

# Contents

- 1 Introduction** ..... 1
- 2 Quantum Mechanical Phenomena** ..... 3
  - 2.1 Atomic Models According to Bohr and Sommerfeld ..... 3
  - 2.2 Particle in a Box ..... 5
    - 2.2.1 Quantum Mechanical States ..... 5
    - 2.2.2 Discrete Energy Levels and Position Probability ..... 8
    - 2.2.3 Correspondence Principle and Hamiltonian ..... 9
    - 2.2.4 Preparation and Superposition of States ..... 10
- 3 Mathematical formulation** ..... 13
  - 3.1 Heisenberg and Schrödinger Representation ..... 13
  - 3.2 Postulates of Quantum Mechanics ..... 14
    - 3.2.1 Postulate 1: States in the Hilbert Space ..... 14
    - 3.2.2 Postulate 2: Measured Values, Operators  
and Eigenvalues ..... 18
    - 3.2.3 Postulate 3: Probabilities ..... 22
  - 3.3 Solution Algorithm ..... 24
- 4 Examples of Use** ..... 25
  - 4.1 A Thought Experiment with Toy Blocks ..... 25
  - 4.2 Schrödinger's Cat ..... 27
  - 4.3 The Stern-Gerlach Experiment ..... 27
- Literature** ..... 33
