

Table of Contents

1	Somatic Gene Therapy in Cancer <i>F.M. Rosenthal, C.F. Waller, A. Lindemann, and R. Mertelsmann</i>	1
2	Placental Blood: New Options in Hematopoietic Stem Cell Transplantation <i>R.M. Weber-Nordt and R. Mertelsmann</i>	25
3	Recent Developments in the Ex Vivo Manipulation of Hematopoietic Cells from Bone Marrow and Blood <i>R. Henschler, J. Winkler, D. Möbest, A. Spyridonidis, W. Lange, and R. Mertelsmann</i>	37
4	Monocyte-Derived Cells in Adoptive Immunotherapy of Cancer: Facts and Perspectives <i>S.W. Krause, B. Hennemann, A. Konur, M. Kreutz, and R. Andreessen</i>	55
5	The Immunological Basis for the Development of Tumor Cell- and Peptide-Based Vaccines for Treatment of Patients with Renal Cell Carcinoma <i>D.J. Schendel, E. Nöbner, B. Maletz, S. Kressenstein, K. Pantel, and R. Oberneder</i>	75

6	Transplantation of Isolated Islets of Langerhans as Treatment of Diabetes Mellitus <i>K. Federlin, B.J. Hering, and R.G. Bretzel</i>	87
7	Potential Use of Marrow Stromal Cells for Therapy of Osteogenesis Imperfecta and Osteoporosis <i>D.J. Prockop</i>	111
8	Neuronal Modulation of the Immune Response in Nervous Tissue: Implications for Neurodegenerative and Autoimmune Diseases <i>H. Neumann and H. Wekerle</i>	119
9	Transplantation of Dopamine-Synthesizing Cells in Parkinson's Disease: Experimental Data and Clinical Application <i>W.H. Oertel, O. Pogarell, A. Kupsch, and A. Hartmann</i> . . .	129
10	Repairing CNS Demyelination by Glial Cell Transplantation <i>R.J.M. Franklin</i>	145
11	Monitoring of Suicide Gene Therapy with Positron Emission Tomography <i>U. Haberkorn</i>	159
	Subject Index	177
	Previous Volumes Published in this Series	179
