Part I About This Thesis

1	Introduction	3
1.1	Motivation	3
1.2	Problem Statement	6
1.3	Objectives & Research Approach	6
1.4	Summary of Research Contributions	8
1.5	Readers Guide	8
2	Background	11
2.1	The Human Visual System & Depth Perception	11
2.2	Stereoscopic 3D Displays	13
2.3	Driving Simulation	16
2.4	Manual & Automated Driving	19
3	Related Work	23
3.1	In-car Interaction	23
3.2	Visual Displays	24
3.3	S3D User Interfaces	26
3.3.1	S3D Across Domains	26
3.3.2	Automotive S3D UIs	30
3.4	Challenges of in-car User Interfaces	34
3.5	Implications & Summary	35

Part II Design & Development of S3D Dashboards

4	Prototyping S3D Automotive UIs	39
4.1	Problem Statement	39
4.2	On Automotive UI Prototyping Environments	40
4.3	The Environment Simulation	43
4.4	The Buck	45
4.5	Discussion	53
4.5.1	Simulator Fidelity	54
4.5.2	Graphics Fidelity	55
4.5.3	Requirements	56
5	Design Space for S3D Dashboards	59
5.1	Problem Statement	59
5.2	On the Design of S3D UIs Inside and Outside the cars	60
5.3	Study Design	60
5.3.1	Apparatus	60
5.3.2	Procedure	61
5.3.3	Sample	62
5.4	Results	62
5.5	Discussion	63

Part III Case Studies & Applications

6	S3D for Change Detection and System Control	67
6.1	Problem Statement	67
6.2	Study Design	68
6.2.1	Apparatus	69
6.2.2	Procedure	69
6.2.3	Sample	73
6.2.4	Measures	73
6.3	Results	73
6.3.1	Experiment 1—Change Detection	74
6.3.2	Experiment 2—List Selection	75
6.4	Discussion	79
6.4.1	S3D for Change Detection and System Control	79
6.4.2	Limitations & Future Work	80

7	Using S3D for Trust and Social Presence	83
7.1	Problem Statement	83
7.2	On Trust in Virtual Anthropomorphized Agents	84
7.2.1	Trust	84
7.2.2	Anthropomorphism	86
7.3	Study Design	89
7.3.1	Procedure	89
7.3.2	Apparatus	90
7.3.3	Sample	94
7.3.4	Measures	94
7.4	Results	95
7.4.1	Control Variables	96
7.4.2	Behavioral Trust	98
7.4.3	Self-reported Trust	100
7.5	Discussion	100
7.5.1	Evaluation of the agent	101
7.5.2	The agent and trust	102
7.5.3	Limitations & Future Work	104
8	Urgent Cues While Driving: S3D Take-over Requests	107
8.1	Problem Statement	107
8.2	On Mental Workload and Take-over Notifications	109
8.2.1	Mental Workload While Driving	109
8.2.2	(Directional) Take-over requests	110
8.3	Study Design	112
8.3.1	Procedure	113
8.3.2	Driving Simulator	114
8.3.3	Pre-study: Take-over Notification	115
8.3.4	Measures	118
8.3.5	Sample	123
8.4	Results	123
8.4.1	Simulator Sickness Questionnaire	124
8.4.2	User Experience Questionnaire	125
8.4.3	Glance Behavior	126
8.4.4	Non-driving related task Performance:	
	n-Back-Rate	129
8.4.5	Workload	129
8.4.6	Take-over Performance	134

8.5	Discussion	135
8.5.1	Perception of the system	136
8.5.2	Workload (H1)	137
8.5.3	Type of Visualization and Location (H2)	138
8.5.4	Binocular Depth Cues (H3)	140
8.5.5	Limitations & Future Work	140
9	A User-elicited Gesture Set	143
9.1	Problem Statement	143
9.2	On NDRTs and In-Car Interaction	144
9.3	Study Design	145
9.3.1	Procedure	146
9.3.2	Apparatus	147
9.3.3	Measures	149
9.3.4	Sample	150
9.4	Results	151
9.4.1	Interaction Techniques	151
9.4.2	Agreement	153
9.4.3	Co-agreement	154
9.4.4	The User-Defined Gesture Set	154
9.5	Discussion	155
9.5.1	Gesture Set	155
9.5.2	Limitations & Future Work	158
 Part IV Summary & Outlook		
10	Discussion: On the Potential of S3D Dashboards	163
10.1	Design and Development of S3D Dashboards	164
10.2	Applications for S3D Dashboards	165
10.2.1	Driver Distraction	166
10.2.2	S3D For Trust	168
10.2.3	Take-Over Notification	169
10.3	Interaction Techniques for S3D Dashboards	170
11	Conclusion & Future Work	173
11.1	Summary of Results	174
11.2	Recommendations for Future Work	175
11.2.1	Novel and More Accessible Display Types	175
11.2.2	Expand The Scope: Novel Use-Cases	175

11.2.3	Communication	176
11.2.4	Real-world Driving Studies	176
11.3	Supporting Research Articles	176
Bibliography		179
