List of Figures	ix
List of Tables	xi
List of Definitions	xiii
1 Introduction	1
1.1 Problem Statement	2
1.2 Research Objective	4
1.3 Scientific Approach	5
1.4 Contribution of the Thesis	7
1.5 Structure of the Thesis	8
2 Background	9
2.1 Requirements Engineering	9
2.2 Requirements Engineering Objectives	12
2.3 Vision Videos as a Documentation Option for Communication	17
3 Related Work	23
3.1 Supporting Communication for Shared Understanding	23
3.2 Applying Vision Videos in Requirements Engineering	25
4 A Survey on Videos as a Documentation Option in Requirements Engineering	31
4.1 Survey Objective	31
4.2 Survey Design	33
4.3 Sample	36
4.4 Results: Descriptive Statistics	37
4.5 Results: Inferential Statistics	44
4.6 Threats to Validity	46
4.7 Discussion	49
4.8 Conclusion	51
5 A Candidate Solution to Integrate Videos into Requirements Engineering Practices	53
5.1 A Candidate Solution Based on the Human Errors Model	53
5.2 Concept 1: Video as a By-Product	55
5.3 Concept 2: Awareness and Guidance	57
6 Revising Requirements Engineering Practices to Apply Videos as a By-Product	59
6.1 Developing the Video as a By-Product Approach	59
6.2 Selecting Practices for Revision to Apply Videos as a By-Product	65
6.3 Revising Prototyping to Apply Videos as a By-Product	67
6.4 Validating the Benefit of Videos as a By-Product of Prototyping	75
6.5 Revising Workshops to Apply Videos as a By-Product	84
6.6 Validating the Benefit of Videos as a By-Product of Workshops	93
6.7 Summary of the Chapter	104

7	Awareness and Guidance to Apply Videos in Requirements Engineering Practices	105
7.1	The Need for Awareness and Guidance	105
7.2	Research Process to Develop the Concept Awareness and Guidance	107
7.3	Step 1: Analyzing Generic Video Production Guidelines	109
7.4	Step 2.1: Developing a Quality Model for Videos	119
7.5	Step 2.2: Adapting the Quality Model for Videos to Vision Videos	122
7.6	Step 2.3: Validating of the Quality Model for Vision Videos	131
7.7	Step 3.1: Developing a Condensed Guideline for Video Production and Use . . .	149
7.8	Step 3.2: Validating the Condensed Guideline for Video Production and Use . .	153
7.9	Step 3.3: Adapting the Condensed Guideline to Vision Videos	160
7.10	Summary of the Chapter	164
8	Case Study for Validation of the Candidate Solution in the Industry	165
8.1	Case Study Objective	165
8.2	Case Study Design	166
8.3	Sample	169
8.4	Results	170
8.5	Threats to Validity	174
8.6	Discussion	177
8.7	Conclusion	179
9	Summary of the Thesis	181
9.1	Conclusion	181
9.2	Limitations of the Thesis	183
9.3	Future Work	184
A	Supplementary Materials of the Related Work	187
B	Supplementary Materials of the Survey	191
B.1	Questionnaire of the Survey	192
B.2	Question Order of the Questionnaire	196
B.3	Manual Coding Results	197
C	Supplementary Materials of the Prototyping Experiment	205
C.1	Textual Description of the Scenario	206
C.2	Image Set of the Static Mockups	207
C.3	Questionnaire of the Experiment	212
C.4	Data Set of the Experimental Results	215
D	Supplementary Materials of the Workshop Experiment	217
D.1	Questionnaire of the Experiment for Subjects Using ReqVidA	218
D.2	Questionnaire of the Experiment for Subjects Using Text Editor	222
D.3	Data Set of the Experimental Results	226

E	Supplementary Materials of the Concept Awareness and Guidance	227
E.1	Manual Coding Results of Video Production Guidelines	228
E.2	Manual Coding Results of Software Project Vision	230
E.3	Materials of the Experiment	231
E.4	The Condensed Guideline for Video Production and Use	240
E.5	Materials of the Content Validation Study	252
E.6	The Condensed Guideline for Vision Video Production and Use	258
F	Supplementary Materials of the Case Study	271
F.1	Questionnaire 1: Initial Assessment	272
F.2	Questionnaire 2: After Preproduction	273
F.3	Questionnaire 3: After Production	274
F.4	Questionnaire 4: After Viewing – For the Participants	278
F.5	Questionnaire 4: After Viewing – For the Video Producers	281
	Bibliography	285
	Curriculum Vitae	307
	List of Scientific Publications	309
