

Contents

Preface — V

List of abbreviations — XIX

About the Author — XXIX

Chapter 1

AI in general — 1

- 1.1 Undefined definition — 1
- 1.2 History of AI development and future — 2
- 1.3 Nature — 5
 - 1.3.1 In general — 5
 - 1.3.2 As a part of IT — 7
- 1.4 Classification — 8
 - 1.4.1 Elemental technologies involved in AI — 8
 - 1.4.2 Three AIs — 11
- 1.5 Role, function, and applications of AI — 13
 - 1.5.1 Role — 13
 - 1.5.2 Function — 14
 - 1.5.3 Supporting technologies — 14
 - 1.5.4 Applications — 17
- 1.6 Advantages and disadvantages — 18
 - 1.6.1 Advantages — 18
 - 1.6.2 Disadvantages — 18
- References — 19

Chapter 2

AI in information — 23

- 2.1 Data versus information — 23
 - 2.1.1 Data — 24
 - 2.1.2 Data mining, information, and DIKW hierarchy — 25
- 2.2 Knowledge, intelligence, and intellect — 26
- 2.3 AI ontology — 29
 - References — 30

Chapter 3

AI in society — 32

- 3.1 Global — 32
- 3.2 Societal — 35

3.3	Personal —	37
3.3.1	Technological environment —	37
3.3.2	Examples of jobs that are likely to be substituted by AI —	39
3.3.3	Representative examples of less likely positions to be substituted by AI —	40
3.3.4	New-type jobs that AI creates —	41
3.3.5	Work-style reformation —	42
3.4	Future of AI society —	43
	References —	44

Chapter 4

AI in concern — 47

4.1	Digital clone —	47
4.2	Personality —	49
4.2.1	Legal personality —	49
4.2.2	Personality —	50
4.2.3	Consciousness, gender, and marriage —	50
4.3	IQ and common sense —	52
4.3.1	IQ test —	52
4.3.2	Common sense —	54
4.3.3	Lie and Sontaku —	55
4.4	Bias and errors —	57
4.4.1	Bias —	57
4.4.2	Errors —	58
4.4.3	Computer virus and immune system —	60
4.5	EQ and ethics —	61
4.5.1	EQ —	62
4.5.2	Ethics —	63
4.5.3	Accountability —	65
4.6	Privacy and its related issues —	67
4.6.1	Privacy —	67
4.6.2	Transparency and explainability —	68
4.7	Copyright —	69
4.8	Singularity and other concerns —	72
4.8.1	Superintelligence and singularity —	72
4.8.2	Other concerns —	75
	References —	76

Chapter 5

AI in life: from cradle to grave — 82

5.1	Pregnancy and post-delivery —	83
5.1.1	Infertility treatment —	83

5.1.2	Sperm and embryo culturing —	86
5.1.3	Pregnant woman support —	87
5.2	Obstetrics and gynecology (OB/GYN) —	88
5.3	Pediatrics —	90
5.4	Daily life —	92
5.5	NCDs and frailty —	93
5.5.1	NCDs —	94
5.5.2	Frailty —	95
	References —	98

Chapter 6

AI in QOL (quality of living), QOS (quality of sleeping), and QOD (quality of dying) — 101

6.1	Quality of living (QOL) —	101
6.1.1	QOL by general healthcare —	103
6.1.2	QOL by checking excretions/secretions —	104
6.2	Quality of sleep (QOS) —	107
6.2.1	Checking quality of sleep —	108
6.2.2	Headband —	109
6.2.3	Armband —	109
6.2.4	Bed and mattress —	109
6.3	Quality of dying (QOD) —	110
	References —	114

Chapter 7

AI in food industry — 118

7.1	Food industry and biodiversity —	118
7.1.1	Food industry —	118
7.1.2	Biodiversity —	119
7.2	Agriculture industry —	120
7.2.1	Outdoor field agriculture —	120
7.2.2	Indoor vegetable factory —	122
7.3	Animal husbandry —	124
7.3.1	Livestock industry —	128
7.3.2	Dairy industry —	128
7.3.3	Poultry industry —	129
7.3.4	Gibier —	131
7.4	Marine products industry —	132
7.4.1	Natural ocean fish catching —	132
7.4.2	Aquaculture —	133
7.5	Supply mechanism and drone delivery —	136

- 7.6 Functional foods — **137**
- 7.7 Food safety and waste — **140**
- 7.8 AI-supported food technology — **142**
- 7.9 You are what you eat — **143**
- References — **146**

Coffee break: information diabetes — 153

References — **156**

Chapter 8

AI in practice of medicine — 158

- 8.1 Introduction — **158**
- 8.2 AI medicine versus ES medicine — **162**
- 8.3 Preventive medicine — **164**
 - 8.3.1 Prevention — **164**
 - 8.3.2 Prediction — **168**
- 8.4 Diagnosis — **169**
 - 8.4.1 Introduction — **169**
 - 8.4.2 Diagnosis — **171**
 - 8.4.3 Diagnosis cases — **174**
 - 8.4.4 AI diagnosis versus doctor diagnosis — **211**
 - 8.4.5 Iatrogenesis — **217**
- 8.5 Triage — **217**
 - 8.5.1 Triage in general — **217**
 - 8.5.2 Triage in COVID-19 era — **222**
- 8.6 Treatment, precision medicine, pain management — **223**
 - 8.6.1 Treatment cases — **223**
 - 8.6.2 Precision medicine and Edge-AI — **238**
 - 8.6.3 Pain management — **244**
 - 8.6.4 Allergy — **253**
 - 8.6.5 Drug development — **256**
 - 8.6.6 Medical care operations — **256**
 - 8.6.7 Surgical robot technologies — **261**
- 8.7 Prognosis — **264**
 - 8.7.1 Diagnosis and prognosis — **264**
 - 8.7.2 Remaining life prediction — **267**
- 8.8 Sports medicine — **271**
- 8.9 Cosmetic surgery — **273**
- 8.10 Concerns and future — **274**
 - 8.10.1 Concerns — **275**
 - 8.10.2 Future — **277**
- References — **277**

Chapter 9

AI in practice of dentistry — 302

- 9.1 Dentistry versus medicine — 302
- 9.2 AI dentistry — 304
 - 9.2.1 Digital dentistry — 304
 - 9.2.2 Health data management — 305
 - 9.2.3 AI dentistry — 308
- 9.3 AI dental disciplines — 311
 - 9.3.1 Implantology — 311
 - 9.3.2 Prosthodontics — 313
 - 9.3.3 Orthodontics — 314
 - 9.3.4 Periodontics — 322
 - 9.3.5 Endodontics — 323
 - 9.3.6 Pediatric dentistry — 324
 - 9.3.7 Oral cancers — 325
 - 9.3.8 Radiology — 325
- 9.4 AI dental laboratory and technicians — 328
- 9.5 Clinical recording and data security — 330
 - 9.5.1 SOAP — 330
 - 9.5.2 POS/POMR — 332
 - 9.5.3 PKC — 333
 - 9.5.4 HIPAA — 334
- 9.6 Advanced dentistry in future — 336
 - 9.6.1 Dentistry in general — 336
 - 9.6.2 Digital dentistry — 337
 - 9.6.3 Teledentistry — 340
 - 9.6.4 Systemic treatment — 342
- References — 346

Chapter 10

AI in drug development — 356

- 10.1 AI-assisted new drug development — 357
 - 10.1.1 Drug design — 358
 - 10.1.2 Target identification — 360
 - 10.1.3 Lead compound identification — 362
 - 10.1.4 Clinical research — 364
 - 10.1.5 Overall — 366
 - 10.1.6 COVID-19 vaccine development — 368
 - 10.1.7 Future activities — 370
- 10.2 AI-incorporated drug delivery systems — 374
- 10.3 Side effect and drug repositioning — 376

10.3.1	Side effect and its prediction —	376
10.3.2	Drug repositioning —	380
10.3.3	Biosimilar and generic drugs —	383
10.4	Drug information management and pharmacist —	385
10.4.1	Drug information management —	385
10.4.2	Prescription errors and management —	386
10.4.3	Role of pharmacists —	389
10.5	Placebo effect and nocebo effect —	390
10.5.1	Placebo effect —	390
10.5.2	Nocebo effect —	393
	References —	395

Chapter 11

AI in materials science and development — 402

11.1	AI-assisted materials science —	402
11.2	Smart materials —	404
11.3	AI-assisted materials design and development —	405
	References —	411

Chapter 12

AI in COVID-19 era, infodemic, and post-COVID-19 era — 414

12.1	With COVID-19 —	414
12.2	Some concerns and infodemic —	420
12.2.1	Concerns —	420
12.2.2	Infodemic —	422
12.3	Post COVID-19 —	424
	References —	428

Chapter 13

AI in future — 431

13.1	Present and future of AI technology —	432
13.1.1	Reinforcement learning (RL) —	432
13.1.2	Generative adversarial networks (GAN) —	436
13.1.3	Drastic change in employment sector and society —	439
13.1.4	Automated transportation —	440
13.2	Ecosystem —	442
13.3	Bioinformatics and ALife —	443
13.3.1	Bioinformatics —	443
13.3.2	ALife —	446
13.4	Medicine —	447
13.4.1	Volumetric display technology —	447
13.4.2	Parity mirror imaging —	450

13.5	Brain-computer interface (BCI) —	451
13.5.1	Consciousness of robot —	451
13.5.2	Human-robot interaction —	454
13.6	Prediction and singularity —	457
13.6.1	Prediction before singularity —	457
13.6.2	Singularity and beyond —	462
13.7	Quantum computers —	463
	References —	465

Closing remarks —	472
References —	473

Index —	475
