# Contents

## Section I: General Aspects

### CHAPTER 1

#### Structure of Smooth Muscles

G. GABELLA. With 12 Figures .....	3
A. Introduction .....	3
B. Smooth Muscle Cells .....	3
I. Cell Size .....	3
II. Cell Membrane .....	7
III. Caveolae .....	7
IV. Cell Junctions .....	10
V. Dense Bands .....	12
VI. Sarcoplasmic Reticulum .....	14
VII. Filaments .....	16
1. Myosin Filaments .....	16
2. Actin Filaments .....	17
3. Dense Bodies .....	17
4. Intermediate Filaments .....	18
C. Smooth Muscle as a Tissue .....	19
I. Non-muscle Cells .....	19
II. Extracellular Materials .....	19
D. Changeable Structure of Smooth Muscles .....	21
I. Contraction .....	22
II. Development .....	23
III. Hypertrophy .....	27
References .....	30

### CHAPTER 2

#### Ionic Channels in Smooth Muscle

T. TOMITA and S. IINO .....	35
A. Introduction .....	35

B. Voltage-Operated $\text{Ca}^{2+}$ Channel .....	36
I. Type .....	36
II. Ionic Selectivity .....	38
III. Inactivation .....	39
IV. Blocking Agents .....	40
V. Intracellular ATP .....	41
VI. pH Effect .....	41
C. $\text{K}^+$ Channel .....	42
I. $\text{Ca}^{2+}$ -Activated $\text{K}^+$ Channel .....	42
II. ATP-Regulated Channel .....	43
III. Fast-Inactivating $\text{K}^+$ ( $\text{K}_{\text{FI}}$ ) Channel .....	46
IV. Delayed Rectifying $\text{K}^+$ ( $\text{K}_{\text{DR}}$ ) Channel .....	46
V. Time-Independent $\text{K}^+$ ( $\text{K}_{\text{TI}}$ ) Channel .....	46
VI. Inward-Rectifying $\text{K}^+$ ( $\text{K}_{\text{IR}}$ ) Channel .....	47
D. $\text{Na}^+$ Channel .....	47
E. $\text{Cl}^-$ Channel .....	48
I. Ca-Activated $\text{Cl}^-$ Channel .....	48
II. Voltage-Dependent Channel .....	49
References .....	50

## CHAPTER 3

### Excitation-Contraction Coupling Mechanisms in Visceral Smooth Muscle Cells

T. ITOH and H. KURIYAMA .....	57
A. Introduction .....	57
B. General Features of the Sarcolemmal Membrane in Relation to the Influx of Calcium .....	59
I. Action Potentials Recorded by Microelectrode Methods .....	59
1. Action Potentials .....	60
2. Nerve-Mediated Responses .....	60
II. Features of the Voltage-Dependent $\text{Ca}$ Channel in Visceral Smooth Muscle Membranes Measured Using the Voltage- and Patch-Clamp Procedures .....	62
III. Factors Modifying the Activity of the Voltage-Dependent $\text{Ca}$ Channel .....	64
1. $\text{Ca}$ Antagonists and Agonists .....	64
2. Dihydropyridine-Binding Protein ( $\text{Ca}$ Channel) .....	65
3. $\text{K}$ Channel Modifying Drugs .....	67
4. Endothelial Cell Releasing Factors .....	69
IV. Receptor-Operated Ion Channel .....	71
1. General Features of the Receptor Structure .....	71
2. Neurotransmitter-Induced Changes in the Membrane Potential .....	72

3. Activation of the Receptor-Operated Ion Channel . . . . .	77
V. Mutual Relationship Between the Voltage-Dependent and Receptor-Activated Ion Channels . . . . .	80
VI. Factors Modifying the Mechanical Responses with No Change in the Ca Concentration . . . . .	83
VII. Ca Influx Induced by a Reversed Na-Ca Exchange Diffusion Mechanism . . . . .	85
VIII. Ca Influx Induced by Stretch . . . . .	86
C. Sarcoplasmic Reticulum as a Cytosolic Calcium Regulator in Visceral Smooth Muscles . . . . .	86
I. Release of Ca from the SR as Estimated from the Ca Transient and Contraction . . . . .	87
II. Role of the SR in Relation to the Release of Ca . . . . .	89
1. Caffeine-Induced and IP <sub>3</sub> -Induced Ca Release . . . . .	89
2. Release of Ca from the SR Deduced from the Ca-Dependent K Current . . . . .	91
3. Receptor Proteins of the Ca-Release Channel . . . . .	92
D. Actions of Calcium on Contractile Proteins . . . . .	93
I. Ca-Binding Proteins . . . . .	94
II. Myosin Phosphorylation Model for Smooth Muscle Contraction . . . . .	95
III. Actin-Regulating Mechanisms in Smooth Muscle . . . . .	97
1. Caldesmon . . . . .	97
2. Calponin . . . . .	98
IV. Roles of Calcium as Estimated from Mechanical Responses . . . . .	99
V. Pharmacology of Ca-Dependent Protein Phosphorylation . . . . .	99
E. Conclusion . . . . .	100
References . . . . .	101

## Section II: Endogenous Substances and Smooth Muscle

### CHAPTER 4

#### Eicosanoids and Smooth Muscle Function

K. SCHRÖR and H. SCHRÖDER. With 2 Figures . . . . .	127
A. Introduction . . . . .	127
B. Cellular Aspects of Formation and Action of Eicosanoids in Smooth Muscle Cells . . . . .	129
I. Control of Local Eicosanoids Levels . . . . .	129
1. Phospholipases and Arachidonic Acid Liberation . . . . .	129
2. Control of Enzyme Mass . . . . .	130
3. Circulating Hormones and Chemical Messengers . . . . .	130
II. Additional Sources of Eicosanoids for Smooth Muscle . . . . .	131

1. Endothelial/Epithelial Cells .....	131
2. Platelets .....	132
3. Leukocytes .....	132
<b>III. Signal Transduction Pathways in Smooth Muscle Cells .....</b>	<b>133</b>
1. Eicosanoid Receptors .....	133
2. G Proteins .....	138
3. Phosphoinositol Metabolism, Protein Kinase C, and Cytosolic $Ca^{2+}$ .....	139
4. Cyclic Nucleotide Related Pathways .....	142
5. Ionic Channels .....	143
<b>C. Eicosanoids and Smooth Muscle Function .....</b>	<b>146</b>
<b>I. Cyclooxygenase Products .....</b>	<b>146</b>
1. Prostaglandin Endoperoxides .....	146
2. Prostaglandin $D_2$ .....	146
3. Prostaglandin $E_2$ .....	147
4. Prostaglandin $F_{2\alpha}$ .....	147
5. Prostaglandin $I_2$ .....	148
6. Thromboxane $A_2$ .....	148
<b>II. Leukotriene Pathways .....</b>	<b>149</b>
1. Leukotriene $B_4$ .....	149
2. Cysteinyl Leukotrienes .....	149
<b>III. Other Lipoxygenase Products .....</b>	<b>150</b>
1. 5-Hydro(pero)xyeicosatetraenoic Acid .....	150
2. 12-Hydro(pero)xyeicosatetraenoic Acid .....	150
3. 15-Hydro(pero)xyeicosatetraenoic Acid .....	151
4. Lipoxins .....	151
5. Hepoxilins .....	152
<b>IV. Monooxygenase Pathways .....</b>	<b>152</b>
<b>D. Eicosanoids and Smooth Muscle Dysfunction .....</b>	<b>153</b>
<b>I. Smooth Muscle Cell Proliferation .....</b>	<b>153</b>
<b>II. Smooth Muscle Tone in Pathologic Situations .....</b>	<b>153</b>
1. Arterial Vasospasm .....	153
2. Bronchospasm .....	154
<b>E. Summary and Conclusions .....</b>	<b>155</b>
<b>References .....</b>	<b>156</b>

## CHAPTER 5

### **Angiotensin, the Kinins, and Smooth Muscle**

<b>D. REGOLI and N.-E. RHALEB. With 2 Figures .....</b>	<b>167</b>
<b>A. Introduction .....</b>	<b>167</b>
<b>B. Renin-Angiotensin System .....</b>	<b>167</b>
I. Effects of Angiotensin on the Cardiovascular System and on Smooth Muscles .....	168

II. Receptor Characterization: Pharmacological Assays .....	170
III. Receptor Characterization by the Binding .....	173
IV. Cloning and Expression of the Angiotensin Receptor .....	175
V. Mechanism of Action of Angiotensin: Second Messenger(s) .....	175
C. Kallikrein-Kinin System .....	176
I. Mechanism of Action of Bradykinin: Second Messenger(s) ..	182
References .....	184

## CHAPTER 6

### **Effect of Histamine on Smooth Muscle**

E. MASINI and P.F. MANNAIONI. With 3 Figures .....	193
A. Introduction .....	193
B. The Gastrointestinal Tract .....	194
I. Activity of the Esophagus .....	194
II. Action on the Stomach .....	195
III. Action on the Intestine .....	197
IV. Action on the Gallbladder .....	201
V. Conclusion .....	201
C. The Genitourinary Tract .....	201
I. Action on the Ureter, Bladder and Penile Tissue .....	201
II. Action on the Uterus .....	203
D. The Cardiovascular System .....	203
I. Overview and Historical Background .....	203
II. Aorta .....	207
III. Coronary Vessels .....	207
IV. Cerebral Vessels .....	209
V. Pulmonary Vessels .....	209
VI. Portal, Mesenteric and Renal Vessels .....	211
VII. Vascular Physiopathology .....	211
E. Pulmonary Tract .....	212
I. Introductory Notes .....	212
II. Effects of Histamine on Airway Smooth Muscle .....	212
F. Concluding Remarks .....	215
References .....	215

## CHAPTER 7

### **Angiohypotensin**

J. KNOLL. With 11 Figures .....	227
A. Introduction .....	227
B. Angiohypotensin in Human and Mammalian Sera .....	228

C. Inhibition by Angiohypotensin of the Release of Noradrenaline to Field Stimulation in Vascular Smooth Muscle .....	231
D. Angiohypotensin in Pig and Bovine Liver .....	233
E. Hypotensive Effect of Moderately Purified Angiohypotensin Preparations in Anaesthetized Animals .....	236
F. Blood Pressure Reducing Effect of Highly Purified Angiohypotensin Preparations in Anaesthetized Spontaneous Hypertensive Rat (SHR Strain) .....	236
G. Blood Pressure Reducing Effect of Highly Purified Angiohypotensin Preparations in Freely Moving Awake, Spontaneously Hypertensive Rats and in Their Normotensive Control Peers .....	237
H. Working Hypothesis of Angiohypotensin As a Major Regulator of Peripheral Vascular Resistance .....	241
I. Summary and Conclusion .....	242
References .....	242

## CHAPTER 8

### **Neuropeptides (Neurokinins, Bombesin, Neurotensin, Cholecystokinins, Opioids) and Smooth Muscle**

D. REGOLI, N. ROUSSI and P. D'ORLÉANS-JUSTE. With 1 Figure .....	243
A. Introduction .....	243
I. Receptors for Neuropeptides .....	243
II. Smooth Muscle as Target for Neuropeptides .....	248
III. Neuropeptide Receptors in Smooth Muscle .....	248
IV. Neuropeptide Metabolism .....	251
B. Substance P and Related Neurokinins .....	252
I. Biological Activity of Neurokinins In Vivo .....	257
II. Neurokinin-Receptor Activity in Isolated Smooth Muscles In Vitro .....	257
III. Mechanisms of Action of Neurokinins: Mediators and Second Messengers .....	260
C. Gastrin-Releasing Peptides and Neuromedins B .....	262
I. Biological Activity of Bombesin-Related Peptides In Vivo and In Vitro .....	263
II. Second Messengers of Bombesin Receptors .....	267
D. Neurotensin .....	268
I. Biological Activity of Neurotensin In Vivo .....	269
II. Pharmacological Effects of Neurotensin In Vitro: Receptor Characterization .....	271
III. Mechanism of Action of Neurotensin and Second Messengers .....	274
E. Cholecystokinin .....	275

I. Biological Activity of Cholecystokinin In Vivo .....	276
II. Activity of Cholecystokinin In Vitro .....	278
III. Mechanism of Action of CCK and Second Messengers .....	280
<b>F. Opioids .....</b>	<b>281</b>
I. Biological Activity of Opioids In Vivo .....	284
II. Effects of Opioids In Vitro .....	284
III. Characterization of Opioid Receptors by Endogenous Agonists, Antagonists and Selective Analogues .....	286
IV. Mechanism of Action of Opioids on Smooth Muscle and Second Messengers Involved .....	287
<b>References .....</b>	<b>287</b>

## CHAPTER 9

### **Serotonin and Smooth Muscle**

<b>A.L. KILLAM and M.L. COHEN. With 3 Figures .....</b>	<b>301</b>
<b>A. Introduction .....</b>	<b>301</b>
<b>B. History .....</b>	<b>301</b>
<b>C. Serotonin Receptor Identification and Classification .....</b>	<b>302</b>
<b>D. Vascular Smooth Muscle .....</b>	<b>304</b>
I. Source of Serotonin .....	304
II. General Comments on Vascular Responses .....	305
III. Neuronal Receptors in Vascular Smooth Muscle .....	305
IV. Serotonin Receptors Responsible for Vascular Smooth Muscle Contraction .....	307
V. Vascular Relaxation .....	309
<b>E. Gastrointestinal Smooth Muscle .....</b>	<b>310</b>
I. Source of Serotonin .....	310
II. General Comments on Gastrointestinal Responses .....	310
III. Neuronal Receptors in Gastrointestinal Smooth Muscle .....	311
IV. Esophageal Smooth Muscle .....	312
V. Gastric Smooth Muscle .....	313
VI. Ileal Smooth Muscle .....	314
VII. Colonic Smooth Muscle .....	314
<b>F. Pulmonary Smooth Muscle .....</b>	<b>315</b>
<b>G. Genitourinary Smooth Muscle .....</b>	<b>315</b>
I. Vas Deferens .....	315
II. Bladder .....	316
III. Prostate .....	317
IV. Penile Smooth Muscle .....	317
V. Uterine Smooth Muscle .....	318
<b>H. Summary .....</b>	<b>319</b>
<b>References .....</b>	<b>319</b>

**Section III: Pharmacological Agents and Smooth Muscle****CHAPTER 10****Excitation-Contraction Coupling in Gastrointestinal Smooth Muscles**

K.M. SANDERS and H. OZAKI. With 16 Figures ..... 331

A. Introduction .....	331
B. Mechanisms of Electrical Behavior of GI Smooth Muscles .....	333
I. Major Ionic Currents Identified in GI Smooth Muscles .....	333
1. Properties of Voltage-Dependent $\text{Ca}^{2+}$ Currents .....	333
2. Properties of $\text{K}^+$ Currents .....	339
3. Properties of Chloride Currents .....	347
4. Properties of Sodium Currents .....	348
II. Contribution of Ionic Channels to Electrical Activity and Electromechanical Coupling .....	349
1. Pacemaker Currents .....	351
C. Regulation of Ionic Currents by Agonists .....	354
I. Regulation of Currents by Muscarinic Stimulation .....	355
1. Nonselective Cation Currents .....	355
2. Regulation of Calcium Currents .....	360
3. Regulation of Outward Currents .....	362
II. Regulation of Currents by Adrenergic Stimulation .....	363
III. Regulation of Currents by Nitrovasodilators .....	365
IV. Regulation of Currents by Peptides .....	366
V. Regulation of Currents by $\text{K}^+$ Channel Agonists .....	367
D. Coupling Between Electrical Excitation and Contraction .....	369
I. Relationship Between $\text{Ca}^{2+}$ Current and $[\text{Ca}^{2+}]_i$ .....	369
II. Regulation of $\text{Ca}^{2+}$ Influx by $[\text{Ca}^{2+}]_i$ .....	372
III. Relationship Between Electrical Activity and $[\text{Ca}^{2+}]_i$ in Muscle Strips .....	373
IV. $\text{Ca}^{2+}$ and Metabolism .....	376
V. Relationship Between $[\text{Ca}^{2+}]_i$ and Force .....	377
E. Role of Phosphatidyl Inositol Turnover .....	385
I. Regulation Via $\text{IP}_3$ .....	385
II. Role of Activators of Protein Kinase C .....	387
F. Regulation of the Contractile Apparatus by Cyclic Nucleotides .....	387
G. Summary .....	390
References .....	390

**CHAPTER 11****Airway Smooth Muscle**

A.J. KNOX and A.E. TATTERSFIELD. With 4 Figures ..... 405

A. Introduction .....	405
-----------------------	-----

B. Contractile Mechanisms .....	405
I. Receptor-Operated Contraction .....	405
II. Initiation .....	406
III. Maintenance .....	407
IV. Depolarisation-Induced Contraction .....	408
V. Sources of Calcium Utilised During Contraction .....	408
C. Relaxant Mechanisms .....	409
I. Elevation of Cyclic AMP .....	409
II. Elevation of Cyclic GMP .....	411
III. Breakdown of cAMP and cGMP .....	411
D. Calcium Removal Mechanisms .....	412
I. Calcium Efflux Pump .....	412
II. Sodium-Calcium Exchange .....	412
III. Intracellular Calcium Removal Mechanisms .....	412
IV. Calcium During Relaxation .....	413
E. Effect of Drugs on Airway Smooth Muscle Function .....	413
I. Drugs Acting Via Smooth Muscle Receptors .....	413
1. Adrenergic Agents .....	413
2. Muscarinic Agents .....	418
3. NANC System Neurotransmitters .....	420
4. Agents Acting on Guanylate Cyclase .....	422
5. Inflammatory Mediators/Epithelial Products .....	422
II. Drugs Acting on Post-receptor Mechanisms .....	425
1. Phosphodiesterase Inhibitors .....	425
2. Miscellaneous .....	427
III. Drugs Acting on Cell Membrane Ion Transport .....	427
1. Calcium Channel Antagonists .....	427
2. Potassium Channel Activators .....	428
3. Others .....	430
F. Conclusion .....	431
References .....	432

## CHAPTER 12

### Uterine Smooth Muscle: Electrophysiology and Pharmacology

J. MIRONNEAU .....	445
A. Introduction .....	445
B. Electrical Activity of Myometrium .....	445
I. Relationship Between Membrane Potential and Contraction .....	445
II. Ion Channels: Identification and Modulation .....	446
1. Voltage-Gated Calcium Channels .....	447
2. Voltage-Gated Sodium Channels .....	452
3. Ligand-Gated Nonspecific Channels .....	454

4. Potassium Channels .....	456
5. Other Channels .....	457
C. Contractile Activity of Myometrium .....	457
I. Calcium Entry from the Extracellular Medium .....	458
II. Calcium Release from the Intracellular Calcium Store .....	458
1. Agonist Effects on the Intracellular Calcium Store .....	458
2. Characteristics of the Intracellular Calcium Store .....	458
3. Relaxant Effects of Caffeine in Myometrium .....	460
III. Phosphoinositide Cycle .....	461
1. Action of $\text{InsP}_3$ .....	461
2. Action of Phorbol Esters .....	462
D. Summary and Conclusions .....	463
References .....	463

## CHAPTER 13

### Effect of Potassium Channel Modulating Drugs on Isolated Smooth Muscle

G. EDWARDS and A.H. WESTON. With 8 Figures .....	469
A. Introduction .....	469
I. Modulation of Potassium Channels: General Principles .....	469
II. Mechanical Consequences of K-Channel Modulation .....	469
1. Plasmalemmal Effects .....	469
2. Other Intracellular Effects .....	470
B. K-Channels in Smooth Muscle .....	470
I. Voltage-Sensitive Channels .....	470
1. General Features of Activation and Inactivation .....	470
2. Channel Substructure .....	471
3. Voltage-Sensitive K-Channel Subtypes .....	473
II. Calcium-Sensitive K-Channels .....	476
1. $\text{BK}_{\text{Ca}}$ .....	476
2. $\text{SK}_{\text{Ca}}$ .....	478
3. $\text{IK}_{\text{Ca}}$ .....	478
4. $\text{K}_{\text{Ca(o)}}$ .....	479
III. ATP-Sensitive K-Channels .....	479
C. Modulators of Smooth Muscle K-Channels .....	480
I. Synthetic K-Channel Openers .....	480
1. Chemical Classification .....	480
2. Effects on Smooth Muscle In Vitro .....	488
3. Effects on K-Channels .....	491
II. Endogenous K-Channel Openers .....	495
1. Adenosine .....	495
2. Calcitonin Gene-Related Peptide .....	496
3. Endothelium-Derived Hyperpolarising Factor .....	496

4. Fatty Acids . . . . .	498
5. Prostacyclin . . . . .	498
6. Vasoactive Intestinal Polypeptide . . . . .	498
7. Adrenoceptor Agonists . . . . .	499
8. Endogenous Relaxants: Involvement of K-Channels . . . . .	500
III. K-Channel Inhibitors . . . . .	500
1. Inorganic Cations . . . . .	500
2. Aminopyridines, TEA . . . . .	501
3. Class III Antiarrhythmic Agents . . . . .	503
4. Imidazoline-Guanidino Receptor Site Ligands . . . . .	504
5. Toxins . . . . .	505
6. Hypoglycaemic Agents . . . . .	508
7. Calmodulin Antagonists . . . . .	509
D. Selectivity of Action . . . . .	510
References . . . . .	511

## CHAPTER 14

### **Smooth Muscle of the Male Reproductive Tract**

E. KLINGE and N.O. SJÖSTRAND. With 4 Figures . . . . .	533
A. Introduction . . . . .	533
B. Extrinsic Nerves . . . . .	534
C. External Reproductive Organs . . . . .	535
I. General Properties of the Smooth Muscle . . . . .	535
II. Adrenergic Mechanisms . . . . .	535
1. $\alpha$ -Adrenoceptors . . . . .	536
2. $\beta$ -Adrenoceptors . . . . .	537
III. Cholinergic Mechanisms . . . . .	539
1. Muscarinic Effects . . . . .	540
2. Nicotinic Effects . . . . .	544
IV. Peptides . . . . .	546
1. VIP . . . . .	547
V. L-Arginine Nitric Oxide Synthase Pathway . . . . .	551
1. Background Constituted by the Inhibitory Factor Extracted from the Bovine Retractor Penis Muscle . . . . .	551
2. Nitric Oxide Synthase and the Use of Its Inhibitors . . . . .	552
3. Physiological Significance . . . . .	555
D. Internal Accessory Reproductive Organs . . . . .	556
I. General Properties of the Smooth Muscle . . . . .	556
II. Adrenergic Mechanisms . . . . .	556
1. $\alpha$ -Adrenoceptors . . . . .	557
2. $\beta$ -Adrenoceptors and Their Significance . . . . .	557
III. Cholinergic Mechanisms . . . . .	557
1. Excitatory Muscarinic Effects . . . . .	558

2. Inhibitory Muscarinic Effects .....	558
3. Physiological Significance of Cholinergic Nerves .....	559
IV. Peptides .....	559
V. Cotransmission .....	560
E. Concluding Remarks .....	561
References .....	562

## CHAPTER 15

### Urinary Tract

K.E. CREED .....	575
A. Introduction .....	575
B. Species Differences .....	576
C. Anatomy and Physiology .....	576
D. Innervation and Effects of Drugs .....	577
I. Hypogastric Nerve .....	577
II. Pelvic Nerve .....	578
III. Modulators .....	580
1. Transmitters .....	581
2. Hormones .....	581
3. Prostaglandins and Others .....	581
E. Smooth Muscle .....	582
I. Membrane Excitability .....	583
II. Calcium Channels .....	584
III. Potassium Channels .....	585
IV. Contractile Mechanism .....	585
F. Clinical Considerations .....	586
G. Conclusions .....	587
References .....	587

## Section IV: Vascular System

### CHAPTER 16

#### Molecular Mechanisms of Action of Antihypertensive Agents, Ca-Antagonists and K-Channel Openers on Vascular Smooth Muscle

K. KITAMURA and H. KURIYAMA .....	595
A. Introduction .....	595
B. Classification of Ca-Antagonists and K-Channel Openers .....	596
C. Ion Channels Distributed in Vascular Smooth Muscle Cells .....	597
I. Ca Channels .....	598
II. Na Channels .....	600

III. K Channels . . . . .	600
1. Ca-Dependent K Channels . . . . .	601
2. ATP-Sensitive K Channels . . . . .	603
3. A-Type Channels . . . . .	603
4. Delayed K Channels . . . . .	604
5. Other K Channels . . . . .	604
IV. Non-selective Cation Channels . . . . .	605
V. Cl Channels . . . . .	605
D. Actions of Ca-Antagonists on the Membrane of Smooth Muscle Cells . . . . .	606
E. Molecular Mechanisms Underlying the Actions of Ca-Antagonists on the Ca Channel . . . . .	611
F. Heterogeneity of the K Channel Targeted by K-Channel Openers . . . . .	613
G. Properties and Gating Mechanisms of the ATP-Sensitive K Channel . . . . .	615
I. Inhibition by ATP and Its Analogues . . . . .	616
II. Reactivation by ATP and Its Analogues . . . . .	617
H. Mechanisms of Action of K-Channel Openers on the ATP-Sensitive K Channel . . . . .	619
I. Conclusion . . . . .	620
References . . . . .	621

## CHAPTER 17

### **Drug Effects on the Smooth Muscle of the Coronary System Under Physiological and Pathological Conditions**

L. SZEKERES and J. Gy. PAPP . . . . .	631
A. Introduction . . . . .	631
B. Function of the Coronary System . . . . .	631
C. Changes Due to Pathological Conditions . . . . .	634
D. Effect of Drugs on the Coronary System . . . . .	636
References . . . . .	641

## CHAPTER 18

### **Drugs Affecting the Cerebrovascular Smooth Muscle**

M. FUJIWARA and I. MURAMATSU. With 3 Figures . . . . .	645
A. Introduction . . . . .	645
B. Endothelium-Dependent Vasorelaxation . . . . .	646
I. Endothelium-Derived Relaxing Factor . . . . .	646
II. EDRF and Cerebral Blood Vessels . . . . .	647
III. Pathophysiology . . . . .	649
C. Endothelium-Dependent Vasoconstriction . . . . .	651

I. Endothelium-Derived Constricting Factors .....	651
II. EDCFs and Cerebral Blood Vessels .....	652
III. Endothelin in Cerebral Blood Vessels .....	656
IV. Unidentified EDCF in Cerebral Blood Vessels .....	658
V. Pathophysiology .....	659
D. Cerebrovascularly Acting Drugs .....	660
I. Adrenoceptor Antagonists and Agonists .....	660
II. Acetylcholine .....	665
III. 5-HT and Its Receptor Antagonists .....	665
IV. Neuropeptides .....	666
1. Neuropeptide Y .....	666
2. Vasoactive Intestinal Polypeptide .....	667
3. Tachykinins .....	667
4. Calcitonin Gene-Related Peptide .....	668
5. Miscellaneous Peptides .....	668
V. Adenosine, Adenine Nucleotides and Related Drugs .....	669
VI. Histamine and Its Antagonists .....	670
VII. Thrombin .....	670
VIII. Ca Antagonists .....	671
IX. K-Channel Openers .....	672
X. Prostanoids and Related Drugs .....	672
References .....	674

## CHAPTER 19

<b>Altered Responsiveness of Vascular Smooth Muscle to Drugs in Diabetes</b>	
G. POGÁTSA. With 9 Figures .....	693
A. Introduction .....	693
I. Atherosclerosis in Diabetes .....	693
II. Microangiopathy in Diabetes .....	693
III. Diabetic Vascular Smooth Muscle .....	694
B. Altered Vascular Response in Diabetes .....	694
I. History .....	694
II. Localization .....	695
III. Pathomechanism .....	698
1. Adrenergic Receptor .....	698
2. Vasoactive Mediators .....	701
IV. Clinical Consequences .....	706
C. Summary .....	708
References .....	708
<b>Subject Index .....</b>	713
