

Contents

Chapter 1

Introduction — 1

- 1.1 Overview of fine chemicals from acetylene — 1
- 1.2 Acetylene and its reaction technology — 1
 - 1.2.1 Properties of acetylene — 1
 - 1.2.2 Analysis of factors of acetylene decomposition and explosion and methods for safe use of acetylene — 4
 - 1.2.3 Acetylene reaction technology — 6
- References — 10

Chapter 2

Derivatives from acetylene reacting with formaldehyde — 13

- 2.1 1,4-Butanediol — 13
 - 2.1.1 The properties of 1,4-butanediol — 13
 - 2.1.2 Process for manufacture of 1,4-butanediol — 14
 - 2.1.3 Uses and consumption of BDO — 18
 - 2.1.4 Production status of 1,4-butanediol — 19
- 2.2 Tetrahydrofuran — 22
 - 2.2.1 Properties of tetrahydrofuran — 22
 - 2.2.2 Process for manufacture of tetrahydrofuran — 23
 - 2.2.3 Uses of tetrahydrofuran — 25
 - 2.2.4 Production status of tetrahydrofuran — 25
- 2.3 γ -Butyrolactone — 27
 - 2.3.1 Properties of γ -butyrolactone [7, 8] — 27
 - 2.3.2 Process for manufacture of γ -butyrolactone — 28
 - 2.3.3 Uses of γ -butyrolactone — 31
 - 2.3.4 Production status of γ -butyrolactone — 33
- 2.4 2-Pyrrolidone — 34
 - 2.4.1 Properties of 2-pyrrolidone — 34
 - 2.4.2 Process for the production of 2-pyrrolidone — 36
 - 2.4.3 Uses of 2-pyrrolidone — 38
 - 2.4.4 Production status of 2-pyrrolidone — 38
- 2.5 *N*-Methylpyrrolidone — 39
 - 2.5.1 Properties of NMP — 39
 - 2.5.2 Process for manufacture of NMP — 40
 - 2.5.3 Uses of NMP — 42
 - 2.5.4 Status of NMP production — 44
- 2.6 2-Pyrrolidone acetamide — 45
 - 2.6.1 Properties of 2-pyrrolidone acetamide — 45
 - 2.6.2 Process for manufacture of 2-pyrrolidone acetamide — 46

2.6.3	Uses of 2-pyrrolidone acetamide —	46
2.7	<i>N</i> -Vinylpyrrolidone —	47
2.7.1	Properties of NVP —	48
2.7.2	Process for manufacture of NVP —	49
2.7.3	Uses of NVP —	56
2.8	Polyvinylpyrrolidone —	56
2.8.1	The properties of PVP —	56
2.8.2	Process for manufacture of PVP —	63
2.8.3	Uses of polyvinylpyrrolidone series products —	72
2.8.4	PVP production status and market —	76
	References —	77

Chapter 3

Derivatives from acetylene reacting with alcohol — 79

3.1	Methyl vinyl ether —	79
3.1.1	Properties of methyl vinyl ether —	79
3.1.2	Method for production of methyl vinyl ether —	80
3.1.3	Uses of methyl vinyl ether —	82
3.2	Ethyl vinyl ether —	84
3.2.1	Properties of ethyl vinyl ether —	84
3.2.2	Process for manufacture of ethyl vinyl ether —	85
3.2.3	Uses of ethyl vinyl ether —	88
3.3	<i>n</i> -Butyl vinyl ether —	88
3.3.1	Properties of <i>n</i> -butyl vinyl ether —	88
3.3.2	Process for manufacture of <i>n</i> -butyl vinyl ether —	89
3.3.3	Uses of butyl vinyl ether —	91
3.4	Isobutyl vinyl ether —	93
3.4.1	Properties of isobutyl vinyl ether —	93
3.4.2	Process for manufacture of isobutyl vinyl ether —	93
3.4.3	Uses of isobutyl vinyl ether —	96
3.5	4-Hydroxybutyl vinyl ether —	99
3.5.1	Properties of 4-hydroxybutyl vinyl ether —	100
3.5.2	Process for manufacture of 4-hydroxybutyl vinyl ether —	100
3.5.3	Uses of 4-hydroxybutyl vinyl ether —	101
3.6	Diethylene glycol vinyl ethers —	102
3.6.1	Properties of diethylene glycol vinyl ethers —	103
3.6.2	Production process of diethylene glycol vinyl ethers —	103
3.6.3	Uses of diethylene glycol vinyl ether —	105
	References —	107

Chapter 4**Derivatives from acetylene reacting with ketone — 111**

- 4.1 Methylbutynol and isoprene — 111
 - 4.1.1 Properties of methylbutynol and isoprene — 111
 - 4.1.2 Production processes of methylbutynol and isoprene — 112
 - 4.1.3 Uses of methylbutynol and isoprene — 115
- 4.2 Methylpentynol — 116
 - 4.2.1 Properties of methylpentynol — 116
 - 4.2.2 Production process of methylpentynol — 116
 - 4.2.3 Uses of methylpentynol — 118
- 4.3 *tert*-Pentanol — 119
 - 4.3.1 Properties of *tert*-pentanol — 120
 - 4.3.2 Process for manufacture of *tert*-pentanol — 120
 - 4.3.3 Uses of *tert*-pentanol — 122
- 4.4 Dimethylhexynediol and dimethylhexanediol — 122
 - 4.4.1 Properties of dimethylhexynediol and dimethylhexanediol — 123
 - 4.4.2 Production process of dimethylhexynediol and dimethylhexanediol — 123
 - 4.4.3 Uses of methylhexynediol and dimethylhexanediol — 128
- 4.5 Methyl heptenone, dehydrolinalool and linalool — 128
 - 4.5.1 Properties of methyl heptenone — 129
 - 4.5.2 Properties of dehydrolinalool and linalool — 129
 - 4.5.3 Synthesis of methylheptenone — 130
 - 4.5.4 Process for manufacture of dehydrolinalool and linalool — 133
 - 4.5.5 Uses of methylheptenone, dehydrolinalool and linalool — 134
- 4.6 Geranyl acetone, dehydronerolidol and nerolidol — 135
 - 4.6.1 Properties of geranyl acetone, dehydronerolidol and nerolidol — 136
 - 4.6.2 Production process of geranyl acetone, dehydronerolidol and nerolidol — 136
 - 4.6.3 Uses of geranyl acetone, dehydronerolidol and nerolidol — 138
- 4.7 Isophytol — 139
 - 4.7.1 Properties of isophytol — 139
 - 4.7.2 Production process of isophytol — 139
 - 4.7.3 Uses of isophytol — 142
- 4.8 3-Methyl-2-penten-4-yn-1-ol — 142
 - 4.8.1 Properties of 3-methyl-2-penten-4-yn-1-ol — 143
 - 4.8.2 Production process of 3-methyl-2-penten-4-yn-1-ol — 143
 - 4.8.3 Uses of 3-methyl-2-penten-4-yn-1-ol — 146
- 4.9 Vitamin A — 146
 - 4.9.1 Properties of vitamin A — 146

- 4.9.2 Production processes of vitamin A — 147
- 4.9.3 Uses of vitamin A — 150
- References — 151

Chapter 5

Derivatives from acetylene reacting with halogen — 153

- 5.1 1,1,2,2-Tetrachloroethane — 153
 - 5.1.1 Properties of 1,1,2,2-tetrachloroethane — 153
 - 5.1.2 Process for manufacture of 1,1,2,2-tetrachloroethane — 154
 - 5.1.3 Uses of 1,1,2,2-tetrachloroethane — 155
- 5.2 1,1,2,2-Tetrabromoethane — 155
 - 5.2.1 Properties of 1,1,2,2-tetrabromoethane — 155
 - 5.2.2 Process for manufacture of 1,1,2,2-tetrabromoethane — 155
 - 5.2.3 Uses of 1,1,2,2-tetrabromoethane — 157
 - 5.2.4 Status of production and market of 1,1,2,2-tetrabromoethane in China — 157
- 5.3 Trichloroethylene — 158
 - 5.3.1 Properties of trichloroethylene — 158
 - 5.3.2 Production process of trichloroethylene — 160
 - 5.3.3 Uses of trichloroethylene — 162
 - 5.3.4 Production status of trichloroethylene — 162
- 5.4 Tetrachloroethylene — 163
 - 5.4.1 Properties of tetrachloroethylene — 163
 - 5.4.2 Process for manufacture of tetrachloroethylene — 164
 - 5.4.3 Uses of tetrachloroethylene — 166
 - 5.4.4 Production and market status of tetrachloroethylene — 167
- 5.5 1,1,1,2-Tetrafluoroethane — 167
 - 5.5.1 Properties of tetrafluoroethane — 167
 - 5.5.2 Production process of tetrafluoroethane — 168
 - 5.5.3 Uses of HFC-134a — 171
 - 5.5.4 Production status of HFC-134a — 171
- 5.6 1,1-Difluoroethane — 171
 - 5.6.1 Properties of 1,1-difluoroethane — 172
 - 5.6.2 Processes for manufacture of 1,1-difluoroethane — 172
 - 5.6.3 Uses of 1,1-difluoroethane — 173
 - References — 174

Chapter 6

Derivatives from acetylene reacting with acetic acid — 177

- 6.1 Vinyl acetate — 177
 - 6.1.1 Properties of vinyl acetate — 177
 - 6.1.2 Process for manufacture of vinyl acetate — 177

6.1.3	Uses of vinyl acetate —	181
6.1.4	Production status of vinyl acetate —	182
6.2	Polyvinyl acetate —	182
6.2.1	Properties of polyvinyl acetate —	182
6.2.2	Production process of polyvinyl acetate —	183
6.2.3	Uses of polyvinyl acetate —	183
6.3	Polyvinyl alcohol —	184
6.3.1	Properties of polyvinyl alcohol —	184
6.3.2	Process for manufacture of polyvinyl alcohol —	185
6.3.3	Uses of polyvinyl alcohol —	186
6.3.4	Production status of polyvinyl alcohol —	186
6.4	Polyvinyl butyral —	187
6.4.1	Properties of PVB —	188
6.4.2	Process for manufacture of PVB —	188
6.4.3	Uses of PVB resin —	192
	References —	193

Chapter 7

Other fine chemicals from acetylene — 195

7.1	Vinylacetylene, chloroprene and neoprene —	195
7.1.1	Properties of vinylacetylene, chloroprene and neoprene —	195
7.1.2	Process for manufacture of vinylacetylene —	196
7.1.3	Process for manufacture of chloroprene —	201
7.1.4	Uses of vinylacetylene, chloroprene and neoprene —	203
7.2	Leaf alcohol —	205
7.2.1	Properties of leaf alcohol —	205
7.2.2	Process for manufacture of leaf alcohol —	206
7.2.3	Uses of leaf alcohol —	208
7.3	2-Methylpyridine and 2-vinylpyridine —	209
7.3.1	Properties of 2-methylpyridine —	209
7.3.2	Properties of 2-vinylpyridine —	210
7.3.3	Process for manufacture of 2-methylpyridine —	210
7.3.4	Processes for manufacture of 2-vinylpyridine —	212
7.3.5	Uses of 2-methylpyridine and 2-vinylpyridine —	213
7.4	Acrylic acid —	214
7.4.1	Properties of acrylic acid —	215
7.4.2	Process for manufacture of acrylic acid —	215
7.4.3	Uses of acrylic acid —	217
7.5	Methyl acrylate —	217
7.5.1	Properties of methyl acrylate —	217
7.5.2	Processes for manufacture of methyl acrylate —	218

- 7.5.3 Uses of methyl acrylate — **222**
- 7.6 2-Methyl-1-acetylenyl-2-pentene-1-ol, empenthrin and
chlorempenthrin — **223**
- 7.6.1 Properties of 2-methyl-1-acetylenyl-2-pentene-1-ol, empenthrin
and chlorempenthrin — **224**
- 7.6.2 Process for manufacture of 2-methyl-1-acetylenyl-2-pentene-1-ol,
empenthrin and chlorempenthrin — **225**
- 7.6.3 Uses of 2-methyl-1-acetylenyl-2-pentene-1-ol, empenthrin
and chlorempenthrin — **226**
References — **226**
