## Section A: Metabolism, Pharmocokinetics and Action of Retinoids

## CHAPTER 1

	ysical-Chemical Properties and Action of Retinoids Noy. With 6 Figures	-
A.		3
В.	Behavior of Retinoids in an Aqueous Environment	3
	I. Aqueous Solubility	3
	II. Self-Association of Retinoids in Water	4
	III. Lability of Retinoids in Water	$\epsilon$
C.	Interactions of Retinoids with Membranes	$\epsilon$
	I. Effects of Membrane Lipid Composition on Membrane-	
	Retinoid Interactions	7
	II. Effects of the Radius of Curvature of Membranes on	
	Membrane-Retinoid Interactions	8
	III. Ionization Behavior of Retinoic Acid in Membranes	10
D.	Interactions of Retinoids with Proteins	10
	I. Binding Affinities	11
	Ligand Binding Affinities of Retinoid-Binding	
	Proteins	12
	2. Ligand Binding Affinities of Retinoid Nuclear	
	Receptors	14
	II. Kinetics of the Interactions of Retinoids with Proteins	17
	Rates of Dissociation of Retinoids from Retinoid-	1 /
	Binding Proteins	17
E	Some Implications for Retinoid Transport Processes	18
L.	I. Uptake of Retinol by Target Cells	18
	II. Targeting of Retinoids by IRBP	
F.		21

# CHAPTER 2

Bio S. V	synthesis, Absorption, Metabolism and Transport of Ketholds  OGEL, M.V. GAMBLE, and W.S. BLANER. With 4 Figures	3
	Introduction	3
д. В.	Intestinal Absorption of Retinol and Biosynthesis of Retinol	
D.	from Carotenoids	3:
	I. Uptake and Luminal Metabolism of Dietary Preformed	
	Vitamin A (Retinyl Esters, Retinol, and Retinoic Acid)	3
	II. Uptake and Metabolism of Dietary Provitamin A	
	Carotenoids	3
	III. Intramucosal Metabolism	3
	Retinoic Acid Formation from Retinal	_
	Derived from Carotenoids	3
	2. Role of Cellular-Retinol Binding Protein, Type II	3
	3. Retinol Esterification and the Packaging of Dietary	
	Retinoid into Chylomicrons	3
C.	•	
··	Formation	3
	I. Hepatic Clearance of Chylomicron Remnants	3
	II. Extrahepatic Tissues and Chylomicron Remnant	
	Retinoid	4
D.	Retinoid Processing and Metabolism within the Liver	2
	I. Uptake and Processing of the Chylomicron Remnant	
	Retinyl Ester by Hepatocytes	4
	II. Retinoid Metabolism and Storage in the Hepatocyte	4
	1. Cellular Retinol-Binding Protein, Type I	4
	2. Hepatic LRAT Activity	
	III. Retinoid Transfer Between Hepatocytes and	
	Stellate Cells	
	IV. Retinoid Metabolism and Storage in Hepatic	
	Stellate Cells	
E.	Extrahepatic Processing and Metabolism of Retinol and	
	Retinyl Ester	
F.	Retinoid Delivery to Target Tissues	
	I. Retinol Bound to RBP	
	1. Cellular Synthesis and Secretion of Retinol-RBP and Its	
	Regulation	
	2. The RBP Gene and Its Regulation	
	3. Structural and Physiochemical Properties of RBP, TTR,	
	and the RBP-TTR Complex	
	4. Retinol-RBP Turnover from the Circulation	
	5. RBP Receptor	
	II. Plasma all-trans-Retinoic Acid	
	III. Plasma 13-cis-Retinoic Acid	

Contents	XVII

IV. Lipoprotein Bound Retinyl Ester	81
