# Contents

## CHAPTER 1

### **Stress Proteins: An Overview**

D.S. LATCHMAN. With 1 Figure .....	1
A. Introduction .....	1
B. The Stress Proteins .....	1
C. Functions of Stress Proteins .....	3
D. Hsp Expression and Regulation .....	4
E. Stress Proteins and Protection .....	5
F. Stress Proteins and Human Disease .....	6
G. Conclusion .....	7

## CHAPTER 2

### **The Hsp90 Chaperone Family**

L. NECKERS, E. MIMNAUGH and T.W. SCHULTE. With 2 Figures .....	9
A. General Aspects .....	9
B. The Early Protein Folding Complex .....	11
C. Hsp90-Containing Multimolecular Complexes .....	11
I. The Steroid Receptor-Associated Hsp90-Containing Intermediate Folding Complex .....	11
II. The Steroid Receptor-Associated Hsp90-Containing Mature Folding Complex .....	12
D. Individual Chaperone and Co-chaperone Proteins Found in Hsp90 Complexes .....	13
I. Hsp70 .....	13
II. p48 <sup>Hsp</sup> .....	13
III. p60 <sup>Hsp</sup> .....	13
IV. p23 .....	14
V. Immunophilins .....	14
VI. Other TPR-Containing Proteins .....	15
VII. p50 <sup>Cdc37</sup> .....	15
E. Refolding of Denatured Proteins .....	16
F. Benzoquinone Ansamycins and Nucleotide Binding to Hsp90 .....	18

XII	Contents
G. Hsp90 Client Proteins	22
I. Transcription Factors	22
1. Steroid Receptors	22
2. Aryl Hydrocarbon Receptor	23
3. Mutated p53	24
4. Heat Shock Factor	24
II. Protein Kinases	25
1. Tyrosine Kinases	25
a) The Src Family Kinases	25
b) Wee1 Kinase	26
c) Sevenless Tyrosine Kinase	26
d) Receptor Tyrosine Kinases – p185 <sup>erbB2</sup>	27
2. Serine/Threonine Kinases	27
a) Raf-1 Kinase	27
b) Casein Kinase II	28
c) Heme-Regulated eIF-2 $\alpha$ Kinase (HRI)	28
d) Cdk4/Cdk6	29
III. Other Proteins	29
1. Cytoskeletal Proteins	29
2. Calmodulin	29
3. $\beta\gamma$ -Subunits of Trimeric GTP-Binding Proteins	30
4. Proteasome	30
5. Hepadnavirus Reverse Transcriptase	30
6. Tumor Necrosis Factor Receptor and Retinoblastoma Protein	31
H. Hsp90 and Drug Development	31
I. Conclusion	32
References	32

CHAPTER 3

<b>Heat Shock Protein 70</b>	
G.C. LI and N.F. MIVECHI. With 7 Figures.	43
A. Introduction	43
B. Expression and Function of hsp70.	43
I. Hsp70, Transient Thermotolerance and Permanent Heat Resistance	43
II. Hsp70 and Apoptosis	47
III. Hsp70 Protects Cells from Oxidative Stress	49
IV. Hsp70 Protects Cells from X-Ray Damage	49
V. Hsp70 as Molecular Chaperone	50
C. Regulation of hsp70	52
1. Heat Shock Transcription Factor (HSF), the Transcriptional Regulator of hsp70	52

II. Signal Transduction Leading to Modulation of hsp70 Levels .....	53
III. Negative Regulatory Effect of ERK1 on hsp70 Gene Expression .....	54
IV. Mutational Analysis of HSF-1 Phosphorylation by ERK1 Protein Kinase .....	55
V. Modulation of HSF-1 by Other Protein Kinases .....	58
VI. Implication of HSF-1 Regulation by Functionally Opposing Signaling Cascades .....	58
VII. Regulation of Heat Shock Response: Possible Involvement of Ku Autoantigen .....	59
References .....	61

## CHAPTER 4

### **Mitochondrial Molecular Chaperones hsp60 and mhsp70: Are Their Roles Restricted to Mitochondria?**

B.J. SOLIYS and R.S. GUPTA. With 4 Figures .....	69
A. Introduction .....	69
B. Structure and Function .....	70
I. Studies with Purified Proteins .....	70
1. Hsp70/DnaK .....	70
2. Hsp60/GroEL .....	71
II. In Vivo and Mitochondrial Systems .....	73
C. Are hsp60 and mhsp70 Restricted to Mitochondria? .....	75
I. Subcellular Localization: The Unexplained Findings .....	75
II. Consideration of Possible Artifacts .....	81
III. Possible Extramitochondrial Functions .....	84
IV. Proposed Transport Mechanisms .....	85
D. Hsp60 in Drug Resistance and Disease .....	90
E. Future Prospects .....	92
References .....	93

## CHAPTER 5

### **Role of Hsp27 and Related Proteins**

A.-P. ARRIGO and X. PRÉVILLE. With 4 Figures .....	101
A. Introduction .....	101
B. sHsp Genes and Control of Their Expression .....	102
I. The Family of sHsp and the Structure of the Genes Encoding These Proteins .....	102
II. Regulation of the Expression of sHsp Genes by Heat Shock .....	103
III. Regulation of the Constitutive and Hormone-Dependent Expression of sHsp Genes .....	104

IV. Tissue-Specific sHsp Expression During Development and in Adult Organisms .....	104
V. Specific sHsp Expression During Early Differentiation .....	105
VI. Pathological sHsp Expression and Associated Diseases .....	106
C. Biochemical Properties of sHsp .....	108
I. Structural Organization of sHsp .....	108
II. Quaternary Structure of sHsp .....	108
III. Phosphorylation of sHsp .....	109
IV. Cellular Localization of sHsp .....	110
D. Functions of sHsp .....	111
I. sHsp Expression Induces Thermotolerance and Protects Cytoskeletal Architecture .....	111
II. sHsp Act as Protein Chaperones .....	112
III. sHsp Protection Against TNF and Oxidative Stress Inducers .....	112
IV. sHsp Expression Protects Against Apoptosis .....	116
1. sHsp Interfere with In Vitro-Mediated Apoptosis .....	116
2. sHsp as Essential Anti-apoptotic Proteins During Early Cell Differentiation .....	117
3. Molecular Mechanisms Underlying the Anti-apoptotic Function of sHsp .....	117
E. Conclusions .....	118
References .....	120

## CHAPTER 6

### Ubiquitin and the Stress Response

C.M. PICKART. With 3 Figures .....	133
A. Introduction .....	133
B. The Ubiquitin-Proteasome Pathway .....	134
C. The Ubiquitin Pathway and the Stress Response .....	136
I. Stress Proteins in the Ubiquitin Pathway .....	137
1. Ubiquitin .....	137
2. Ubiquitin-Conjugating Enzymes .....	138
3. Other Pathway Components .....	139
II. Ubiquitin Conjugation in Stressed Cells .....	140
III. Ubiquitin-Mediated Degradation in Stressed Cells .....	142
IV. The Ubiquitin Pathway and Induction of the Stress Response .....	144
V. Involvement of Molecular Chaperones in Ubiquitin-Dependent Degradation .....	145
D. Outstanding Questions .....	148
References .....	149

CHAPTER 7

**Regulation of Heat Shock Genes by Cytokines**

A. STEPHANOOU and D.S. LATCHMAN. With 6 Figures ..... 153

A. Introduction ..... 153

B. Cytokines ..... 154

C. Transcription Factors Activated by the  
IL-6 Receptor Family ..... 155

    I. C/EBPs ..... 155

    II. STATs ..... 156

D. Role of Interleukin-6 Family of Cytokines in Regulating  
Hsps ..... 157

E. Role of IFN- $\gamma$  in Regulating Hsp Expression ..... 161

F. Elevation of C/EBPs and STATs and Hsps Expression During  
Inflammatory Pathological States ..... 163

G. Role of IL-6 and Hsps in SLE ..... 164

H. Conclusion ..... 167

References ..... 167

CHAPTER 8

**Regulation of Heat Shock Genes by Ischemia**

T.S. NOWAK, JR., Q. ZHOU, W.J. VALENTINE, J.B. HARRUB and  
H. ABE. With 6 Figures ..... 173

A. Introduction ..... 173

B. Patterns of Heat Shock Gene Expression After  
Global and Focal Ischemia ..... 174

    I. Gene Expression and Neuronal Vulnerability  
    After Global Ischemia ..... 174

    II. Gene Expression After Focal Ischemia ..... 178

    III. Cryptic hsp72 Expression After Ischemia ..... 180

C. Regulation of the Postischemic Heat Shock Response ..... 183

    I. Injury Thresholds and the Stress Response ..... 183

        1. Thresholds for Expression of hsp72 and  
        Other Ischemia-Inducible Genes ..... 183

        2. Temperature Effects on hsp72 Expression After  
        Global Ischemia ..... 184

    II. Heat Shock Factor Activation After  
    Global Ischemia ..... 185

    III. Heat Shock Regulation After Anoxia/Aglycemia in  
    Hippocampal Slices ..... 187

        1. Hsp72 Induction After In Vitro Anoxia/Aglycemia ..... 187

        2. Pharmacological Manipulation of hsp72 Expression ..... 189

D. Summary and Conclusions ..... 190

References ..... 191

IV. Tissue-Specific sHsp Expression During Development and in Adult Organisms .....	104
V. Specific sHsp Expression During Early Differentiation .....	105
VI. Pathological sHsp Expression and Associated Diseases .....	106
C. Biochemical Properties of sHsp .....	108
I. Structural Organization of sHsp .....	108
II. Quaternary Structure of sHsp .....	108
III. Phosphorylation of sHsp .....	109
IV. Cellular Localization of sHsp .....	110
D. Functions of sHsp .....	111
I. sHsp Expression Induces Thermotolerance and Protects Cytoskeletal Architecture .....	111
II. sHsp Act as Protein Chaperones .....	112
III. sHsp Protection Against TNF and Oxidative Stress Inducers .....	112
IV. sHsp Expression Protects Against Apoptosis .....	116
1. sHsp Interfere with In Vitro-Mediated Apoptosis .....	116
2. sHsp as Essential Anti-apoptotic Proteins During Early Cell Differentiation .....	117
3. Molecular Mechanisms Underlying the Anti-apoptotic Function of sHsp .....	117
E. Conclusions .....	118
References .....	120

## CHAPTER 6

### **Ubiquitin and the Stress Response**

C.M. PICKART. With 3 Figures .....	133
A. Introduction .....	133
B. The Ubiquitin-Proteasome Pathway .....	134
C. The Ubiquitin Pathway and the Stress Response .....	136
I. Stress Proteins in the Ubiquitin Pathway .....	137
1. Ubiquitin .....	137
2. Ubiquitin-Conjugating Enzymes .....	138
3. Other Pathway Components .....	139
II. Ubiquitin Conjugation in Stressed Cells .....	140
III. Ubiquitin-Mediated Degradation in Stressed Cells .....	142
IV. The Ubiquitin Pathway and Induction of the Stress Response .....	144
V. Involvement of Molecular Chaperones in Ubiquitin-Dependent Degradation .....	145
D. Outstanding Questions .....	148
References .....	149

## CHAPTER 7

**Regulation of Heat Shock Genes by Cytokines**

A. STEPHANOY and D.S. LATCHMAN. With 6 Figures .....	153
A. Introduction .....	153
B. Cytokines .....	154
C. Transcription Factors Activated by the IL-6 Receptor Family .....	155
I. C/EBPs .....	155
II. STATs .....	156
D. Role of Interleukin-6 Family of Cytokines in Regulating Hsps .....	157
E. Role of IFN- $\gamma$ in Regulating Hsp Expression .....	161
F. Elevation of C/EBPs and STATs and Hsps Expression During Inflammatory Pathological States .....	163
G. Role of IL-6 and Hsps in SLE .....	164
H. Conclusion .....	167
References .....	167

## CHAPTER 8

**Regulation of Heat Shock Genes by Ischemia**

T.S. NOWAK, JR., Q. ZHOU, W.J. VALENTINE, J.B. HARRUB and H. ABE. With 6 Figures .....	173
A. Introduction .....	173
B. Patterns of Heat Shock Gene Expression After Global and Focal Ischemia .....	174
I. Gene Expression and Neuronal Vulnerability After Global Ischemia .....	174
II. Gene Expression After Focal Ischemia .....	178
III. Cryptic hsp72 Expression After Ischemia .....	180
C. Regulation of the Postischemic Heat Shock Response .....	183
I. Injury Thresholds and the Stress Response .....	183
1. Thresholds for Expression of hsp72 and Other Ischemia-Inducible Genes .....	183
2. Temperature Effects on hsp72 Expression After Global Ischemia .....	184
II. Heat Shock Factor Activation After Global Ischemia .....	185
III. Heat Shock Regulation After Anoxia/Aglycemia in Hippocampal Slices .....	187
1. Hsp72 Induction After In Vitro Anoxia/Aglycemia .....	187
2. Pharmacological Manipulation of hsp72 Expression .....	189
D. Summary and Conclusions .....	190
References .....	191

## CHAPTER 9

**Regulation of Heat Shock Transcription Factors by Hypoxia or Ischemia/Reperfusion in the Heart and Brain**

J. NISHIZAWA and K. NAGATA. With 4 Figures .....	201
A. Introduction .....	201
B. Regulation of Heat Shock Gene Transcription .....	202
I. Family of Heat Shock Factors .....	202
II. Regulation of DNA-Binding Activity of HSF1 .....	203
C. Damage by Ischemia and Reperfusion .....	203
I. Ischemia .....	203
II. Reperfusion .....	205
D. Regulation of Hsps by Ischemia/Reperfusion in the Brain and Heart .....	205
I. Induction of Hsps by Ischemia/Reperfusion in the Brain .....	205
II. Induction of Hsps by Ischemia/Reperfusion in the Heart .....	208
E. Regulation of HSF Activation by Hypoxia or Ischemia/Reperfusion .....	208
I. HSF Activation by Hypoxia .....	208
II. HSF Activation by Ischemia in the Brain .....	209
III. HSF Activation by Ischemia/Reperfusion in the Heart .....	209
IV. HSF Activation by Ischemia/Reperfusion in Other Tissues .....	212
F. Ischemic Tolerance by Hsps in the Brain and Heart .....	213
I. Ischemic Tolerance by Hsps in the Brain .....	213
II. Myocardial Protection Against Ischemia by Hsps .....	213
G. Mechanisms of HSF Activation by Hypoxia or Ischemia/Reperfusion .....	214
I. Specific Activation of HSF1 by Hypoxia or Ischemia/Reperfusion .....	214
II. Signals for the Activation of HSF1 by Hypoxia or Ischemia/Reperfusion .....	214
1. ATP Depletion .....	215
2. Reactive Oxygen Species .....	215
3. Arachidonic Acid and Its Metabolites .....	217
4. Decreased Intracellular pH .....	217
H. Clinical Application and Future Perspective .....	217
References .....	218

## CHAPTER 10

**Autoregulation of the Heat Shock Response**

Y. SHI and R.I. MORIMOTO. With 3 Figures .....	225
--	-----

A. Introduction .....	225
B. Regulation of the Heat Shock Response in Eukaryotes .....	226
I. Overview .....	226
II. Biochemical Study of Autoregulation in Higher Eukaryotes .....	228
III. Genetic Evidence for Autoregulation of the Heat Shock Response in Yeast and <i>Drosophila</i> .....	230
C. Regulation of the Heat Shock Response in Prokaryotes .....	231
I. Overview .....	231
II. Genetic Evidence for Autoregulation of the <i>E. coli</i> Heat Shock Response .....	232
III. Biochemical Studies on Autoregulation of the <i>E. coli</i> Heat Shock Response .....	233
D. Common Features of the Prokaryotic and Eukaryotic Heat Shock Response .....	234
References .....	235

## CHAPTER 11

### **The Cellular Stress Gene Response in Brain**

I.R. BROWN and F.R. SHARP. With 2 Figures .....	243
A. Introduction .....	243
B. Response of the Brain to Physiologically Relevant Temperature Increase .....	243
I. Differential Induction of Heat Shock mRNA in Different Cell Types of the Hyperthermic Brain .....	243
II. Intracellular Targeting of Neural Heat Shock mRNAs .....	245
III. Cell Type Differences in Neural Heat Shock Proteins .....	245
IV. Expression of Heat Shock Proteins in the Developing Brain .....	247
V. Activation of Neural Heat Shock Transcription Factor HSF1 .....	247
VI. In Vivo Transcription Rate of Heat Shock Genes in the Brain .....	248
VII. Neuroprotective Effect of Heat Shock Protein in the Retina .....	249
VIII. Conclusions .....	249
C. Cellular Stress Gene Response to Focal Cerebral Ischemia .....	249
I. Hsp70 and Delineation of the Penumbra .....	249
II. Hsp32 (HO-1) Spreading Depression Mediated Induction in Microglia .....	251
III. Hsp27 Spreading Depression Mediated Induction in Astrocytes .....	252

IV. Glucose Transporters/grp75/grp78: HIF Mediated	
Induction .....	253
V. Conclusions .....	253
D. Cellular Stress Gene Response to	
Subarachnoid Hemorrhage .....	254
I. Clinical Syndrome of Subarachnoid Hemorrhage	
and the Role of HO .....	254
II. Induction of HO-1 Following Experimental Subarachnoid	
Hemorrhage .....	255
III. Induction of HO-1 Following Subarachnoid Injections of	
Hemoglobin and Protoporphyrins .....	256
IV. Model for Metabolism of Heme by Microglia, Neurons	
and Meningeal Cells Following Subarachnoid	
Hemorrhage .....	258
References .....	258

## CHAPTER 12

### **Heat Stress Proteins and Their Relationship to Myocardial Protection**

R. CARROLL and D.M. YELLON .....	265
A. Introduction .....	265
B. Heat Stress and the Stress Response .....	265
C. Are Stress Proteins Protective? .....	266
D. Evidence for the Ability of Stress Proteins	
To Protect the Cell .....	266
I. Thermotolerance .....	266
II. Cross-tolerance .....	267
III. Stress Proteins and the Heart .....	268
IV. Heat Stress and Myocardial Protection .....	268
V. Heat Stress Proteins and Ischaemic Preconditioning .....	271
VI. Heat Stress and Protection Against Non-ischaemic	
Injury .....	272
VII. Mechanisms of Cardiac Protection by	
Elevated Temperature .....	273
E. Conclusions .....	274
References .....	275

## CHAPTER 13

### **Heat Shock Proteins in Inflammation and Immunity**

M. BACHELET, G. MULTHOFF, M. VIGNOLA, K. HIMENO and B.S. POLLÁ	
With 4 Figures .....	281
A. Introduction: Multiple Roles of Heat Shock Proteins in	
Inflammation and Immunity .....	281
B. Role of Hsp Localization in the Induction of an	
Immune Response .....	282

C. Hsp and Cell Adhesion in the Initiation of Inflammation .....	284
D. Non-specific Immunity: Cells and Mediators Involved in the Induction of a Heat Shock/Stress Response .....	286
I. Monocytes-Macrophages .....	286
1. Reactive Oxygen Species .....	286
2. Lipid Mediators of Inflammation .....	287
3. Cytokines .....	288
4. Nuclear Factor $\kappa$ B (NF- $\kappa$ B) .....	289
II. Granulocytic Phagocytes .....	289
1. Polymorphonuclear Leukocytes (PMN) .....	289
2. Eosinophils .....	290
E. Cellular Immunity .....	290
I. T Cells .....	291
II. $\gamma\delta$ T Cells .....	292
III. Hsp, NK Cells and Cancer Immunity .....	294
F. The Paradigm of Asthma .....	295
G. Conclusions and Perspectives .....	298
References .....	298

## CHAPTER 14

### Heat Shock Proteins in Embryonic Development

M. MORANGE .....	305
A. Introduction .....	305
B. Specific Expression of Hsps During <i>Drosophila</i> Development .....	307
C. Essential Roles of Hsps During Development .....	309
I. Mammalian Small Hsp: A "Checkpoint" Between Proliferation, Differentiation and Cell Death .....	309
II. Hsp90 and the Control of Muscle Cell Differentiation Through the Regulation of Myogenic Transcription Factors .....	312
III. Hsp70-2: A Specialized Chaperone Essential for Meiosis .....	313
D. Mechanisms Regulating the Expression of Hsps During Differentiation and Development .....	314
E. In Search of Additional Developmental Chaperones .....	316
F. The Place of Hsps in Aging .....	317
G. Conclusion .....	319
References .....	319

## CHAPTER 15

### Heat Shock Proteins in Rheumatoid Arthritis

W. VAN EDEN .....	329
-------------------	-----

A. Introduction .....	329
B. Autoimmune Arthritis and Immunity to Bacterial Antigens .....	330
C. Hsp60 Is the Critical Antigen in Rat Adjuvant Arthritis .....	333
D. Nasal Tolerance to hsp Peptides Suppresses Antigen and Non-Antigen Induced Arthritis .....	335
E. Conserved hsp60 Epitopes Induce Arthritis Suppressive T Cells .....	335
F. Suppression in Arthritis Models Is Specific for Heat Shock Proteins .....	336
G. Immune Mediated Diseases .....	337
H. Rheumatoid Arthritis as a Model Autoimmune Disease .....	337
I. Hsps in Autoimmune and Other Inflammatory Diseases .....	338
J. Hsps in Human Arthritic Diseases .....	339
K. Hsp60 T Cell Responses in RA and JRA Are Associated with Suppressive Cytokine Production .....	340
L. Mechanisms by Which hsps Produce Protection in Autoimmune Arthritis .....	341
M. Lessons for the Development of Specific Immunotherapy in Autoimmunity .....	342
N. Conclusion .....	343
References .....	344

## CHAPTER 16

### **Heat Shock Protein 60 and Type I Diabetes**

S.G. NEWTON and D.M. ALTMANN .....	347
A. Introduction .....	347
B. Hsp60 and Autoimmune Diseases .....	348
C. Hsp60 Reactivity and the NOD Mouse Model of Type I Diabetes .....	349
D. Cell Types Required for Diabetogenesis in Patients .....	351
E. Islet Cell Antibody Responses .....	352
F. Autoreactive T Cell Responses .....	353
G. T Cell Clones of Unknown Antigen Specificity .....	355
H. Evidence from Suppression of Specific T Cell Responses in NOD Mice .....	355
I. Concluding Remarks .....	357
References .....	358

## CHAPTER 17

### **Heat Shock Proteins and Multiple Sclerosis**

G. RISTORI, C. MONTESPERELLI, D. KOVACS, G. BORSELLINO, L. BATTISTINI, C. BUTINELLI, C. POZZILLI, C. MATTEI and M. SALVETTI. With 3 Figures .....	363
---	-----

A. Introduction .....	363
B. Hsp Expression in Inflammatory, Demyelinating Diseases of the Brain .....	365
I. Hsp Expression in Glial Cells .....	365
II. Experimental Allergic Encephalomyelitis .....	366
III. Multiple Sclerosis .....	367
C. Immune Response to Hsps .....	368
I. Experimental Allergic Encephalomyelitis .....	371
II. Multiple Sclerosis .....	372
D. Other Roles of Hsps in MS .....	374
E. Conclusions and Future Work .....	376
References .....	377

## CHAPTER 18

### Heat Shock Proteins in Atherosclerosis

A.D. JOHNSON .....	381
A. Introduction .....	381
B. Pathogenesis of Primary Atherosclerotic Lesions .....	381
C. Arterial Hsp Expression After Vascular Injury and During Development of Atherosclerotic Lesions .....	382
D. Association of Hsps with Specific Stages of Atherosclerotic Lesion Development .....	383
I. Hsps in Hypertension, a Risk Factor for Atherosclerosis .....	383
II. Immunological Responses to Hsps in Primary Plaque Development .....	385
1. T-Lymphocyte Activation by Hsp60 in Atherosclerotic Vessels .....	386
2. Do Anti-Hsp60 Antibodies Contribute to Necrotic Core Formation? .....	388
3. Biphasic Effects of Hsp Expression in Organ Transplantation: Tissue Preservation Versus Graft Arteriosclerosis .....	389
III. Hsps in the Mature Atherosclerotic Plaque .....	390
1. Induction of Hsp Expression by oxLDL .....	390
2. The Stress Response and Plaque Cell Survival Versus Necrosis .....	392
E. Future Directions .....	395
References .....	396

## CHAPTER 19

### Heat Shock Protein-Peptide Interaction: Basis for a New Generation of Vaccines Against Cancers and Intracellular Infections

P.K. SRIVASTAVA .....	403
-----------------------	-----

A. Introduction .....	403
B. Hsps Chaperone Antigenic Peptides .....	405
C. Unique Advantages of Hsp-Peptide Vaccines .....	406
D. Use of Hsp-Peptide Complexes as Cancer Vaccines .....	407
E. Protective Human Cancer Antigens: Unique to Each Individual Cancer or Shared Between Cancers? .....	409
F. Hsp-Peptide Complexes as Vaccines Against Intracellular Infectious Agents .....	411
References .....	412
 Subject Index .....	 415
