<i>Preface</i>	<i>xi</i>	3.1.4	Grids	20
<i>List of contributors</i>	<i>xii</i>	3.2	Artefacts	20
1 Basic radiology principles and interpretation	1	3.2.1	Importance of artefacts	20
Silke Hecht and Eberhard Ludewig		3.2.2	Assessment of image quality – recognition of artefacts	21
1.1 Introduction	1	3.2.3	Causes of artefacts	21
1.2 Nomenclature and image orientation	1	4 Applied radiation safety		31
1.3 Radiographic opacity	2	Silke Hecht		
1.4 Silhouetting and summation	3	5 Advanced diagnostic imaging		36
1.4.1 Silhouetting	3	Silke Hecht and Federica Morandi		
1.4.2 Summation	3	5.1 Ultrasonography (ultrasound)		36
1.5 Radiographic perception	3	5.1.1 Basic principles		36
1.6 Radiograph description and interpretation	6	5.1.2 Advantages and disadvantages		37
2 Designing a radiographic technique chart	8	5.1.3 Applications in small animal practice		37
Eberhard Ludewig and Silke Hecht		5.2 Nuclear medicine (scintigraphy)		40
2.1 Introduction	8	5.2.1 Basic principles		40
2.2 Influence of tube voltage (kVp) and tube current–time product (mAs) on image quality	8	5.2.2 Advantages and disadvantages		41
2.2.1 Under- and overexposure	8	5.2.3 Applications in small animal practice		41
2.2.2 Motion unsharpness	9	5.3 Computed tomography (CT)		44
2.2.3 Display of differences in attenuation	11	5.3.1 Basic principles		44
2.3 Film–screen systems and digital radiography	12	5.3.2 Advantages and disadvantages		44
2.4 Grids	12	5.3.3 Applications in small animal practice		45
2.5 Focus-to-detector distance	13	5.4 Magnetic resonance imaging (MRI)		47
2.6 Practical application	13	5.4.1 Basic principles		47
3 Radiology physics and artefacts	17	5.4.2 Advantages and disadvantages		48
Eberhard Ludewig and Silke Hecht		5.4.3 Applications in small animal practice		50
3.1 Generation of a radiograph	17	6 Head		53
3.1.1 X-ray production and interaction with the patient	17	Randi Drees		
3.1.2 Film–screen systems	17	6.1 Anatomy and indications		53
3.1.3 Digital radiography	18	6.1.1 Skull		53
		6.1.2 Nasal cavity and paranasal sinuses		53
		6.1.3 External, middle and inner ear		53
		6.1.4 Temporomandibular joints		53
		6.1.5 Dental structures		54
		6.1.6 Soft tissues		54
		6.1.7 Salivary glands		55

6.2	Radiographic technique and positioning	55	9	Thorax (excluding the heart)	115
6.3	Diseases of the head	61		Silke Hecht	
6.3.1	Congenital diseases	61	9.1	Anatomy and indications	115
6.3.2	Metabolic diseases	62	9.1.1	Anatomy	115
6.3.3	Neoplasia	62	9.1.2	Indications	119
6.3.4	Infectious diseases	65	9.2	Radiographic technique and positioning	119
6.3.5	Trauma	67	9.2.1	Technique	120
6.3.6	Diseases of the salivary glands and the nasolacrimal duct	69	9.2.2	Positioning	120
6.3.7	Dental diseases	69	9.2.3	Phase of respiration (inspiration – expiration)	121
6.3.8	Other diseases	71	9.3	Diseases of the thorax	121
7	Spine (neuroradiology including contrast procedures)	72	9.4	Diseases of the thoracic wall	121
	Silke Hecht and Federica Morandi		9.4.1	Extrapleural lesions	121
7.1	Anatomy and indications	72	9.4.2	Abnormal opacity of the thoracic wall	126
7.1.1	Anatomy	72	9.4.3	Thoracic wall anomalies	126
7.1.2	Indications	76	9.5	Diseases of the diaphragm	126
7.2	Radiographic technique and positioning	76	9.5.1	Diaphragmatic paralysis	127
7.2.1	Technique	76	9.5.2	Diaphragmatic hernia	127
7.2.2	Positioning	77	9.5.3	Other diseases	128
7.2.3	Myelography	78	9.6	Diseases of the pleura and pleural space	130
7.2.4	Other spinal contrast studies	88	9.6.1	Pleural effusion	130
7.3	Spinal diseases	88	9.6.2	Pneumothorax	132
7.3.1	Congenital disorders	88	9.6.3	Infiltrative diseases of the pleura	134
7.3.2	Atlantoaxial instability	90	9.7	Diseases of the mediastinum	135
7.3.3	Degenerative disorders	91	9.7.1	Mediastinal mass lesions and generalized mediastinal widening	136
7.3.4	Intervertebral disc disease	92	9.7.2	Pneumomediastinum	140
7.3.5	Cervical spondylomyelopathy (CSM; 'wobbler syndrome')	95	9.8	Diseases of the lung	141
7.3.6	Degenerative lumbosacral stenosis ('cauda equina syndrome')	97	9.8.1	Pulmonary patterns	142
7.3.7	Inflammatory conditions of the spine	98	9.8.2	Specific lung diseases	146
7.3.8	Spinal trauma	100	10	Heart and great vessels	155
7.3.9	Spinal neoplasia	101		William H. Adams and Silke Hecht	
7.3.10	Other spinal diseases	102	10.1	Anatomy and indications	155
8	Neck (including trachea)	106	10.1.1	Anatomy	155
	Silke Hecht		10.1.2	Indications	160
8.1	Anatomy and indications	106	10.2	Radiographic technique and positioning	160
8.1.1	Anatomy	106	10.2.1	Technique	160
8.1.2	Indications	107	10.2.2	Positioning	160
8.2	Radiographic technique and positioning	107	10.2.3	Contrast studies	160
8.2.1	Technique	107	10.3	Diseases of the cardiovascular system	161
8.2.2	Positioning	108	10.3.1	Cardiomegaly and microcardia	161
8.3	Diseases of the neck	108	10.3.2	Congestive heart failure (cardiac insufficiency)	165
8.3.1	Diseases of the larynx	108	10.3.3	Congenital heart diseases	166
8.3.2	Diseases of the trachea	110	10.3.4	Acquired heart diseases	171
			10.3.5	Disorders of the pericardium	175

11 General abdomen	176	13 Digestive tract (including contrast procedures)	224
Tobias Schwarz		Silke Hecht and William H. Adams	
11.1 Anatomy and indications	176	13.1 Anatomy and indications	224
11.1.1 Anatomy	176	13.1.1 Anatomy	224
11.1.2 Indications	179	13.1.2 Indications	228
11.2 Radiographic technique, positioning and interpretation	182	13.2 Radiographic technique and positioning	228
11.2.1 Technique	182	13.2.1 Introduction	229
11.2.2 Positioning	183	13.2.2 Oesophagography	229
11.2.3 Abdominal image contrast	185	13.2.3 Contrast examination of the stomach and small intestine	233
11.2.4 Basic principles of contrast procedures	186	13.2.4 Contrast examination of the large intestine (colonogram)	235
11.2.5 Approach and interpretation	187	13.3 Disorders of the oesophagus	239
11.3 Interpretation of changes in abdominal image contrast	188	13.3.1 Megaoesophagus	239
11.3.1 Peritoneal and retroperitoneal loss of detail	188	13.3.2 Oesophageal stricture	239
11.3.2 Loss of contrast due to space-occupying lesions	188	13.3.3 Foreign bodies	240
11.3.3 Irregular loss of (retro)peritoneal contrast	189	13.3.4 Oesophageal neoplasia	240
11.3.4 Extra-abdominal changes with loss of contrast	193	13.3.5 Hiatal hernia and gastro-oesophageal intussusception	241
11.3.5 Abdominal accumulations of gas	193	13.4 Disorders of the stomach	243
11.3.6 Abdominal calcifications	194	13.4.1 Changes in gastric position	243
11.4 Classification of abdominal masses	197	13.4.2 Gastric dilatation (GD) and gastric dilatation with volvulus (GDV)	243
11.4.1 Terminology and definitions	197	13.4.3 Foreign bodies	243
11.4.2 Cranial masses	199	13.4.4 Pyloric obstruction (gastric outflow obstruction)	245
11.4.3 Dorsal masses	200	13.4.5 Gastric ulcers	245
11.4.4 Caudal masses	202	13.4.6 Infiltrative disorders and mass lesions of the stomach	245
11.4.5 Ventral masses	203	13.4.7 Gastric perforation	248
11.4.6 Central masses	203	13.5 Disorders of the small intestine	248
12 Liver, spleen, lymph nodes and pancreas	205	13.5.1 Ileus	248
Dagmar Nitzl and Stefanie Ohlerth		13.5.2 Foreign bodies	250
12.1 Anatomy and indications	205	13.5.3 Intussusception	250
12.1.1 Anatomy	205	13.5.4 Small intestinal volvulus	251
12.1.2 Indications	208	13.5.5 Infiltrative disorders of the small intestine	251
12.2 Radiographic technique and positioning	208	13.6 Disorders of the large intestine	252
12.3 Diseases of the liver	208	13.6.1 Megacolon	252
12.3.1 Changes in hepatic size	208	13.6.2 Congenital anomalies	253
12.3.2 Changes in radiographic opacity	213	13.6.3 Intussusception	253
12.4 Diseases of the spleen	215	13.6.4 Infiltrative disorders of the large intestine	253
12.4.1 Generalized splenomegaly	215	14 Urogenital tract (including contrast procedures)	256
12.4.2 Focal splenomegaly	217	Silke Hecht and George A. Henry	
12.5 Diseases of the lymph nodes	218	14.1 Anatomy and indications	256
12.6 Diseases of the pancreas	219	14.1.1 Anatomy	256

14.1.2	Indications	258	15.3	Approach to radiographic evaluation	304
14.2	Radiographic technique and positioning	258	15.4	Soft-tissue abnormalities	305
14.2.1	Excretory urography (EU)/intravenous pyelography (IVP)	259	15.4.1	Abnormal radiographic opacity	305
14.2.2	Cystography and urethrography (retrograde)	262	15.4.2	Changes in soft-tissue volume	306
14.2.3	Other contrast studies	267	15.5	Skeletal abnormalities	309
14.3	Renal and ureteral diseases	269	15.5.1	Bone response to disease	309
14.3.1	Abnormalities in renal number and position	269	15.5.2	Classification of bone lesions	309
14.3.2	Abnormalities in renal size and shape	269	16 Congenital and developmental bone and joint diseases	318	
14.3.3	Abnormalities in renal opacity	269		Federica Morandi, Silke Hecht and Gregory B. Daniel	
14.3.4	Pyelonephritis	269	16.1	Joint diseases	318
14.3.5	Chronic renal disease	269	16.1.1	Diseases of the shoulder joint	318
14.3.6	Hydronephrosis and hydroureter	269	16.1.2	Diseases of the elbow joint	319
14.3.7	Polycystic kidney disease (PKD)	274	16.1.3	Diseases of the carpus	323
14.3.8	Perirenal pseudocysts	274	16.1.4	Diseases of the coxofemoral joint	324
14.3.9	Renal neoplasia	274	16.1.5	Diseases of the stifle joint	326
14.3.10	Renal and ureteral calculi	274	16.1.6	Diseases of the tarsus	329
14.3.11	Renal or ureteral rupture	277	16.2	Bone diseases	329
14.3.12	Ectopic ureter	277	16.2.1	Congenital dysostoses	329
14.4	Diseases of the urinary bladder and urethra	278	16.2.2	Anomalies in cartilage and bone development	331
14.4.1	Cystitis and urethritis	279	16.2.3	Other bone diseases	333
14.4.2	Bladder and urethral calculi	279	17 Acquired bone and joint diseases	336	
14.4.3	Bladder and urethral neoplasia	281		Federica Morandi, Silke Hecht and Gregory B. Daniel	
14.4.4	Urachal diverticulum	281	17.1	Degenerative joint disease	336
14.4.5	Bladder or urethral rupture	281	17.2	Inflammatory bone and joint diseases	336
14.5	Pregnancy and diseases of the female reproductive tract	282	17.2.1	Inflammatory bone diseases	336
14.5.1	Pregnancy	282	17.2.2	Inflammatory joint diseases	338
14.5.2	Ovarian diseases	283	17.3	Neoplastic bone and joint diseases	340
14.5.3	Diseases of the uterus	283	17.3.1	Primary bone tumours	341
14.6	Diseases of the male reproductive tract	286	17.3.2	Secondary bone tumours	341
14.6.1	Diseases of the prostatic gland	286	17.3.3	Other tumours and tumour-like lesions	343
14.6.2	Other diseases of the male reproductive tract	288	17.3.4	Joint-associated tumours	343
15 General principles of orthopaedic radiology	290		17.4	Fractures and luxations	343
	Silke Hecht, Federica Morandi and Gregory B. Daniel		17.4.1	Fractures	343
15.1	Anatomy and indications	290	17.4.2	Luxations	344
15.1.1	Anatomy	290	17.5	Other acquired conditions of the musculoskeletal system	344
15.1.2	Indications	298	17.5.1	Hypertrophic osteopathy	344
15.2	Radiographic technique and positioning	298	17.5.2	Diseases of soft tissues	345
15.2.1	Standard radiographs	298			
15.2.2	Special radiographic techniques	300			

18 Fractures	346	19.9.4 Arthritis and degenerative joint disease	371
Silke Hecht, Federica Morandi and Gregory B. Daniel		19.9.5 Other diseases	371
18.1 Fracture diagnosis and classification	346	20 Small mammals	373
18.1.1 Aetiology	346	Michaela Gumpenberger, Jasmin Hassan and Alexandra Böhrer	
18.1.2 Location	346	20.1 Anatomy	373
18.1.3 Degree	348	20.1.1 Head	373
18.1.4 Communication with the external environment	349	20.1.2 Axial skeleton	374
18.1.5 Type	349	20.1.3 Appendicular skeleton	374
18.1.6 Dislocation	349	20.1.4 Inner organs	374
18.1.7 Chronicity	349	20.2 Radiographic technique and positioning	376
18.2 Fracture healing	350	20.2.1 Teeth	377
18.2.1 Primary or direct healing	350	20.2.2 Musculoskeletal system	377
18.2.2 Secondary healing	350	20.2.3 Thorax and abdomen	377
18.2.3 Factors influencing fracture healing	352	20.3 Disorders of the head and upper neck region	377
18.2.4 Radiographic evaluation	352	20.3.1 Dental diseases	377
18.2.5 Complications	352	20.3.2 Other diseases	378
19 Birds	356	20.4 Disorders of the locomotor apparatus	381
Marcy Souza and Jürgen Schumacher		20.4.1 Spinal diseases	381
19.1 Anatomy and indications	356	20.4.2 Diseases of the extremities	381
19.1.1 Anatomy	356	20.5 Disorders of the thorax	383
19.1.2 Indications	360	20.5.1 Heart diseases	383
19.2 Radiographic technique and positioning	360	20.5.2 Lung diseases	383
19.2.1 Preparation, positioning and technique	360	20.5.3 Thoracic neoplasia	383
19.2.2 Contrast studies	363	20.5.4 Other thoracic diseases	383
19.3 Disorders of the head	363	20.6 Disorders of the abdomen	385
19.4 Disorders of the cardiovascular system	363	20.6.1 Diseases of the gastrointestinal tract	385
19.5 Disorders of the respiratory tract	364	20.6.2 Diseases of the liver	386
19.6 Disorders of the coelomic cavity, liver and spleen	364	20.6.3 Diseases of the urinary tract	386
19.6.1 Coelomic cavity	364	20.6.4 Diseases of the reproductive tract	389
19.6.2 Liver	364	20.6.5 Other abdominal diseases	391
19.6.3 Spleen	364	21 Reptiles	393
19.7 Disorders of the gastrointestinal tract	366	Michaela Gumpenberger, Jürgen Schumacher and Marcy Souza	
19.7.1 Impaction	366	21.1 Anatomy and indications	393
19.7.2 Dilatation	366	21.1.1 Anatomy	393
19.7.3 Other findings	368	21.1.2 Indications	395
19.8 Disorders of the urogenital tract	368	21.2 Radiographic technique and positioning	395
19.8.1 Diseases of the kidneys	368	21.2.1 General principles	395
19.8.2 Diseases of the gonads	369	21.2.2 Contrast procedures	398
19.9 Disorders of the musculoskeletal system	369	21.3 Disorders of the musculoskeletal system	398
19.9.1 Fractures and luxations	369	21.3.1 Metabolic bone diseases	399
19.9.2 Osteomyelitis	371	21.3.2 Osteomyelitis and septic arthritis	399
19.9.3 Bone tumours	371		

21.3.3	Fractures and luxations	399	21.8	Disorders of the urinary tract	408
21.3.4	Other diseases	403	21.9	Disorders of the reproductive tract	410
21.4	Disorders of the head	403	21.9.1	Sexing	410
21.5	Disorders of the cardiovascular system	403	21.9.2	Diagnosis of a gravid reptile	410
21.6	Disorders of the respiratory tract	404	21.9.3	Egg binding	410
21.7	Disorders of the gastrointestinal tract	406	21.10	Neoplastic disorders	414
			<i>Index</i>		<i>417</i>
