List of figures	IX
List of tables	XI
Notation	XIII
Kurzfassung	XIX
Abstract	XXI
1 Introduction	1
2 State of the art in systems integration of adsorption chillers	5
2.1 Working principle and characterization	6
2.1.1 Adsorption phenomenon	6
2.1.2 Simple adsorption chiller cycle	8
2.1.3 Characterization of adsorption chillers	11
2.2 Modeling approaches	14
2.2.1 Adsorption equilibrium	14
2.2.2 Adsorption kinetics	16
2.2.3 Adsorption chiller models	17
2.3 Integration in hybrid systems	24
2.4 Integration of main system components and auxiliaries	26
2.5 Conclusions and contribution of this thesis	27
3 Development and experimental validation of an efficient adsorption chiller model	31
3.1 Modeling	32
3.1.1 Plug-flow-based heat exchanger	32

3.1.2	Adsorber bed	38
3.1.3	VLE volume	41
3.2	Calibration and validation method	42
3.2.1	Statistical measures	42
3.2.2	Application to the adsorption chiller	43
3.3	Comparison of the plug-flow-based and the discretized adsorption chiller model	45
3.3.1	Calibration	46
3.3.2	Validation	49
3.4	Model validation for a commercial two-bed adsorption chiller	53
3.4.1	Calibration	54
3.4.2	Validation	56
3.5	Validity of the plug-flow-based model	58
3.6	Summary	61
4	Integration into a hybrid system	63
4.1	Hybrid system concept	64
4.1.1	Combinations of CO ₂ cycle and sorption chiller	64
4.1.2	Integrated hybrid system	65
4.2	Modeling and optimization framework	68
4.2.1	CO ₂ vapor-compression cycle	68
4.2.2	Adsorption chiller	69
4.2.3	Optimization framework	70
4.3	Results	72
4.3.1	Design of the hybrid system	72
4.3.2	Case-studies	76
4.4	Summary	81
5	Integrated design and control	83
5.1	Method for integrated dynamic optimization of design and control	84
5.2	Case-study: solar-thermally-driven adsorption chiller system	87
5.2.1	Definition of performance indicators	87
5.2.2	Step 1: definition of application, specifications, and initial design	89
5.2.3	Step 2: dynamic system model and parametrization	93
5.2.4	Step 3: optimization of control	98
5.2.5	Step 4: evaluation of system design under optimal control	101
5.3	Summary	105
6	Summary, conclusion and future perspective	107
6.1	Summary and conclusion	107

6.2 Future research	109
A Adsorption equilibrium of silica gel 123 / water	113
B Parametrization of the lab-scale one-bed adsorption chiller	115
C Discretization of the adsorber model	119
D Publications and Student Theses	121
List of publications	121
Student theses supervised during this work	122
Bibliography	125
