

Contents

Part I Focus and Scope

1 Introduction	3
1.1 Statement of the Research Problem and Relevance	3
1.2 Research Objective and Research Questions	7
1.3 Research Structure and Organization	10

Part II Conceptual Background

2 Green Innovation in the B2B Context	15
2.1 A Broad Concept of Innovation	15
2.2 Clarifying the Concept of Green Innovation	17
2.3 Specific Characteristics of Green Innovation	23
2.4 Drivers of Green Innovation	27
2.5 A Resource-Based Perspective to Adopt Green Innovation	29
2.5.1 A Brief Outline of the Resource-Based View of the Firm (RBV)	29
2.5.2 The Natural-Resource-Based View (NRBV) and Proactive Environmental Strategies	30
2.6 State of Research on Green Innovation and Major Gaps	32
3 B2B Innovation Adoption and Diffusion	35
3.1 Foundations of Innovation Adoption and Diffusion from a B2B Marketing Perspective	35
3.1.1 Innovation Adoption in B2B Markets	36
3.1.2 An Integrated View of Innovation Diffusion in B2B Industries	42

3.2	New Product Diffusion Models	45
3.2.1	The Original Bass Diffusion Model (BDM)	50
3.2.2	Reviews and Research on the Bass Diffusion Model	54
 Part III Empirical Studies and Computational Modeling		
4	Research Design and Methodology	59
4.1	Conceptual Framework and Research Questions	59
4.2	Research Approach	63
4.2.1	Grounded Theory Study	65
4.2.2	Experimental Vignette Study	70
4.2.3	System Dynamics Simulation	74
4.3	Empirical Field	78
4.3.1	Chemical and Plastics Industry	78
4.3.2	Emerging Bioplastics and Bioplastics Value Chain	81
4.3.3	Bioplastics as Green Innovation	84
5	Exploring why and how B2B Buyers Adopt Bioplastics	89
5.1	Specifying the Focus of the Qualitative Study	89
5.2	Methodology	90
5.2.1	Sampling, Data Collection, and Triangulation	90
5.2.2	Data Analysis and Coding	95
5.2.3	Evaluating Quality of Research	98
5.3	Summary of the Findings	101
5.3.1	Corporate Motivations to Adopt Bioplastics and Adopter Characteristics	102
5.3.2	Perceived Innovation Characteristics	111
5.3.3	Adoption Strategies and Competitive Advantage	120
5.4	Discussion of the Findings and Research Propositions	129
5.5	Limitations of the Qualitative Analysis	133
6	Investigating Relevant Factors in Business Adoption of Bioplastics	135
6.1	Specifying the Focus of the Quantitative Study	135
6.2	Hypotheses	137
6.2.1	Decision to Test Bioplastics	137
6.2.2	Decision to Launch First Bioplastic Products and to Roll-out to all Product Lines	144
6.3	Methodology	153
6.3.1	Sample	153

6.3.2	Data Collection	158
6.4	First Vignette Experiment: Decision to Test Bioplastics	159
6.4.1	Experimental Design and Variables	159
6.4.2	Analysis Method	165
6.4.3	Results	167
6.5	Second Vignette Experiment: Decision to Launch first Bioplastic Products	172
6.5.1	Experimental Design and Variables	172
6.5.2	Analysis Method	176
6.5.3	Results	177
6.6	Third Vignette Experiment: Decision to Roll-out Bioplastics to all Product Lines	184
6.6.1	Experimental Design and Variables	184
6.6.2	Analysis Method	186
6.6.3	Results	187
6.7	General Discussion	191
6.7.1	Decision to Test Bioplastics	194
6.7.2	Decision to Launch first Bioplastic Products	198
6.7.3	Decision to Roll-out Bioplastics to all Product Lines	201
6.8	Conclusions	203
6.8.1	Research and Managerial Implications	203
6.8.2	Limitations and Opportunities for Future Research	207
7	Developing a Diffusion Model for Emerging Bioplastic Products ...	211
7.1	Background and Motivation for the Simulation Study	212
7.2	Methodology	215
7.3	A System Dynamics Model of Bioplastic Innovation Diffusion	224
7.3.1	Purpose of the Model, Scope, Delimitations, and Limitations	224
7.3.2	Modeling process	226
7.3.3	Model Description	227
7.3.4	Model Validation	245
7.3.5	Scenario Analysis	249
7.4	Simulation Results	255
7.4.1	Global Model Results	255
7.4.2	Model Extension: Distinguishing Between Smaller and Larger-Sized Companies	271
7.5	Discussion and Implications	287

7.6	Conclusions, Limitations, and Future Research	293
 Part IV Synthesis		
8	Integrating Findings and Conclusions	299
8.1	Summary of Results	299
8.2	Limitation and Research Outlook	304
8.3	Implications for Practice and Policy	306
