

Contents

Microtubule Dynamics and Chromosome Movement J. R. McIntosh, V. A. Lombillo, C. Nislow, and E. A. Vaisberg	1
New Motilities and Motors in the Flagella of <i>Chlamydomonas</i> M. Bernstein, P. L. Beech, K. A. Johnson, K. G. Kozminski, and J. L. Rosenbaum	11
A Molecular Motor for Microtubule-Dependent Organelle Transport in <i>Neurospora crassa</i> G. Steinberg and M. Schliwa	23
The Actomyosin Interaction K. C. Holmes	29
Structure and Functions of Profilin, Insights and Atomic Resolution T. Pollard	41
Membrane-Microfilament Attachment Sites: the Art of Contact Formation B. M. Jockusch, M. Kroemker, and K. Schlüter	49
Spectrin Interchain Binding in <i>Drosophila</i> Development D. Branton	61
Intermediate Filament Proteins: Structure, Function and Evolution K. Weber	71
The Nuclear Lamina: Regulation of Assembly by Posttranslational Modifications E. Nigg and H. Hennekes	77
Towards a Molecular Understanding of Nuclear Pore Complex Structure and Function N. Panté, R. Bastos, I. McMorro, K. N. Goldie, B. Burke, and U. Aebi	89

VIII

Titin and Nebulin: Giant Multitasking Protein Rulers in Muscle K. Wang	93
Tektings from Ciliary and Flagellar Microtubules R. W. Linck	107
Actin and Actin-Binding Proteins in the Motility of <i>Dictyostelium</i> A. A. Noegel, B. Köppel, U. Gottwald, W. Witke, R. Albrecht, and M. Schleicher	117
Analysis of Cell Motility in Living Cells J. M. Sanger and J. W. Sanger	127
Actin Polymerization by the Intracellular Bacterial Pathogen <i>Listeria monocytogenes</i> P. Cossart	135
Microtubules, Tau Protein, and Paired Helical Filaments in Alzheimer's Disease E. Mandelkow, J. Biernat, B. Lichtenberg-Kraag, G. Drewes, H. Wille, N. Gustke, K. Baumann, and E.-M. Mandelkow	143
