N. EDMUNDS, JR. With 10 Figures	29
A. Introduction	29
I. Regulation of the Cell Division Cycle	31
II. Cell Division Rhythmicity in Wild-Type and Mutant <i>Euglena</i>	32

B. Coupling Between Oscillator and Cell Cycle: Role of Cyclic AMP	33
I. Perturbation of the Cell Division Rhythm by Cyclic AMP	34
II. Upstream Analysis: Genesis of the Oscillation in Cyclic AMP	41
III. Downstream Pathway: Cyclic AMP-Dependent Kinases	43
IV. Model for Circadian Control of the Cell Division Cycle	47
C. Problems and Prospects: Interface with the Cyclin Clock	48
References	50

CHAPTER 3

Genetics and Molecular Biology of Circadian Clocks

L. RENSING. With 6 Figures	55
A. Introduction	55
I. Oscillations and Genes	55
II. Analytical Approaches to the Basic Circadian Oscillator	56
B. Genetics and Molecular Biology of the Clock	58
I. Overview and Generalizations	58
II. <i>Neurospora</i>	60
1. Circadian Rhythm	60
2. Clock Mutants	60
3. Molecular Biology of <i>frq</i>	62
III. <i>Drosophila</i>	64
1. Circadian Rhythms	64
2. Clock Mutants	65
3. Molecular Biology of <i>per</i>	66
IV. Mammals	69
V. Conclusions	70
C. Zeitgeber Signal Pathways to the Clock	71
I. <i>Neurospora</i>	72
II. Molluscs	73
III. Mammals	73
D. Output Signals from the Clock	73
References	75

CHAPTER 4

Chemical Neuroanatomy of the Mammalian Circadian System

R.Y. MOORE. With 7 Figures	79
A. Introduction	79
B. Entrainment Pathways	80
I. Retinohypothalamic Tract	80
II. Geniculohypothalamic Tract	83

III. Other Inputs to the Suprachiasmatic Nucleus	85
C. Pacemaker-Suprachiasmatic Nucleus	85
I. Suprachiasmatic Nucleus Organization	85
II. Suprachiasmatic Nucleus Efferents	87
D. Conclusions	89
References	90

CHAPTER 5

Chronobiology of Development and Aging

E. HAUS and Y. TOUITOU	95
A. Introduction	95
B. Developmental Chronobiology	97
I. Biologic Rhythms in the Human Fetus	97
II. Fetal Rhythms of Susceptibility to Toxic and Teratogenic Agents	97
III. Rhythms in the Newborn and During Infancy	100
C. Chronobiology of Aging	100
I. Changes in Sleep Patterns During Aging	100
II. Body Temperature	101
III. Blood Pressure and Heart Rate	104
IV. Hypothalamic-Pituitary-Adrenal Axis	106
1. Dehydroepiandrosterone and Aging	107
V. Pineal Gland	109
VI. Growth Hormone and Prolactin	110
VII. Pituitary-Gonadal Axis	111
VIII. Catecholamines	112
IX. Age-Related Changes in the Pituitary-Thyroid Axis During Aging	113
X. Clinical Chemical Variables and Aging	113
1. Plasma Proteins and Volemia	114
X. Hematology	115
D. Conclusions	116
References	122

CHAPTER 6

Rhythms in Second Messenger Mechanisms

K. WITTE and B. LEMMER. With 4 Figures	135
A. Introduction	135
B. Principles of Transmembraneous Signal Transduction	135
I. Adenylyl Cyclase Pathway	135
II. Guanylyl Cyclase Pathway	137

III. Phospholipase C Pathway	138
C. Rhythms in Signal Transduction in the Cardiovascular System	138
I. Adenylyl Cyclase Pathway	138
II. Guanylyl Cyclase Pathway	145
III. Phospholipase C Pathway	145
D. Rhythms in Signal Transduction in the Central Nervous System	146
I. Adenylyl Cyclase Pathway	146
II. Guanylyl Cyclase Pathway	147
III. Phospholipase C Pathway	151
E. Rhythms in Signal Transduction in Other Tissues	151
I. Adenylyl Cyclase Pathway	151
II. Guanylyl Cyclase Pathway	152
III. Phospholipase C Pathway	152
F. Conclusions and Perspectives	153
References	153

CHAPTER 7

5-Hydroxytryptamine and Noradrenaline Synthesis, Release and Metabolism in the Central Nervous System: Circadian Rhythms and Control Mechanisms

K.F. MARTIN and P.H. REDFERN. With 2 Figures	157
A. Introduction	157
B. Circadian Rhythms in Turnover of Serotonin	158
I. Tissue Levels of Serotonin	158
II. Tryptophan Hydroxylase	160
III. Tryptophan Availability	160
IV. Tryptophan Uptake	161
V. 5-Hydroxytryptophan Decarboxylase Activity	161
VI. 5-Hydroxytryptamine Release and Metabolism	162
VII. Firing Rate of Serotonergic Neurones	165
VIII. 5-Hydroxytryptamine Autoreceptor Activity	165
IX. What Is the Function of the Circadian Rhythm in 5-Hydroxytryptamine Turnover?	168
C. Circadian Rhythms in Noradrenaline Turnover	169
D. Conclusions	171
E. References	171

CHAPTER 8

Rhythms in Pharmacokinetics; Absorption, Distribution, Metabolism and Excretion

P.M. BÉLANGER, B. BRUGUEROLLE, and G. LABRECQUE.

With 13 Figures	177
A. Introduction	177
B. Absorption	178
I. Parameters and Modifying Factors	178
II. Inorganic Compounds and Macromolecules	179
III. Organic Compounds	179
IV. Factors Modifying the Temporal Variation in Gastrointestinal Absorption	181
1. Solubility	181
2. Pharmaceutical Formulation	182
3. Secretion and Motility	182
4. Blood Flow	183
C. Distribution	185
I. Plasma Protein Binding	185
II. Binding to Erythrocytes	187
D. Biotransformation	188
I. Oxidation: The Cytochrome P-450 Monooxygenase	188
II. Conjugations	192
1. Conjugations to Acetate, Glucuronic Acid and Sulfate	192
2. Conjugation to Glutathione	193
III. Factors Related to Biotransformation	195
1. Hepatic Blood Flow	195
2. First-Pass Effect	196
E. Excretion	196
F. Conclusions and Perspectives	197
References	199

CHAPTER 9

Progress in the Chronotherapy of Nocturnal Asthma

M.H. SMOLENSKY and G.E. D'ALONZO. With 19 Figures	205
A. Introduction	205
B. Day-Night Pattern of Acute Asthma	205
C. Early, Late, and Recurrent Asthma Reactions	207
D. The Chronobiology of Asthma	208
E. Pharmacotherapy of Asthma	211
F. The Chronopharmacology and Chronotherapy of Asthma Medications	212

G. β_2 -Adrenergic Agonist Medications	213
H. Anticholinergic Agents	219
I. Theophylline	221
J. Chronotherapy of Glucocorticoids	227
K. Mast Cell Stabilizers	239
L. Conclusion	240
References	241

CHAPTER 10

Chronopharmacology of Cardiovascular Diseases

B. LEMMER and F. PORTALUPPI. With 2 Figures	251
A. Historical Background	251
B. Chronobiological Mechanisms of the Cardiovascular System	252
I. Physiology and Pathophysiology of Blood Pressure Regulation	252
II. Cardiovascular Haemodynamics	258
III. Electrical Properties of the Heart	260
IV. Pathophysiology in Coronary Heart Disease	261
C. Chronopharmacology of Hypertension	262
I. β -Adrenoceptor Antagonists	262
1. Pharmacological Characterization	262
2. Clinical Data	262
II. Calcium Channel Blockers	267
1. Pharmacological Characterization	267
2. Clinical Data	267
3. Chronopharmacokinetics	269
III. Converting Enzyme Inhibitors	270
1. Pharmacological Characterization	270
2. Clinical Data	270
IV. Other Antihypertensives	271
V. Chronopharmacology of Blood Pressure in Congestive Heart Failure	271
VI. Conclusion	271
D. Chronopharmacology of Coronary Heart Disease	272
I. β -Adrenoceptor Antagonists	272
II. Calcium Channel Blockers	278
III. Organic Nitrates	280
1. Pharmacological Characterization	280
2. Clinical Data	280
IV. Drugs Affecting Coagulation	281
V. Conclusion	282
E. Concluding Remarks	282
References	283

CHAPTER 11

Chronopharmacology of Anticancer Agents

F. LÉVI. With 10 Figures	299
A. Introduction	299
B. Experimental Chronopharmacology	299
I. Toxicity Rhythms	299
II. Chronopharmacokinetics	301
III. Rhythms in Susceptibility of Target Tissues	303
IV. Circadian Rhythms in Antitumor Efficacy	305
C. Clinical Chronopharmacology	307
I. Rhythms in Target Tissues	307
II. Chronopharmacokinetics	309
D. Clinical Validation of Chronotherapy in Oncology	314
I. Phase I Trials of Chronomodulated Chemotherapy	315
II. Phase II Trials	321
III. Chronotherapy of Metastatic Colorectal Cancer with 5-Fluorouracil, Folinic Acid and Oxaliplatin (Chrono-FFL)	322
E. Conclusions and Perspectives	324
References	325

CHAPTER 12

The Endocrine System and Diabetes

L. MEJEAN, A. STRICKER-KRONGRAD, and A. LLUCH. With 4 Figures.	333
A. Introduction	333
B. Chronobiology of Blood Glucose Levels	334
C. Chronobiology of Glucose Tolerance	335
D. Chronobiology of Plasma Insulin	335
E. Chronobiology of the Corticotropic Axis	337
F. Chronobiology of Feeding Behaviour	338
G. Chronopharmacological Approach to Diabetes	339
References	345

CHAPTER 13

Gastrointestinal Tract

J.G. MOORE and H. MERKL. With 21 Figures	351
A. Introduction	351
B. Gastrointestinal Motility Rhythms	351
I. Pharmacological and Therapeutic Implications	354

II. Other Circadian Rhythms	
Influencing Drug Bioavailability	355
C. Rhythms in Gastric Acid Secretion	357
I. Pharmacological Implications	361
II. Therapeutic Implications	367
D. Rhythms in Gastric Mucosal Defense	367
E. Circadian Influence	
in Cancer Chemotherapeutic Treatment Regimens	369
References	371

CHAPTER 14

The Pineal Gland, Circadian Rhythms and Photoperiodism

J. ARENDT. With 10 Figures	375
A. Introduction	375
B. Melatonin Production	376
C. Light Control of Melatonin Secretion	380
D. Control of Seasonal Cycles	383
E. Mechanism of Action of Melatonin	
in Control of Seasonal Rhythms	385
F. Human Seasonality	387
G. Melatonin as a Circadian Marker Rhythm	387
H. Effects of Melatonin on Circadian Rhythms	391
I. Melatonin and Core Body Temperature	395
J. Therapeutic Uses of Melatonin	395
K. Mechanism of Action of Melatonin	
in the Control of Circadian Rhythms	398
L. Melatonin Receptors	401
M. Melatonin Antagonists and Agonists	401
References	404

CHAPTER 15

Problems in Interpreting the Effects of Drugs on Circadian Rhythms

N. MROSOVSKY. With 8 Figures	415
A. Multiplicity of Sites for Chronotypic Action	415
B. Alternative Interpretations for Mode of Drug Action	416
I. Gonadal Steroids and Changes in Period	416
II. Benzodiazepines and Phase Shifts	418
III. Periodicity After a Single Treatment	420
IV. Melatonin Injections and Infusions	420

C. Tactics for Research on Behavioural Mediation	422
I. Measuring Activity	422
II. Altering Opportunities for Activity	422
III. Confinement and Restraint	423
IV. Testing Drugs In Vitro	424
D. Problems in Assessing Behavioural Mediation	424
E. Mimicking and Modulation of Photic Effects	425
I. The Retinohypothalamic Tract Transmitter	425
II. Period and Aschoff's Rule	427
III. Sensitivity to Light and Phase Shifts	427
IV. Behavioural Inhibition of Photic Shifts	427
F. Saline Injections	428
I. Peripheral Injections	428
II. Central Injections	429
G. Concluding Remarks	431
References	431

CHAPTER 16

Rhythms in Retinal Mechanisms

G.D. BLOCK and S. MICHEL. With 7 Figures	435
A. Introduction	435
B. Retinal Rhythmicity in <i>Xenopus</i>	435
I. Pacemaker Localization	436
II. Rhythm Generation	436
III. Pacemaker Entrainment	436
IV. Rhythm Expression	439
C. Retinal Rhythmicity in <i>Aplysia californica</i>	440
I. Pacemaker Localization	441
II. Rhythm Generation	441
III. Pacemaker Entrainment	442
1. Light-Induced Phase Shifts	442
2. Serotonin-Induced Phase Shifts	444
IV. Rhythm Expression	446
D. Retinal Rhythmicity in <i>Bulla gouldiana</i>	446
I. Pacemaker Localization	447
II. Rhythm Generation	447
III. Pacemaker Entrainment	449
IV. Rhythm Expression	450
E. Conclusions	451
References	451

CHAPTER 17

Circadian Rhythms and Depression: Clinical and Experimental Models

A.M. ROSENWASSER and A. WIRZ-JUSTICE. With 5 Figures	457
A. Introduction and Scope	457
B. Measurement of Circadian Rhythms	458
C. Circadian Rhythms and Depression: Clinical Research	459
I. Phase-Advanced Circadian Rhythms	459
II. Depression, Sleep, and Rhythmicity	460
III. Seasonal Depression: A Circadian Rhythm Disorder?	461
IV. Circadian Amplitude and Waveform	464
V. Instability and Zeitgeber Coupling	465
VI. Free-Running Rhythms	466
VII. Activity Feedback	466
VIII. Summary	467
D. Circadian Rhythms and Depression: Animal Models	468
I. Psychopharmacology of Circadian Rhythms	468
1. Phase-Shifting and Free-Running Period	468
2. Antidepressants	471
3. A Pharmacogenic-Developmental Model	472
II. Stress-Induced Depression Models	472
III. Behaviorally Characterized Inbred Strains	473
1. Selection for Hypertension	473
2. Selection for Drug Sensitivity	474
3. Inbred Mice Differing in Affective Behavior	474
IV. Ablation-Based Depression Models	475
1. Olfactory Bulbectomy	475
2. Thyroidectomy	475
V. Animal Models of SAD?	476
VI. Behavioral Feedback Effects	476
VII. Summary	477
E. Conclusions	479
References	479

CHAPTER 18

Chronobiology and Chronopharmacology of the Haemopoietic System

R. SMAALAND. With 8 Figures	487
A. Outline of Haemopoiesis	487
B. The Haemopoietic System and the Clinician	491
C. Circadian Aspects of the Haemopoietic System	494
I. Circadian Aspects of Proliferative Activity in Murine Bone Marrow	494
II. Circadian Stage-Dependent Cytotoxicity of Murine Bone Marrow	498

III. Circadian and Circannual Proliferative Activity in Healthy Human Bone Marrow	499
IV. Circadian Variation in Bone Marrow DNA Synthesis in Cancer Patients	504
D. Regulation of Haemopoietic Circadian Rhythms	507
E. Chronopharmacological Aspects of the Haemopoietic System . . .	508
F. Disease-Dependent Chronotherapeutic Effects and Consequences	511
G. Marker Rhythms for Proliferative Activity and Cytotoxicity of the Bone Marrow	513
H. Chronobiology of Peripheral Blood in Health and Disease	513
I. Total White Blood Cells	514
II. Neutrophil Leucocytes	515
III. Lymphocytes	515
IV. Eosinophil Leucocytes	516
V. Natural Killer Cells	516
VI. Platelets	517
I. Cyclic Haemopoiesis	517
J. Scientific and Clinical Implications	519
References	522

CHAPTER 19

Chronobiology of the Haemostatic System

F. ANDREOTTI and G. PATTI. With 2 Figures	533
A. The Haemostatic System and Its Laboratory Evaluation	533
I. The Endothelium	533
II. Vasomotion	533
III. Platelets	534
IV. Coagulation and Viscosity	535
V. Fibrinolysis	536
B. Chronobiology of the Haemostatic System	537
I. Circadian Variation of Endothelial Cell Function	537
1. Endothelium-Related Factors in Plasma	537
2. Effect of Endothelial Removal	539
3. Endothelial Reaction to Stimuli	539
II. Circadian Variation of Vasomotor Function	539
1. Coronary Artery Tone	539
2. Forearm Arterial Tone	539
3. Response to Constrictor or Dilator Stimuli	540
III. Circadian Variation of Platelet Function	541
1. Platelet Adhesiveness and Serotonin Content	541
2. In Vivo Platelet Activation and Aggregation	541
3. Platelet Aggregation In Vitro	542
4. Platelet α_2 -Adrenoceptor Activity	543

IV. Circadian Variation of Coagulation	544
1. Global Measures of Coagulation	544
2. Specific Coagulation-Related Factors	545
3. Blood Viscosity	546
V. Circadian Variation of Fibrinolytic Activity	546
1. Global Assays of Fibrinolysis	546
2. Individual Fibrinolytic Factors	547
3. Possible Determinants of the Circadian Variation of PAI-1	548
C. Conclusions	549
References	550

CHAPTER 20

New Trends in Chronotoxicology

J. CAMBAR and M. PONS. With 9 Figures	557
A. Introduction	557
B. General Chronotoxicity	558
I. Chemical Toxic Agents	558
II. Nonchemical Toxic Agents	562
C. Chronotoxicological Examples in Nonrodents	563
D. Organ Specific Circadian Chronotoxicity	563
I. Liver Chronotoxicity (Chronohepatotoxicity)	564
II. Ear Chronotoxicity	565
III. Gastric Chronotoxicity	567
IV. Renal Chronotoxicity	568

2. Antibiotic Chrononephrotoxicity	570
3. Cyclosporine Chronotoxicity	573
E. Chronesthesia as a Mechanistic Approach to Chronotoxicology ..	578
F. Circannual Chronotoxicology	580
G. General Conclusions	582
References	583

CHAPTER 21

Chronopharmacology of H₁-Receptor Antagonists:

Experimental and Clinical Aspects (Allergic Diseases)

A.E. REINBERG. With 7 Figures	589
A. Histamine and H ₁ -Receptor Antagonists: The Conventional Pharmacological Approach	589
B. Skin Reactivity to Histamine and Allergens	590
C. Lung Reactivity to Histamine and Allergens	592

D. Dosing-Time-Dependent Changes in the Acute H ₁ -Receptor Antagonist Effects of Four Agents	592
I. Cyproheptadine	592
II. Clemastine and Terfenadine	595
III. Mequitazine	596
1. Skin Tests	596
2. Psychopharmacologic Tests and Performance	596
IV. Remarks	596
E. Chronopharmacokinetics of Mequitazine	597
F. Chronesthesia of Mequitazine with Reference to Chronic Administration	599
I. Skin Tests	599
II. Bronchial Tests and Temperature	599
III. Psychopharmacological and Performance Tests	599
IV. Remarks	601
G. Chronoepidemiology of a Population of 765 Allergic Patients	601
I. Circadian and Circannual Rhythms in Allergic Symptoms	601
H. Chronotherapy of Allergic Rhinitis with Mequitazine	603
I. Chronotolerance	603
II. Chronoeffectiveness	603
III. Remarks	603
I. General Comments	604
References	605

CHAPTER 22

Local Anaesthetics

B. BRUGUEROLLE. With 3 Figures	607
A. Introduction	607
B. Experimental Chronopharmacology of Local Anaesthetics	607
I. Time Dependency in Toxicity	607
II. Time Dependency in Kinetics	610
C. Clinical Pharmacology of Local Anaesthetics	611
I. Basis for Clinical Chronopharmacology	611
II. Time Dependency in Efficiency	611
III. Time Dependency of Pharmacokinetics in Man	612
D. Possible Mechanisms Involved	614
E. Conclusions	616
References	616

CHAPTER 23

Biological Rhythms in Pain and Analgesia

G. LABRECQUE, M. KARZAZI, and M.-C. VANIER. With 2 Figures . . .	619
A. Introduction	619
B. Physiological Mechanisms of Pain	620
I. Pain Conduction Pathways	620
II. Neurotransmitters and Pain Perception	621
III. Measurements of Pain	622
1. The Pain Questionnaires	622
2. The Rating Scales	623
C. Chronobiology of Pain	624
I. Biological Rhythms in Pain Control Mechanisms	624
