Preface — V

Introduction — VII

Part I: ARITHMETICAL RINGS

- 1 Saturated ideals and localizations — 3**
 - 1.1 Distributive modules — 3
 - 1.2 Saturated submodules and saturations — 8
 - 1.3 Localizable rings — 11
- 2 Finitely generated modules and diagonalizability — 21**
 - 2.1 Annihilators and finitely generated modules — 21
 - 2.2 Diagonalizable rings — 23
- 3 Rings with flat and quasiprojective ideals — 25**
 - 3.1 Flat modules — 25
 - 3.2 Flat ideals and submodules — 34
 - 3.3 Modules close to projective — 41
- 4 Hermite rings and Pierce stalks — 55**
 - 4.1 Hermite rings — 55
 - 4.2 Pierce stalks — 59
- 5 Bezout rings, Krull dimension — 69**
 - 5.1 Bezout rings and modules — 69
 - 5.2 Rings with Krull dimension — 73

Part II: EXTENSION OF AUTOMORPHISMS AND ENDOMORPHISMS

- 6 Semi-Artinian and nonsingular modules — 83**
 - 6.1 Semi-Artinian Modules — 83
 - 6.2 Singular and nonsingular modules — 95
- 7 Modules over strongly prime and strongly semiprime rings — 103**
 - 7.1 Modules over strongly semiprime rings — 103
 - 7.2 Modules over Hereditary Noetherian Prime Rings — 108

**8 Endomorphism-extendable
modules and rings — 117**

8.1 Strongly endomorphism-extendable modules — 117

8.2 Endomorphism-extendable rings — 123

8.3 Rings with endomorphism-extendable cyclic modules — 127

9 Automorphism-invariant modules and rings — 135

9.1 Automorphism-invariant modules — 135

9.2 Automorphism-invariant rings — 142

Bibliography — 145

Index — 153
