

CONTENTS

High Aspect-Ratio Wings

D. RECKZEH: Design Work for the A3XX High-Lift-Wing.....	3
A.-R. HÜBNER, T. LÖSER: Recent Improvements in the Measurement of Aerodynamic Damping Derivatives.....	11
C. NEBEL, D. HUMMEL: Calculation of Horizontal Stabilizer Efficiency with a Navier-Stokes Code.....	19
S. MELBER: 3D RANS Simulations for High-Lift Analysis of Transport Aircraft Configurations.....	27
J. WILD: Numerical Investigation of the Reynolds-Number-Effect on the Setting Sensitivity of a 2D High-Lift Multi-Element Airfoil.....	35
F. TINAPP, W. NITSCHKE: Separation Control on a High-Lift Configuration by Periodic Excitation.....	42
E. STUMPF: Numerical Investigation of the Effect of the High-Lift Configuration of a Transport Aircraft on its Vortex Wake.....	50
R. STUFF: The Relationship Between Near- and-Far-Field of Vortex Wakes from Aircraft with High Aspect Ratio Wings.....	58
I. SCHELL, E. ÖZGER, D. JACOB: Influence of Different Flap Settings on the Hazard Posed to Following Aircraft.....	66
R. HEINRICH: Numerical Simulation of Wake-Vortex Encounters Using the Chimera-Technique.....	74
M. HUHND, S. SCHMID-GÖLLER: Aspects of Low Speed Wind Tunnel Testing on an A400M Model with Propeller Simulation.....	82
A. KRUMBEIN: Coupling of DLR Navier-Stokes Solver FLOWer with an e ^N -Database Method for Laminar-Turbulent Transition Prediction on Airfoils.....	92

Low Aspect-Ratio Wings

M. BRUSE, K.-W. BOCK, TUSCHE, M. JACOBS: Unsteady Measurements with the Continuously Rotating DLR-PSP-Model at the Transonic Wind Tunnel Göttingen (DNW-TWG).....	103
---	-----

Hypersonic Flows

C. WEBER, R. BEHR, C. WEILAND: Turbulence Modeling for Reentry-Vehicles	113
T. LINK, W.W. KOSCHEL: Computation of the Two-Dimensional Flow in SERN Nozzles.....	121
N. NEUBACHER, A. HENCKELS, T. GAWEHN: Experimental Investigation of a Hypersonic Inlet for the TSTO-Configuration ELAC.....	129
T. EGGERS: Aerodynamic Analysis of the Dual-Mode Ramjet Vehicle JAPHAR.....	137
S.B. VERMA, G. KOPPENWALLNER: Study of Shock-Wave/Boundary-Layer Interaction Flowfield on a 24° Ramp Model.....	145
A. PAGELLA, U. RIST, S. WAGNER: Numerical Investigations of Small-Amplitude Disturbances in a Laminar Boundary Layer with Impinging Shock Waves.....	153
M. BLEILEBENS, H. OLIVIER: Surface Temperature Effects on Shock-Wave Boundary-Layer Interaction of Ramp Flows.....	161

Fluid-Structure-Coupling

J. HURKA, J. BALLMANN: Preliminary Results of Numerical Simulations of Elastic Panels in Transonic Flows.....	171
--	-----

Fundamentals of Fluid Flow

U. RIST, K. AUGUSTIN, S. WAGNER: Numerical Simulation of Laminar Separation-Bubble Control.....	181
M. BREDE, A. LEDER: On the Structure of Turbulence in the Transition Cylinder Wake...	189

Transition and Fluidmechanical Modelling

S. SCHMIDT, F. THIELE: Investigation of Subgrid-Scale Models in LES of Turbulent Flows with Separation.....	199
M. LANG, O. MARXEN, U. RIST, S. WAGNER: Experimental and Numerical Investigations on Transition in a Laminar Separation Bubble.....	207
S. JAKIRLIĆ, I. HADŽIĆ, A. DJUGUM, C. TROPEA: Boundary-layer Separation Computed by Second-Moment Closure Models.....	215

J. FREY, R. BUCKISCH, L. MÜLLER, R. GRUNDMANN: Experimental Investigation on the Behaviour of Disturbances Emitted from a Point Source in a Laminar Boundary Layer.....	223
S. HERR, A. WÖRNER, W. WÜRZ, U. RIST, S. WAGNER: Experimental/Numerical Investigation of the Influence of a Pressure Gradient on Acoustic Roughness Receptivity in the Boundary Layer of an Airfoil.....	231
C. STEMMER, M. KLOKER: Interference of Wave Trains with Varying Phase Relations in a Decelerated Two-Dimensional Boundary Layer.....	239
P. WASSERMANN, M. KLOKER, S. WAGNER: Secondary Instability of Steady and Unsteady Crossflow Waves.....	247
H. FRAHNERT, U.CH. DALLMANN: Examination of the Eddy-Viscosity Concept Regarding its Physical Justification.....	255

Mathematical Fundamentals / Numerical Simulation

A. MEISTER: A Numerical Method for Compressible and Low Mach Number Fluid Flow.....	265
U. BUNGE, T. RUNG, F. THIELE: Turbulent Two-Dimensional Flow Around a Flexible Membrane Airfoil.....	273
F. BRAMKAMP, J. BALLMANN: Solution of the Euler Equations on Locally Adaptive B-Spline Grids.....	281
F. TREMBLAY, R. FRIEDRICH: An Algorithm to Treat Flows Bounded by Arbitrarily Shaped Surfaces with Cartesian Meshes.....	289
M. RAKOWITZ: Grid Refinement Study with a UHCA Wing-Body Configuration Using Richardson Extrapolation and Grid Convergence Index GCI.....	297
C.-C. ROSSOW: Convergence Acceleration on Unstructured Meshes.....	304
T. SCHWARZ: Enhancement of a Navier-Stokes Flow Solver for Patched Grids with Non-Coincident Grid Nodes.....	312

Bluff Bodies

H. LIENHART, C. STOOT, S. BECKER: Flow and Turbulence Structures in the Wake of a Simplified Car Model (Ahmed Modell).....	323
J. SRULIJES, P. GNEMMI, K. RUNNE, F. SEILER: Flow Visualisation, Pressure Measurements and Numerical Calculations on Spike-Tipped Bodies.....	331

Turbomachineri

W. HOFMANN, J. BALLMANN: Tip-Vortices in Transonic Axial-Compressors.....	341
---	-----

Airframe Noise

W. DOBRZYNSKI, H. HELLER, J. DELFS: Airframe Noise - Generation and Reduction - a Report on Status and Perspectives of DLR-Research -.....	353
--	-----

Laminar Flow Control

E. JANKE: Receptivity of Three-Dimensional Boundary Layers to Roughness and Suction - Linear and Nonlinear Effects.....	367
D. STURZEBECHER, W. NITSCHKE: Active Control of Tollmien-Schlichting Instabilities by Multi-Channel Sensor Actuator Systems.....	375

Measuring Techniques

K.-A. BÜTEFISCH: Time Resolved 2D Measurement Techniques for Quantitative Determination of Flow Fields and Surface Pressure Distributions.....	385
A. SCHRÖDER, J. KOMPENHANS: Investigation of Transitional Structures in Artificially and Disturbed Excited Flat Plate Boundary Layer Flows Using Stereo and Multi-Plane PIV.....	395
U. GAISBAUER, H. KNAUSS, S. WAGNER, J. WEISS: The Meaning of Disturbance Fields in Transition Experiments and Their Detection in the Test Section Flow of a Short Duration Wind Tunnel.....	403
O. BURKHARDT, U.G.S. DINATA, W. NITSCHKE: Surface Fence with an Integrated, Piezoresistive Pressure Sensor for Measurements of Static and Dynamic Wall Shear Stress..	411
T.J. MÖLLER, A. BERGMANN: Experimental Investigation of the Flow Close to the Surface of a High Lift Airfoil Configuration in a Large Wind Tunnel.....	419
M. RAFFEL, H. RICHARD: Detection of Density Gradients at Helicopter Rotor Blades in Flight.....	426

PPN: 098189956

Titel: New results in numerical and experimental fluid mechanics / Siegfried Wagner ... (ed.). -

Berlin : Springer, 2002

ISBN: 3-540-42696-5
