

# Contents

**Acknowledgments — VII**

**Prologue — IX**

- 1 Introduction to TPE — 1**
  - 1.1 Rubber — 2
  - 1.2 PVC-P (PVC plasticized) — 4
  - 1.3 Olefinic polymer compounds — 5
  - 1.4 Copolymers — 6
- 2 Characteristic methods — 9**
  - 2.1 Shore hardness — 9
  - 2.2 Tensile strength — 9
  - 2.3 Intermittent stress-strain measurement — 10
  - 2.4 Dynamic mechanical (thermal) analysis — 13
  - 2.5 Differential scanning calorimetry — 15
- 3 A principal comparison of TPE to elastomers (vulcanized) — 17**
- 4 TPO — olefin-based TPE is introduced — 23**
  - 4.1 Manufacturing process — 24
  - 4.2 Properties — 24
  - 4.3 Processing — 28
- 5 TPV — olefin-based TPE, vulcanized, is introduced — 31**
  - 5.1 Manufacturing process — 32
  - 5.2 Properties — 34
  - 5.3 Processing — 38
- 6 TPS — styrene-based TPE is introduced — 41**
  - 6.1 Manufacturing process — 41
  - 6.2 Properties — 44
  - 6.3 Processing — 48
- 7 TPU — urethane-based TPE is introduced — 51**
  - 7.1 Manufacturing process — 52
  - 7.2 Properties — 54
  - 7.3 Processing — 61

<b>8</b>	<b>TPC – ester-based TPE is introduced — 63</b>
8.1	Manufacturing process — 64
8.2	Properties — 65
8.3	Processing — 69
<b>9</b>	<b>TPA – amide-based TPE is introduced — 71</b>
9.1	Manufacturing process — 72
9.2	Properties — 73
9.3	Processing — 75
<b>10</b>	<b>Renewable materials — 79</b>
<b>11</b>	<b>Description of testing procedure — 83</b>
11.1	Shore hardness by ISO 48-4 (formerly ISO 7619-1) — 83
11.2	Compression set by ISO 815-1 — 84
11.3	Dynamic mechanical analysis by ISO 6721 — 85
11.4	Intermittent stress-strain measurement — 86
11.5	Dynamic thermoanalysis by ISO 11357 — 87
11.6	Melt flow rate by ISO 1133 — 87
11.7	Viscosity curves by ISO 11443 — 88
11.8	Spiral flow — 89
<b>12</b>	<b>Epilogue — 91</b>
	<b>Literature — 93</b>
	<b>Index — 95</b>
